EBay Motors Money Machine Master Mechanic,2015-01-11 Make \$500 a week selling used auto parts on eBay I'm going to show you how I make \$500 a week (usually much more) selling used auto parts on eBay. And, the great thing is- it's something anybody can do, if you don't mind getting a little dirty or greasy. What I'm going to show you doesn't require a fancy education or previous experience selling on eBay. You don't even really need to know anything about cars or car parts, but if you do-that's a big plus that can help you make even more money. What got me started selling car parts was I had an old mustang I always planned to restore. Then I got married. We had a kid, and the car sat there in the driveway gathering dust and complaints from the neighbors about it being an eyesore. Finally, I had enough and decided I'd try to sell it on Craigslist, but I didn't get any takers. I called the scrapyard. They offered me one hundred bucks. I was pretty sure a few of the parts alone were worth more than that. Several days later I got this crazy idea. What if I part it out on eBay? I was sure to get more than \$100. Over the next three weeks I pulled every part I could off of that car-shift knobs, shifter arm, distributor, glove box door, hood emblem, and window crank handle. You name a part, I put it up for sale, and the funny thing is they sold. Someone paid me \$33.00 for a window crank, \$25.00 for the Mustang horse emblem, and \$25.00 for the owner's manual. It was nuts! People emailed to ask if I had this or that part left. When I got their emails I'd head back out to the car with my wrench and screw driver to yank it out for them. I'd come back in the house and list the part on eBay for the agreed upon price. After three weeks I'd sold close to \$700 in parts from a car the junkyard offered a hundred bucks for. All I could think was-I need another car. That's when my brother-in-law popped into my head. He had an old Blazer. He was always saying he needed to get rid of it. I offered to take it off his hands for fifty bucks, and he said okay. By this time I was pretty much hooked. The Blazer parts sold for close to \$1000. I picked up a few more Junkers on Craigslist and made a couple dollars on them. The money was good, but it was just too much work. I told myself there had to be an easier way-one that didn't take so much time, effort, or hard work. That's what I'm going to cover next-how to get all of the used car parts you want without the hassle of having to buy the entire car and strip it down-without having to get all greasy and dirty. The Complete Book on Production of Automobile Components & Allied Products B.P. Bhardwaj,2014-01-01 The Complete

Book on Production of Automobile Components & Allied Products (Engine Parts, Piston, Pin, Piston Ring, Valve, Control Cable, Engine Mounting, Auto Lock, Disc Brake, Drum, Gear, Leaf Spring, Shock Absorber, Silencer, Chain, Cylinder Block, Chassis, Battery, Tyre & Flaps) The rapid urbanization, coupled with an overwhelming growth in the middle class population, has created a market that is extremely conducive for the automobile industry to flourish. It is inferred from the demand, the investment in the automobile industry is estimated at over hundredths of billions in the vehicles and auto components segment. The auto market is thought to be made primarily of automakers, but auto parts makes up another lucrative sector of the market. The major areas of auto parts manufacturing are: Original Equipment Manufacturers (OEMs) - The big auto manufacturers do produce some of their own parts, but they can't produce every part and component that goes into a new vehicle; Replacement Parts Production and Distribution - These are the parts that are replaced after the purchase of a vehicle. The book provides a characterization of vehicles, including structure, load, fuel used, requirement of various components, fabrication and so on. It will prove to be a layman's guide and is highly recommended to entrepreneurs, existing units who wants to diversify in production of automobile and allied products, research centers, professionals and libraries, as it contains information related to manufacturing of integral parts of an automobile and practices followed in the finishing of the products. The topics covered in the book are: Classification of vehicles on the basis of load, fuel used and their parts; Material used in the manufacturing of automobile (Metals, Alloys, Polymers etc.); Technology used; Use of Aluminium in Automobiles; Use of Plastics in Automobiles; Manufacturing practices for Engine Parts(Auto Piston, Pins, Piston ring, Lead Storage Battery, Valve & Valve Seat, Automobile Silencer, Automobile Chain, Cylinder Block, Automobile Control Cable, Engine Mounting PAD, Auto Locks etc.); Manufacturing of Automobile Chassis, Disc Brake, Brake Drum, Gear, Gear Blank, Leaf Spring, Shock Absorbers, Automobile Tyres; Heat Treatment System for Automobile Parts; Forging Technology (Open Die Forging Process, Close Die Forging Process, Designing of forged parts) and Painting Technology(Conversion Coating, NAD Finishes, Aluminium Flake Orientation, Opacity, Gloss, Electro Powder Coating, Spot Repair, Electrostatic Spray etc.) for automobile parts; Scab Corrosion Test, Peel Resistance.

Salvage Yard Treasures of America Car & Parts Magazine,Cars and Parts Staff,1999 The crack staff at Cars & Parts magazine takes the reader on a whirlwind tour of the nation's best salvage yards. Uncover the rare automotive treasures that are available any enthusiast with a few bucks in their pocket and a couple of hours to kill -- all without even getting mud on your shoes. Included are photographs from salvage yards that have never before been open to the general public.

Junkyards, Gearheads, and Rust David N. Lucsko,2016-05-15 The material appeal of the automobile junkyard goes beyond the search for second-hand parts. What happens to automobiles after they are retired but before they are processed as scrap? In this fascinating history, David N. Lucsko takes readers on a tour of salvage yards and

wrecked or otherwise out-of-service cars in the United States from the point of view of gearheads—the hot rodders, restoration hobbyists, street rodders, and classic car devotees who reuse, repurpose, and restore junked cars. *Junkyards, Gearheads, and Rust* is a nuanced exploration of the business of dismantling wrecks and selling second-hand parts. It examines the reinterpretation of these cars and parts by artists as well as their restoration by enthusiasts. It also surveys the origin and evolution of gearhead-oriented yards that specialize in specific types of automobiles; dissects the material and emotional appeal of the salvage yard and its contents among enthusiasts; and examines how zoning and nuisance ordinances have affected both salvage businesses and hobbyists. Lucsko concludes with an analysis of efforts during the last twenty-five years to hasten vehicular obsolescence at the expense of salvage yards, mechanics, and enthusiasts. By examining how cars are salvaged, repurposed, and restored, this book demonstrates that the history of the automobile is much more than a running catalog of showroom novelties.

Automotive Parts Sales 101 Tim Northburg, 2014-09-29 In dealerships today, we tend to focus primarily on the sales and service departments. What about the parts department? They are just as important to the well being of the dealership as the sales and service departments. Having properly trained and effective parts personnel is the first key to selling more parts and accessories. The second key is having process in place within the dealership that helps spread awareness that you sell additional parts and accessories. This book will distill some basic principles that will help you and your parts personnel thrive and sell more parts and accessories, both to internal and external customers.
