Data Activism and Social Change Miren Gutiérrez,2018-05-02

This book efficiently contributes to our understanding of the interplay between data, technology and communicative practice on the one hand, and democratic participation on the other. It addresses the emergence of proactive data activism, a new sociotechnical phenomenon in the field of action that arises as a reaction to massive datafication, and makes affirmative use of data for advocacy and social change. By blending empirical observation and in-depth qualitative interviews, Gutiérrez brings to the fore a debate about the social uses of the data infrastructure and examines precisely how people employ it, in combination with other technologies, to collaborate and act for social change.

Cognitive Surplus Clay Shirky,2010-06-10 The author of the breakout hit *Here Comes Everybody* reveals how new technology is changing us for the better. In his bestselling *Here Comes Everybody*, Internet guru Clay Shirky provided readers with a much-needed primer for the digital age. Now, with *Cognitive Surplus*, he reveals how new digital technology is unleashing a torrent of creative production that will transform our world. For the first time, people are embracing new media that allow them to pool their efforts at vanishingly low cost. The results of this aggregated effort range from mind-expanding reference tools like Wikipedia to life-saving Web sites like Ushahidi.com, which allows Kenyans to report acts of violence in real time. *Cognitive Surplus* explores what's possible when people unite to use their intellect, energy, and time for the greater good.

Evaluating Participatory Mapping Software Charla M.

Burnett,2023-04-21 This volume provides a framework for

evaluating geospatial software for participatory mapping. The evaluation is based on ten key indicators: ethics, cost, technical level, inclusiveness, data accuracy, data privacy, analytical capacity, visualization capacity, openness, and accessibility (i.e., mobile friendly or offline capabilities). Each application is evaluated by a user and cross analyzed with specific case studies of the software's real-world application. This framework does not discriminate against assessing volunteered geographic information (VGI) applications, as a form of participatory mapping, in circumstances that its application is spearheaded by underrepresented groups with the intent to empower and spark political or behavioral change within formal and informal institutions. Each chapter follows a strict template to ensure that the information within the volume can be updated periodically to match the ever-changing technological environment. The book covers ten different mapping applications with the goal of creating a comparative evaluation framework that can be easily interpreted by convening institutions and novice users. This will also help identify gaps in software for participatory mapping which will help to inform application development in the future and updates to current geospatial software.

Transnational Media Suman Mishra, Rebecca Kern-Stone, 2019-03-15 A broad and accessible introduction to national and transnational media Transnational Media: Concepts and Cases provides a clear and engaging overview of media communication from a global and a region-based perspective. Rather than focusing on just complex theories and industry-specific analyses, this unique book offers an inclusive, comparative approach to both journalism and entertainment media—introducing readers to the essential concepts, systems, transnational influences, and power dynamics that shape global media flow. Broad coverage of different media forms from Asia, Africa, the Americas, Europe, and Oceania offers country-based and transnational perspectives while highlighting examples of

media trends in television, radio, film, journalism, social media, music, and others. Promoting a balanced, multipolar exploration of transnational media, this innovative book discusses topics such as media concentration, the cultural, political, and economic impact of media, and the primary centers of new and traditional media activities. Chapters organized by geographic region offer instructive pedagogical features—including case studies and essays, and illustrations, maps and charts—that strengthen understanding of distinctive and emerging practices in the production, distribution, and consumption of media products. Explores a wide range of global media topics, infrastructures, cultures, and political-economic climates Written in an engaging, relatable, and easy to understand style Covers major aspects of journalism and various forms of entertainment media Organized by regions of the world to reflect a global perspective Includes newly-written case studies by international scholars from each region Designed for undergraduate and graduate courses in comparative media analysis, international media and communication, and related areas of study, *Transnational Media: Concepts and Cases* is an indispensable resource for colleges and universities that are internationalizing their curriculum to meet the needs of an increasing globalized world.

Communication, Culture, and Human Rights in Africa

Bala A. Musa, Jerry Komia Domatob, 2012-07-10 *Communication, Culture, and Human Rights in Africa* provides a comprehensive and interdisciplinary analysis of the interface between human rights and civil society, the media, gender, education, religion, health communication, and political processes, weaving theory, history, policy, and case analyses into a holistic intellectual and cultural critique while offering practical solutions.

