Service Automation and Dynamic Provisioning Techniques in IP / MPLS Environments Christian

Jacquet, Gilles Bourdon, Mohamed Boucadair, 2008-04-15 Save time & resources with this comprehensive guide to automation configuration for the value-added IP services of the future. As the Internet becomes the medium of choice for value-added IP service offerings such as TV broadcasting, videoconferencing, and Voice over IP, the ability of automating configuration processes has become a key challenge for service providers. In fact, this feature has become crucial with the ever-growing level of expertise required to deploy such services and the scope of the techniques that need to be activated in order to provide such services with a guaranteed level of quality. Service Automation and Dynamic Provisioning Techniques in IP/MPLS Environments: Discusses architectures and protocols for services information, covering the state-of-the-art in current implementations of Remote Authentication Dial-In User Service (RADIUS), Diameter, Common Open Policy Service (COPS), Simple Network Management Protocol (SNMP) and NETCONF Explains various application examples, covering the

dynamic enforcement of QoS, security, and IP Traffic Engineering policies. Covers the automated production of MPLS-based VPNs. The authors offer an invaluable guide for IT facilitators, network managers, and researchers in industry and academia, as well as students studying advanced IP/MPLS networking communications courses. System designers and architects will also find this book helpful.

Proceedings of the Second HPI Cloud Symposium "Operating the Cloud" 2014 Bosse, Sascha ,Elsaid, Mohamed Esam, Feinbube, Frank ,Müller, Hendrik ,2015-12-23 Every year, the Hasso Plattner Institute (HPI) invites guests from industry and academia to a collaborative scientific workshop on the topic “Operating the Cloud”. Our goal is to provide a forum for the exchange of knowledge and experience between industry and academia. Hence, HPI’s Future SOC Lab is the adequate environment to host this event which is also supported by BITKOM. On the occasion of this workshop we called for submissions of research papers and practitioners’ reports. “Operating the Cloud” aims to be a platform for productive discussions of innovative ideas, visions, and upcoming technologies in the field of cloud operation and administration. In this workshop proceedings the results of the second HPI

cloud symposium Operating the Cloud 2014 are published. We thank the authors for exciting presentations and insights into their current work and research. Moreover, we look forward to more interesting submissions for the upcoming symposium in 2015.

Advances in User Authentication Dipankar Dasgupta, Arunava Roy, Abhijit Nag, 2017-08-22 This book is dedicated to advances in the field of user authentication. The book covers detailed description of the authentication process as well as types of authentication modalities along with their several features (authentication factors). It discusses the use of these modalities in a time-varying operating environment, including factors such as devices, media and surrounding conditions, like light, noise, etc. The book is divided into several parts that cover descriptions of several biometric and non-biometric authentication modalities, single factor and multi-factor authentication systems (mainly, adaptive), negative authentication system, etc. Adaptive strategy ensures the incorporation of the existing environmental conditions on the selection of authentication factors and provides significant diversity in the selection process. The contents of this book will prove useful to practitioners, researchers and

students. The book is suited to be used a text in advanced/graduate courses on User Authentication Modalities. It can also be used as a textbook for professional development and certification coursework for practicing engineers and computer scientists.

An Introduction to the DLNA Architecture Edwin A. Heredia,2011-05-31 This book describes the architecture and protocols for interconnecting media devices in home networks. The architecture and protocols described in this book have been developed during the last 10 years by R&D teams from several companies working jointly in two industry organizations known as UPnP and DLNA. This book mainly deals with the DLNA (Digital Living Network Alliance) protocol. This text is especially relevant for the design and development of smart homes, where media devices, communication devices, appliances, and sensors are all integrated in an intelligent network.

IFRS 9 and CECL Credit Risk Modelling and Validation Tiziano Bellini, 2019-02-08 IFRS 9 and CECL Credit Risk Modelling and Validation covers a hot topic in risk management. Both IFRS 9 and CECL accounting standards require Banks to adopt a new perspective in assessing Expected Credit Losses. The book explores a wide range of models and corresponding validation procedures. The most traditional regression analyses pave the way to more innovative methods like machine learning, survival analysis, and competing risk modelling. Special attention is then devoted to scarce data and low default portfolios. A practical approach inspires the learning journey. In each section the theoretical dissertation is accompanied by Examples and Case Studies worked in R and SAS, the most widely used software packages used by practitioners in Credit Risk Management. Offers a broad survey that explains which models work best for mortgage, small business, cards, commercial real estate, commercial loans and other credit products Concentrates on specific aspects of the modelling process

by focusing on lifetime estimates Provides an hands-on approach to enable readers to perform model development, validation and audit of credit risk models

Handbook of Research on Contemporary Storytelling Methods Across New Media and Disciplines

Mih?e?, Lorena Clara, Andreescu, Raluca, Dimitriu, Anda, 2021-01-15 Stories are everywhere around us, from the ads on TV or music video clips to the more sophisticated stories told by books or movies. Everything comes wrapped in a story, and the means employed to weave the narrative thread are just

as important as the story itself. In this context, there is a need to understand the role storytelling plays in contemporary society, which has changed drastically in recent decades. Modern global society is no longer exclusively dominated by the time-tested narrative media such as literature or films because new media such as videogames or social platforms have changed the way we understand, create, and replicate stories. The Handbook of Research on Contemporary Storytelling Methods Across New Media and Disciplines is a comprehensive reference book that provides the relevant theoretical framework that concerns storytelling in modern society, as well as the newest and most varied analyses and case studies in the field. The chapters of this extensive volume follow the construction and interpretation of stories across a plethora of contemporary media and disciplines. By bringing together radical forms of storytelling in traditional disciplines and methods of telling stories across newer media, this book intersects themes that include interactive storytelling and narrative theory across advertisements, social media, and knowledge-sharing platforms, among others. It is targeted towards professionals, researchers, and students working or studying in the fields of narratology,

literature, media studies, marketing and communication, anthropology, religion, or film studies. Moreover, for interested executives and entrepreneurs or prospective influencers, the chapters dedicated to marketing and social media may also provide insights into both the theoretical and the practical aspects of harnessing the power of storytelling in order to create a cohesive and impactful online image.

