**Examining Law Enforcement Use of Cell Phone Tracking Devices** United States. Congress, United States House of Representatives, Committee on Oversight and Government Reform, 2017-11-23 Examining law enforcement use of cell phone tracking devices : hearing before the Subcommittee on Information Technology of the Committee on Oversight and Government Reform, House of Representatives, One Hundred Fourteenth Congress, first session, October 21, 2015.

Understanding Motion Capture for Computer Animation and Video Games Alberto Menache, 2000 Motion capture is a technique for recording a performance and then translating it into mathematical terms. Animating motion is critical for the development of applications such as animation, virtual environments and video games. Character animation is the process by which natural movements are modelled and digitized so that digital character movements appear as natural as possible. There are three approaches to character animation: keyframe animation, motion capture, and simulation.

**The Rise of Big Data Policing** Andrew Guthrie Ferguson, 2019-11-15 Winner, 2018 Law & Legal Studies PROSE Award The consequences of big data and algorithm-driven policing and its impact on law enforcement In a high-tech command center in downtown Los Angeles, a digital map lights up with 911 calls, television monitors track breaking news stories, surveillance cameras sweep the streets, and rows of networked computers link analysts and police officers to a wealth of law enforcement intelligence. This is just a glimpse into a future where software predicts future crimes, algorithms generate virtual “most-wanted” lists, and databanks collect personal and biometric information. The Rise of Big Data Policing introduces the cutting-edge technology that is changing how the police do their jobs and shows why it is more important than ever that citizens understand the far-reaching consequences of big data surveillance as a law enforcement tool. Andrew Guthrie Ferguson reveals how these new technologies—viewed as race-neutral and objective—have been eagerly adopted by police departments hoping to distance themselves from claims of racial bias and unconstitutional practices. After a series of high-profile police shootings and federal investigations into systemic police misconduct, and in an era of law enforcement budget cutbacks, data-driven policing has been billed as a way to “turn the page” on racial bias. But behind the data are real people, and difficult questions remain about racial discrimination and the potential to distort constitutional protections. In this first book on big data policing, Ferguson offers an examination of how new technologies will alter the who, where, when and how we police. These new technologies also offer data-driven methods to improve police accountability and to remedy the underlying socio-economic risk factors that encourage crime. The Rise of Big Data Policing is a must read for anyone concerned with how technology will revolutionize law enforcement and its potential threat to the security, privacy, and constitutional rights of citizens. Read an excerpt and interview with Andrew Guthrie Ferguson in The Economist.

**Protecting Consumer Phone Records Act** United States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2006

Smart Surveillance Ric Simmons, 2019-08-22 Over the last decade, law enforcement agencies have engaged in increasingly intrusive surveillance methods, from location tracking on cell phones to reading metadata off of e-mails. As a result, many believe we are heading towards an omniscient surveillance state and irrevocable damage to our privacy rights. In Smart Surveillance, Ric Simmons challenges this conventional wisdom by taking a broader look at the effect of new technologies and privacy, arguing that advances in technology can enhance our privacy and our security at the same time. Rather than focusing exclusively on the rise of invasive surveillance technologies, Simmons proposes a fundamentally new method of evaluating government searches - based on quantification, transparency, and efficiency - resulting in a legal regime that can adapt as technology and society change.

**Towards a Sustainable Information Society** Ewa Ziemia, 2016-01-14 This book represents an important voice in the scientific discourse on what constitutes a sustainable information society, and provides a new comprehensive and forward-looking approach to such a development. This approach is based on the adoption of information and communication technologies (ICTs) by the main stakeholders of society, including individuals, enterprises, and public administration, who should use ICTs in order to build the welfare of present and future generations, ensure economic growth and socio-cultural development, increase participation in public life, permit personal development, and build the wisdom of society. As such, the book mainly focuses on the role ICTs play in transforming business, public administration and everyday life in the context of the sustainable information society. This volume will appeal to both researchers and practitioners, as it provides significant areas and directions for research on the sustainable information society, and suggests important issues for programming, building and adopting such a society. The book will allow the reader to answer such critical contemporary questions as ‘What is the sustainable information society and what role is played by ICTs in this society?’; ‘What are the challenges and tasks of people, enterprises, and public administration that lead towards the sustainable information society?’; ‘How can ICTs support people, enterprises, and public administration in programming, building and adopting such a society?’; ‘What are the factors affecting ICT adoption by people, enterprises, and public administration in this context?’; ‘What are the areas that should require a primary focus in order to achieve the most satisfying results of ICT adoption by people, enterprises, and public administration?’; and ‘How can ICT adoption by people, enterprises, and public administration be measured here?’

**Information Security Theory and Practice** Raja Naeem Akram, Sushil Jajodia, 2015-08-21 This volume constitutes the refereed proceedings of the 9th IFIP WG 11.2 International Conference (formerly Workshop) on Information Security Theory and Practices, WISTP 2015, held in Heraklion, Crete, Greece, in August 2015. The 14 revised full papers and 4 short papers presented together were carefully reviewed and selected from 52 submissions. WISTP 2015 sought original submissions from academia and industry presenting novel research on all theoretical and practical aspects of security and privacy, as well as experimental studies of elded systems, the application of security technology, the implementation of systems, and lessons learned. We encouraged submissions from other communities such as law, business, and policy that present these communities' perspectives on technological issues.

*Smartphone Data, Information and Issues Regarding Surreptitious Tracking Apps That Can Facilitate Stalking* United States. Government Accountability Office, 2017-07-25 Smartphone tracking apps exist that allow a person to not only surreptitiously track another person's smartphone location information, but also surreptitiously intercept the smartphone's communications-such as texts, e-mails, and phone calls. This type of monitoring-without a person's knowledge or consent-can present serious safety and privacy risks. GAO was asked to review issues around the use of

surreptitious smartphone tracking apps. This report examines (1) how companies are marketing smartphone tracking apps on their websites, (2) concerns selected stakeholders have about the use of tracking apps to facilitate stalking, and (3) actions the federal government has taken or could take to protect individuals from the use of surreptitious tracking apps. GAO identified 40 smartphone tracking apps and analyzed their websites' marketing language. GAO interviewed stakeholders selected for their knowledge in this area, including academics; privacy, industry, and domestic violence associations; and tracking app and other companies. GAO also interviewed representatives of five federal agencies. GAO is not making any recommendations in this report. The Federal Trade Commission, the Department of Health & Human Services, and DOJ reviewed a draft

**Watching Earth from Space** Pat Norris,2010-11-15 Our planet is constantly monitored by hundreds of space-borne instruments. This book describes the technology of those instruments and the sciences that provide useful information from them. It also discusses the political implications of space-borne monitoring. From the moment satellites were launched into orbit their ability to see what was happening on a global scale was appreciated — and feared. This well researched book strives to answer such diverse questions as: Are satellites really a threat to individual privacy? How bad, really, is climate change and global warming? Why can't we find Osama bin Laden? Does the world have enough fresh water? The military side of the story is linked to the big security issues that we face, such as terrorism and civil wars. The civilian side of the story involves numerous successful collaborations in weather forecasting, navigation, communications, and other such peaceful uses of satellite surveillance. How the world handles the knowledge gained from these Earth watchers will be critical in the years to come, and Norris skillfully leads us through the issues and possible paths we can take.

**Lottery Corruption, U.S.A.** Harold Rosen,2023-01-30 Lottery Corruption, U.S.A. is very unique as compared to any other book written about the lotteries. There's more than enough significant data and information to convince the reader that our state lotteries are definitely being manipulated and controlled, illegally. This book is informative, enlightening, educational, and entertaining, so enjoy reading it.