Encyclopedia of Social Media and Politics

Kerrie Harvey, 2013-12-20 *The Encyclopedia of Social Media and Politics* explores how the rise of social media is altering politics both in the United States and in key moments, movements, and places

around the world. Its scope encompasses the disruptive technologies and activities that are changing basic patterns in American politics and the amazing transformations that social media use is rendering in other political systems heretofore resistant to democratization and change. In a time when social media are revolutionizing and galvanizing politics in the United States and around the world, this encyclopedia is a must-have reference. It reflects the changing landscape of politics where old modes and methods of political communication from elites to the masses (top down) and from the masses to elites (bottom up) are being displaced rapidly by social media, and where activists are building new movements and protests using social media to alter mainstream political agendas. Key Features This three-volume A-to-Z encyclopedia set includes 600 short essays on high-interest topics that explore social media's impact on politics, such as "Activists and Activism," "Issues and Social Media," "Politics and Social Media," and "Popular Uprisings and Protest." A stellar array of world renowned scholars have written entries in a clear and accessible style that invites readers to explore and reflect on the use of social media by political candidates in this country, as well as the use of social media in protests overseas Unique to this book is a detailed appendix with material unavailable anywhere else tracking and illustrating social media usage by U.S. Senators and Congressmen. This encyclopedia set is a must-have general, non-technical resource for students and researchers who seek to understand how the changes in social networking through social media are affecting politics, both in the United States and in selected countries or regions around the world.

Liberation Technology Larry Diamond, Marc F.

Plattner, 2012-07-30 *Liberation Technology* brings together cutting-edge scholarship from scholars and practitioners at the forefront of this burgeoning field of study. An introductory section defines the debate with a foundational piece on liberation technology and is then followed by essays discussing the popular

dichotomy of liberation" versus control with regard to the Internet and the sociopolitical dimensions of such controls. Additional chapters delve into the cases of individual countries: China, Egypt, Iran, and Tunisia.

Digital Technologies, Elections and Campaigns in Africa

Duncan Omanga,Admire Mare,Pamela Mainye,2023-11-15 This book looks at how digital technologies are revolutionizing electoral campaigns and democratization struggles in Africa. Digital technologies are giving voice and civic agency to a cross section of African voters, providing important spaces for political engagement and debate. Drawing on cases from Kenya, Uganda, Mozambique, Nigeria, Ethiopia, and Zimbabwe amongst others, this book traces the shifts and tensions in this changing electoral communications landscape. In doing so, the book explores themes such as hate speech and disinformation, decolonisation, surveillance, internet shutdowns, influencers, bots, algorithms, and election observation, and looks beyond Facebook, Twitter, WhatsApp and YouTube to the increasingly important role of visual platforms such as Instagram and TikTok. Particularly highlighting the contribution of African scholars, this book is an important guide for researchers across the fields of African politics, media studies, and electoral studies, as well as to professionals and policymakers in political communication.

Youth and Non-Violence in Africa's Fragile Contexts

Akin Iwilade,Tarila Marclint Ebiede,2022-10-22 This book makes an important contribution to the conflict literature and to new ways of thinking about agency and social life in fragile contexts. It does this by engaging with often ignored peace infrastructures. In this book, the contributors highlight different ways in which non-violence is deployed by Africa's youth to navigate difficult violent contexts. Drawing on empirically grounded case studies from the Central African Republic to Zimbabwe, this book explores how similar (or indeed the same) social infrastructures can be deployed for both violence and non-violence and the important

factors that drive many youth to take the non[1]violence option even when order appears to collapse around them. The authors also explore how, for instance, systems of organizing survive violent disruptions to the so-called rhythms of everyday life, and, when they do, how they are then repurposed by youth to help them survive violence.