Thousands of Images, Now What? Mike Hagen, 2012-03-09 Tackle the challenges of digital photo file management! If you find yourself with more digital photos than you know what to do with or at a loss as to how to begin organizing them all, then Digital Asset Management (DAM) is your solution. This incredibly helpful book answers such common questions as: how should I manage the sheer volume of images? How can I make sure my pictures are safely backed-up? How can I efficiently categorize my images so that I can quickly find the one I'm seeking? Professional photographer and author Mike Hagen shows you how to organize, save, and back-up your digital photos by creating a filing and back-up system that are both efficient and effective. He walks you through the steps

necessary to successfully maintain an orderly archiving system so that you can quickly store, save, and retrieve your images. Digital Asset Management (DAM) helps you organize, save, and back-up your digital photos Explains how to efficiently and effectively create an intuitive filing system that is right for you Answers frequently asked questions regarding storing, saving, and retrieving images Encourages you to create a successful digital photo archive that, once created, will be easy to maintain and use Say so long to your days of being a digital photo pack rat when you put this easy-to-understand, helpful book to use!

Stealing the Network Johnny Long,Timothy Mullen,Ryan Russell,D. Scott Pinzon,2007-02-15 This is the final book in Syngress ground breaking, best-selling, Stealing the Network series. As with previous titles, How to Own a Shadow is a fictional story that demonstrates accurate, highly detailed scenarios of computer intrusions and counter-strikes. Knuth, the master-mind, shadowy figure from previous books, is tracked across the world and the Web by cyber adversaries with skill to match his own. Readers will be amazed at how Knuth, law enforcement, and organized crime twist and torque

everything from game stations, printers, and fax machines to service provider class switches and routers to steal, deceive, and obfuscate. From physical security to open source information gathering, this book will entertain and educate the reader on every page.

Elohim II: Ascension of the King Kerry L. Barger,2018-02 This book is the sequel to Elohim: Ancient Science Fiction or Biblical God? It explores what may have been and offers a glimpse at those who could soon be returning to Earth in our very near future. At the core of the facts presented within these chapters, lies a conundrum. There once existed an author who claimed to be the creator of the human race, and he wrote down his memoirs over 5,000 years ago. His tale evolved into many ancient religions. The question is, was he actually an alien being who came to Earth from another planet and

wrote a truthful autobiography, or was his book a science fiction novel written by a mere mortal? Either scenario reveals a compelling reality: an ancient, pre-historic society once thrived on our planet that either rivaled or exceeded our modern achievements in science and space technology.

Web Scalability for Startup Engineers Artur Ejsmont,2015-07-03 This invaluable roadmap for startup engineers reveals how to successfully handle web application scalability challenges to meet increasing product and traffic demands. Web Scalability for Startup Engineers shows engineers working at startups and small companies how to plan and implement a comprehensive scalability

strategy. It presents broad and holistic view of infrastructure and architecture of a scalable web application. Successful startups often face the challenge of scalability, and the core concepts driving a scalable architecture are language and platform agnostic. The book covers scalability of HTTP-based systems (websites, REST APIs, SaaS, and mobile application backends), starting with a high-level perspective before taking a deep dive into common challenges and issues. This approach builds a holistic view of the problem, helping you see the big picture, and then introduces different technologies and best practices for solving the problem at hand. The book is enriched with the author's real-world experience and expert advice, saving you precious time and effort by learning from others' mistakes and successes. Language-agnostic approach addresses universally challenging concepts in Web development/scalability—does not require knowledge of a particular language Fills the gap for engineers in startups and smaller companies who have limited means for getting to the next level in terms of accomplishing scalability Strategies presented help to decrease time to market and increase the efficiency of web applications

Architectural Aesthetics Edward Winters, 2023-05-18 The fine arts are traditionally seen to have intrinsic value: that is, they are valuable in themselves. But this poses a problem for architecture: its works are designed to serve our purposes, and therefore it is classed as functional. Carving out a new space, Edward Winters argues why architecture is a fine art and finds a place for the fine art of architecture in the cultural environment in which we structure our lives. Winters reconciles intrinsic value, as a fine art, with extrinsic value, as shelter, security and comfort, without collapsing into the modernist conception of Functionalism. He draws on the Apollonian and the Dionysian to resolve the apparent conflict between the two values: the former requiring contemplative, detached reflection, the latter an engaged, embodied entanglement with the festive mood inspired by the immediate situation. Architecture, Winters claims, is to be regarded as functional; but this functionality is subsumed under the intrinsic aesthetic value of living well. Introducing the main positions in the philosophy of architecture through the lens of the timeless argument about what constitutes art, Winters lays out a humanistic view of the medium and extends our understanding of aesthetics and the everyday.
