*The Problem of College Readiness* William G. Tierney, Julia C. Duncheon, 2015-03-30 Examines how states, schools, and postsecondary institutions might best help improve college readiness and completion. Though more students are entering college, many drop out, especially those who are low income and/or of color. To address this problem, educational stakeholders have focused on the concept of “college readiness,” or the preparation a student needs to succeed in college. However, what it means to be college ready and how to help more students become ready are questions without clear answers. By way of historical and contemporary analyses, this book uses California as a case study to demonstrate how the state has endeavored to make postsecondary opportunity accessible for all students. The contributors also explore the challenges that remain and address what states and schools can do to improve college readiness and completion. William G. Tierney is Wilbur-Kieffer Professor of Higher Education at the University of Southern California and the editor of many books, including *Governance and the Public Good*; *Preparing for College: Nine Elements of Effective Outreach* (with Zoe B. Corwin and Julia E. Colyar); *Increasing Access to College: Extending Possibilities for All Students* (with Linda Serra Hagedorn); and *Faculty Work in Schools of Education: Rethinking Roles and Rewards for the Twenty-first Century*, all published by SUNY Press. Julia C. Duncheon is a doctoral candidate in urban education policy at the University of Southern California.

**Colleges That Change Lives** Loren Pope, 2006-07-25 Prospective college students and their parents have been relying on Loren Pope's expertise since 1995, when he published the first edition of this indispensable guide. This new edition profiles 41 colleges—all of which outdo the Ivies and research universities in producing performers, not only among A students but also among those who get Bs and Cs. Contents include: Evaluations of each school's program and personality Candid assessments by students, professors, and deans Information on the progress of graduates This new edition not only revisits schools listed in previous volumes to give readers a comprehensive assessment, it also addresses such issues as homeschooling, learning disabilities, and single-sex education.

*SUNY at Sixty* John B. Clark, W. Bruce Leslie, Kenneth P. O'Brien, 2010-02-01 The comprehensive history of the State University of New York system. This is a fascinating history of the State University of New York, America's largest comprehensive university system. As such, it incorporates community colleges, colleges of technology, university colleges, research universities, medical schools, health science centers, and includes specialized campuses in fields as diverse as optometry, ceramics, horticulture, fashion, forestry, and maritime training. Originating in a conference held in spring 2009 to mark SUNY's 60th anniversary, the book covers the system's origins, political landscape, varied missions, the different types of institutions, international partnerships, leadership, future directions, and more. Other state systems have been studied more closely and in depth (California, Michigan, Texas), and this book is a long overdue effort to bring New York into that conversation. Edited by a past interim chancellor of the system, and two SUNY history professors, and with a foreword by current chancellor Nancy L. Zimpher, this book is essential for anyone who has a stake in public higher education in New York state, or indeed, public higher education anywhere.

*Achieving College Dreams* Rhona S. Weinstein, Frank C. Worrell, 2016 *Achieving College Dreams: How a University-Charter District Partnership Created an Early College High School* tells the story of a remarkable 10-year collaboration between the University of California, Berkeley and Aspire Public Schools to develop and nurture the California College Preparatory Academy. Bridging the two cultures--artfully described as Pac-Man (the charter district) meets chess (the university)--the school serves as an exemplar in providing low-income and first-generation college youth with an excellent and equitable education. Framed by a longitudinal lens, findings from community-engaged scholarship, and a diversity of voices from students to superintendents, this book charts the journey from the initial decision to open a school to the high school graduation of its first two classes. The book captures struggle, improvement, and success as it takes readers inside the workings of the partnership, the development of the school, and the spillover of effects across district and university. Confronting the challenge of interweaving rigor and support, its authors explore such critical ingredients as teacher-student advisories; school transition; the home-school divide; building a supportive college-preparatory culture; teaching with depth, relational power, and equity; the forging of an academic identity; and scaling up. At a time of sharply unequal schools, glaring disparities in college readiness, and heightened expectations, *Achieving College Dreams* uniquely extends the knowledge base about how to better prepare underserved students for college eligibility and success. The book also calls for universities to step up to the plate as partners with districts to ensure both excellence and equity in secondary education for all children.

**How College Works** Daniel F. Chambliss, 2014-02-17 Constrained by shrinking budgets, can colleges do more to improve the quality of education? And can students get more out of college without paying higher tuition? Daniel Chambliss and Christopher Takacs conclude that limited resources need not diminish the undergraduate experience. *How College Works* reveals the decisive role that personal relationships play in determining a student's success, and puts forward a set of small, inexpensive interventions that yield substantial improvements in educational outcomes. At a liberal arts college in New York, the authors followed nearly one hundred students over eight years. The curricular and technological innovations beloved by administrators mattered much less than did professors and peers, especially early on. At every turning point in undergraduate lives, it was the people, not the programs, that proved critical. Great teachers were more important than the topics studied, and just two or three good friendships made a significant difference academically as well as socially. For most students, college works best when it provides the daily motivation to learn, not just access to information. Improving higher education means focusing on the quality of relationships with mentors and classmates, for when students form the right bonds, they make the

most of their education.

**Achieving and Sustaining Institutional Excellence for the First Year of College** Betsy O. Barefoot,John N. Gardner,Marc Cutright,Libby V. Morris,Charles C. Schroeder,Stephen W. Schwartz,Michael J. Siegel,Randy L. Swing,2010-04-30 In 2002, the Policy Center on the First Year of College (supported by The Pew Charitable Trusts, The Atlantic Philanthropies, and Lumina Foundation for Education) sponsored a project to recognize colleges and universities as Institutions of Excellence in their design and execution of the first year. Thirteen colleges and universities—representing a broad spectrum of campus types—were selected as exceptional institutions that place a high priority on the first-year experience. Achieving and Sustaining Excellence in the First Year of College includes case studies of each of the thirteen exemplary institutions. These studies illustrate and analyze the colleges’ best practices in teaching, assessing, and retaining first-year college students. The individual case studies offer lessons learned and have broad potential application beyond the particular type of institution represented.

*From Educational Experiment to Standard Bearer* Daniel B. Friedman,Tracy L. Skipper,Catherine S. Greene,2022-11-29 An exploration of the University of South Carolina's trailblazing approach to the first-year experience As an innovative educational experiment, University 101 was designed to support students' transition to and success in college. Now, fifty years after its inception, the program continues to bring national recognition to the University of South Carolina. From Educational Experiment to Standard Bearer celebrates this milestone by exploring the course's origins; its evolution and success at the university; its impact on first-year students, upper-level students serving as peer leaders, faculty and staff instructors, and the university community and culture; and its role in launching the international first-year experience movement. By highlighting the most significant takeaways, lessons learned, and insights to practitioners on other campuses, this book will serve as an inspiration and road map for other institutions to invest in this proven concept and focus on the ingredients that lead to a successful program. John N. Gardner, founding director and architect of University 101, provides a foreword.