Disasters 2.0 Adam Crowe, 2012-04-10 Emerging social media and so-called Web 2.0 technologies will continue to have a great impact on the practice and application of the emergency management function in every public safety sector. **Disasters 2.0: The Application of Social Media Systems for Modern Emergency Management** prepares emergency managers and first responders to successfully appl

European Handbook of Crowdsourced Geographic Information Cristina Capineri, Muki Haklay, Haosheng Huang, Vyron Antoniou, Juhani Kettunen, Frank Ostermann, Ross Purves, 2016-08-25 This book focuses on the study of the remarkable new source of geographic information that has become available in the form of user-generated content accessible over the Internet through mobile and Web applications. The exploitation, integration and application of these sources, termed volunteered geographic information (VGI) or crowdsourced geographic information (CGI), offer scientists an unprecedented opportunity to conduct research on a variety of topics at multiple scales and for diversified objectives. The Handbook is organized in five parts, addressing the fundamental questions: What motivates citizens to provide such information in the public domain, and what factors govern/predict its validity? What methods might be used to validate such information? Can VGI be framed within the larger domain of sensor networks, in which inert and static sensors are replaced or combined by intelligent and mobile humans equipped with sensing devices? What limitations are imposed on VGI by differential access to broadband Internet, mobile phones, and other communication

technologies, and by concerns over privacy? How do VGI and crowdsourcing enable innovation applications to benefit human society? Chapters examine how crowdsourcing techniques and methods, and the VGI phenomenon, have motivated a multidisciplinary research community to identify both fields of applications and quality criteria depending on the use of VGI. Besides harvesting tools and storage of these data, research has paid remarkable attention to these information resources, in an age when information and participation is one of the most important drivers of development. The collection opens questions and points to new research directions in addition to the findings that each of the authors demonstrates. Despite rapid progress in VGI research, this Handbook also shows that there are technical, social, political and methodological challenges that require further studies and research.

From Social Butterfly to Engaged Citizen Marcus Foth, Laura Forlano, Christine Satchell, Martin Gibbs, 2011-11-18 Studies from around the world show how the social media tools of Web 2.0 are shaping engagement with cities, communities, and spaces. Web 2.0 tools, including blogs, wikis, and photo sharing and social networking sites, have made possible a more participatory Internet experience. Much of this technology is available for mobile phones, where it can be integrated with such device-specific features as sensors and GPS. From Social

Butterfly to Engaged Citizen examines how this increasingly open, collaborative, and personalizable technology is shaping not just our social interactions but new kinds of civic engagement with cities, communities, and spaces. It offers analyses and studies from around the world that explore how the power of social technologies can be harnessed for social engagement in urban areas. Chapters by leading researchers in the emerging field of urban informatics outline the theoretical context of their inquiries, describing a new view of the city as a hybrid that merges digital and physical worlds; examine technology-aided engagement involving issues of food, the environment, and sustainability; explore the creative use of location-based mobile technology in cities from Melbourne, Australia, to Dhaka, Bangladesh; study technological innovations for improving civic engagement; and discuss design research approaches for understanding the development of sentient real-time cities, including interaction portals and robots.

Geoinformation for Informed Decisions Alias Abdul Rahman, Pawel Boguslawski, François Anton, Mohamad Nor Said, Kamaludin Mohd Omar, 2014-07-08 This book presents the latest research developments in geoinformation science, which includes all the sub-disciplines of the field, such as: geomatic engineering, GIS, remote sensing, digital photogrammetry, digital cartography, etc.

Global Civil Society 2012 Hertie School of, 2012-04-18 Activists and academics look back over ten years of 'politics from below', and ask whether it is merely the critical gaze upon the concept that has changed – or whether there is something genuinely new about the way in which civil society is now operating.

