The Savory Wild Mushroom Margaret McKenny,

Accelerando Charles Stross,2005-07-05 The Singularity. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

Vectors of Plant Pathogens Kerry F. Harris,Karl Maramorosch,2013-10-02 Vectors of Plant Pathogens is a collection of papers that discusses the interrelationship of plant pathogens with their vectors. This collection deals with the numerous vector groups associated with plant pathogens. One paper describes the biology, feeding behavior and distribution of aphids, leafhoppers, plant hoppers, mealy bugs, whiteflies, psyllids, membracids. Another paper addresses the virus transmission characteristics of the mealy bugs during preliminary fasting or feeding, acquisition access time, post-acquisition fasting or feeding, and the inoculation access time. Other papers also discuss the involvement of insects in transmitting bacterial and fungal pathogens; the authors list unresolved issues such as the role of insects in overwintering of bacterial pathogens or the association of the fungus with a particular vector. One author describes some suspected fungi transmission such as the pea stem necrosis virus, red clover necrotic mosaic virus, and the tomato bushy stunt virus. Another paper examines the fate of plant viruses in mite vectors and convectors particularly the viruses found in wheat, barley, or brome grass. Agriculturists, botanists, and researchers in the field of botany, conservation, and plant genealogy will find this book useful.

Greening the Boardroom Grant Ledgerwood,2017-09-20 On a world scale, the implicit deal between corporation and community is undergoing a revolution in the period 1990–2000. For the first time, corporate boardrooms are having to confront the environmental challenge not as a peripheral issue around public relations, but as a core issue of credibility with its customers. As trust in big business has declined, consumer willingness to alter buying behaviour to register disapproval has accelerated. As a result, boardrooms in the largest companies are having to redraw their strategic procedures regarding the environment. This book aims to advance the general understanding of corporate environmental governance as an issue capable of separate and detailed analysis. It aims to provide not an overview, but a series of test cores into the generally unexamined issues surrounding the changing ethos of corporate action and environmental investment. To date, the business and environment strategic conversation has reached only a minute proportion of a global audience. Over the next twenty years, this dialogue will transform business into the 21st century. Moreover, it will become internalised into a way of working within Corporate Culture. Greening the Boardroom explores through case studies and surveys some of the changes in this process, in Europe as well as in Asia and North America. Suitable for readers in general management, business, government and academia, this book is an important contribution to the corporate environmental debate by the author of *The Environmental Audit and Business Strategy: A Total Quality Approach*.

The Chicken Bible America's Test Kitchen,2021-02-02 Poultry enthusiasts unite! ATK has you covered from the basic to the spectacular with 500 recipes that deliver low-key dinners, game-day favorites, simple sandwiches, special-occasion showstoppers, and beyond. You can call chicken a lot of things. Blank canvas, weeknight go-to, lean protein, we've heard it all. But boring? That's where we draw the line. Sure, it might have started to feel a bit redundant. But that's not the chicken's fault. ATK is here with the inspiration you need. It's time those chicken pieces in your freezer got the respect they deserve. Chicken is the go-anywhere, eat-with-anything, highly transformable crowd favorite that always fills the bill. Find exactly what you're looking for (and more!) with a wide breadth of themed chapters, including Easy Dinners, Classic Braises, Breaded and Fried, Pasta and Noodles, Savory Pies and Casseroles, and appliance-specific recipes. There's even a dedicated chapter of recipes for cooking for two. And with an introduction detailing how to prep any chicken part, from pounding breasts and preparing cutlets, to whole bird skills like butterflying or breaking down a chicken, you'll be a poultry pro in no time. Cozy up to succulent roast chickens with sauces made from pan drippings, sink your teeth into the crispiest, crunchiest fried chicken you've ever had, try your hand at sous vide for unbelievably moist chicken, or fire up the grill for anything from kebabs to beer can chicken. Feel like wingin' it? Us too. Our favorite is our game-changing Korean Fried Chicken Wings, double-fried so they stay extra-crispy under their blanket of spicy, salty, slightly-sweet sauce. With over 500 recipes, you could eat chicken every night and never tire of it. (And yes, that's a challenge.)

Recent Dynamics of the Mediterranean Vegetation and Landscape Stefano Mazzoleni,Gaetano di Pasquale,Mark Mulligan,Paolo di Martino,Francisco Rego,2004-10-22 The Mediterranean region has been shaped by human activity and maintained by traditional practices of land use for centuries. This has affected the distribution of plants and the landscape, which can be considered as part of the European cultural landscape. This book details the rapid changes that have taken place in the vegetation of the Mediterranean in the last half-century, a period in which major socio-economic development greatly affected the cultural and physical landscape.