The Trillion Dollar Shift Marga Hoek, 2018-01-12 Winner of the Gold Axiom Business Book Award 2019 in the Philanthropy / Non Profit / Sustainability category. Over the past 30 years, the world has seen great social improvements. Technology has been

developing at an enormous pace and is helping to solve our most pressing social and environmental challenges. Yet, despite this success, our current model of development is still deeply problematic. Natural disasters triggered by climate change have doubled since the 1980s, violence and armed conflict now cost more than 13 percent of GDP, social inequality and youth unemployment is worsening around the world, and climate change threatens the global population with tremendous environmental as well as social problems. Using the United Nations Sustainable Development Goals as a framework, this book sets out how business and capital now have a real opportunity to help resolve these problems. With clear and plentiful examples and cases of how businesses are making a difference, relevant facts and figures to support the cases, and inspiring and instructional information on how businesses can create sustainable value, this highly readable book is a must-read for businesses (large and small) that wish to genuinely support the delivery of the SDGs. The Paris Climate Agreement and the Sustainable Development Goals (SDGs) drive change and offer a narrative and an opportunity to all to speak in one language on sustainability. They provide us with a clear set of targets for 2030. Through following the SDGs, opportunities abound for business and capital to unlock markets which offer endless potential for profit while at the same time working towards the Sustainable Development Goals. This book illustrates for business how to make the much-needed Trillion Dollar Shift.

Cities of the World Stanley D. Brunn, Maureen Hays-Mitchell, Donald J. Zeigler, Jessica K. Graybill, 2016-03-11 This fully updated and revised sixth edition offers readers a comprehensive set of tools for understanding the urban landscape and, by extension, the world's politics, cultures, and economies. Providing a sweeping overview of world urban geography, noted experts explore the eleven major global regions. Each regional chapter considers urban history, economy, culture, and environment, as

well as urban spatial models and problems and prospects. This edition focuses specifically on urban environmental issues, social and economic injustice, security and conflict, the history of urban settlement, urban models, and daily life. Building on 2015 as the Year of Water, the book introduces urban water concerns as a common undercurrent running through all chapters. The contributors explore how water affects cities and how cities affect water—from glacier loss to growing aridity, sea-level rise, increased flooding, potable water scarcity, and beyond. Vignettes of key cities give the reader a vivid understanding of daily life and the “spirit of place.” Liberally illustrated in full color with a new selection of photographs, maps, and diagrams, the text also includes distinctive textboxes to highlight key topics such as gender and the city, Islamic fashion, and global warming. Clearly written and timely, *Cities of the World* will be invaluable for introductory or advanced classes on global cities, regional geography, the developing world, and urban studies.

Interop John Palfrey, Urs Gasser, 2012-06-05 In *Interop*, technology experts John Palfrey and Urs Gasser explore the immense importance of interoperability -- the standardization and integration of technology -- and show how this simple principle will hold the key to our success in the coming decades and beyond. The practice of standardization has been facilitating innovation and economic growth for centuries. The standardization of the railroad gauge revolutionized the flow of commodities, the standardization of money revolutionized debt markets and simplified trade, and the standardization of credit networks has allowed for the purchase of goods using money deposited in a bank half a world away. These advancements did not eradicate the different systems they affected; instead, each system has been transformed so that it can interoperate with systems all over the world, while still preserving local diversity. As Palfrey and Gasser show, interoperability is a critical aspect of any successful system -- and now it is more important than ever.

Today we are confronted with challenges that affect us on a global scale: the financial crisis, the quest for sustainable energy, and the need to reform health care systems and improve global disaster response systems. The successful flow of information across systems is crucial if we are to solve these problems, but we must also learn to manage the vast degree of interconnection inherent in each system involved. Interoperability offers a number of solutions to these global challenges, but Palfrey and Gasser also consider its potential negative effects, especially with respect to privacy, security, and co-dependence of states; indeed, interoperability has already sparked debates about document data formats, digital music, and how to create successful yet safe cloud computing. Interop demonstrates that, in order to get the most out of interoperability while minimizing its risks, we will need to fundamentally revisit our understanding of how it works, and how it can allow for improvements in each of its constituent parts. In Interop, Palfrey and Gasser argue that there needs to be a nuanced, stable theory of interoperability -- one that still generates efficiencies, but which also ensures a sustainable mode of interconnection. Pointing the way forward for the new information economy, Interop provides valuable insights into how technological integration and innovation can flourish in the twenty-first century.

The Top Books of the Year Ushahidi The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have charmed audiences this year.

Ushahidi : Colleen Hoover "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed.

Ushahidi : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery.

Ushahidi : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered.

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious

figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
