Neither Snow Nor Rain Devin Leonard, 2016-05-03 “[The] book makes you care what happens to its main protagonist, the U.S. Postal Service itself. And, as such, it leaves you at the end in suspense.” –USA Today Founded by Benjamin Franklin, the United States Postal Service was the information network that bound far-flung Americans together, and yet, it is slowly vanishing. Critics say it is slow and archaic. Mail volume is down. The workforce is shrinking. Post offices are closing. In *Neither Snow Nor Rain*, journalist Devin Leonard tackles the fascinating, centuries-long history of the USPS, from the first letter carriers through Franklin’s days, when postmasters worked out of their homes and post roads cut new paths through the wilderness. Under Andrew Jackson, the post office was molded into a vast patronage machine, and by the 1870s, over seventy percent of federal employees were postal workers. As the country boomed, USPS aggressively developed new technology, from mobile post offices on railroads and airmail service to mechanical sorting machines and optical character readers. *Neither Snow Nor Rain* is a rich, multifaceted history, full of remarkable characters, from the stamp-collecting FDR, to the revolutionaries who challenged USPS’s monopoly on mail, to the renegade union members who brought the system—and the country—to a halt in the 1970s. “Delectably readable . . . Leonard’s account offers surprises on almost every other page . . . [and] delivers both the triumphs and travails with clarity, wit and heart.” –Chicago Tribune

U. S. Postal Service United States Government Accountability Office, 2013-01-16 The U.S. Postal Service (USPS) currently offers 12 nonpostal services (i.e., services not directly related to mail delivery) that were grandfathered by the Postal Regulatory Commission (PRC) after enactment of the Postal Accountability and Enhancement Act (PAEA). These services--which include Passport Photo Services, the sale of advertising to support change-of-address processing, and others--generated a net income of \$141 million in 2011. Since enactment of PAEA, USPS has received approval from PRC to offer eight experimental postal products, which are products that differ significantly from other offered products, such as the sale of gift cards loaded with a specified sum of money. Lastly, USPS performs at least four discretionary services (i.e., services it chooses, rather than is required, to perform) for other federal agencies, such as accepting passport applications for the State Department. USPS is currently pursuing 55 new initiatives that it identified based on outreach to postal stakeholders. USPS chose to pursue these initiatives because of their potential to increase revenue and add value to the mail, among other reasons. Forty-eight initiatives are extensions of existing lines of postal products and services, such as offering Post Office Box customers a suite of service enhancements (e.g., expanded lobby hours and earlier pickup times) at selected locations and increasing public awareness of the availability of postal services at retail

stores. Three initiatives are extensions of existing nonpostal services, including allowing customers to forward their mail to a new address using mobile devices. Finally, four of the initiatives involve experimental postal products, such as prepaid postage on the sale of greeting cards. These four experimental products are among the total of eight experimental products that have received PRC approval since enactment of PAEA. Forty-five of the 55 initiatives are ongoing; the remaining are under development. USPS considered but decided not to pursue 25 other stakeholder-identified initiatives, primarily because of financial reasons. Twelve initiatives were abandoned because USPS determined they were not likely to be profitable or the initial investment was too high. Reasons for not pursuing other initiatives included insufficient stakeholder interest or lack of statutory authority. USPS would like to pursue revenue-generating opportunities in three areas--nonpostal services, shipments of alcoholic beverages, and services performed for state and local governments--if it is provided with statutory authority to do so. USPS officials said opportunities in these areas could improve USPS's financial position, but they emphasized that additional innovations will not be sufficient to return USPS to financial solvency. Results will also be constrained by the economic climate and by changing use of the mail. USPS's multiyear revenue plan detailing its competitive strategies is expected in the spring of 2013.

Bridging the Gap to Solvency Joel Benner, 2020-12-16 Beginning employment at the USPS, a dubious phenomenon occurred in the work environment that seemed to be stemming from administrative positions. At thirty-two years old and having a poor track record with past endeavors, I knew if there ever came a point in time where I would have to defend my merit, it would be against the word of people who have decades in the postal service, multiple people saying the same thing. With the inclination that I had entered a corrupt environment and the unwillingness to compromise my integrity, I would have to write down in detail every time something happened that affected me and my career negatively. I documented for a full year, and on my first vacation starting 381 days after my start date with the USPS, I began writing a book, returning from my vacation on May 26. I received a predisciplinary interview. I was thirty thousand words into my novel when this happened. Over the course of fourteen days, I received several disciplinary actions, the last one being a seven-day suspension. The same day, I discovered OIG released a report on June 10 that publicly disclosed the findings of a four-year investigation over stamp count analysis stating the amount of offices that exceeded the maximum order shipments from stamp fulfillment services (12,151 offices in 2018) and how offices were able to hide the additional inventory. It was a feature added in retail system software called "excludable stamp stock inventory." It was a storage unit that the USPS devised to move additional stamps during quarter two of the physical year (Merry Christmas). This feature is what's called a gap in internal controls. It's not monitored, and there is no SOP for administrative action. OIG made this discovery by arresting one postmaster who exceeded the stamp ordering from stamp fulfillment services, transferring excess inventory to excludable stamp stock in RSS, and virtually walking them out of the building, selling them to a third party dealer or on eBay (OIG report number FT-AR-19-0008). When this information was released, I had caught up to myself in time, and it gave me the last chapter of my book, Bridging the Gap to

Solvency Fixing the USPS. It was the broken lightbulb that lit up the entire strand of lights. Louis Dejoy took over command as the PMG the following week, about whom in my book I stated, "He is a Brooklyn Juggernaut, and postal workers will suffer the fate in which we brought upon ourselves. I take full responsibility and maintain my loyalty to the USPS." I submitted the manuscript two weeks later to a few different publishing agencies which all wanted to sign a contract with me the same week PMG Dejoy began his march forward. The book is to enlighten the public so the mass workforce cannot rise up and stop necessary actions that must happen so the postal service can fulfill a universal mandate of delivering the mail. It's done. I did it. I didn't get assassinated, and I hope it makes a positive difference for those who choose to do the right thing. That's what it's about.

U. S. Postal Service (USPS) Phil Herr, 2010-10 Deteriorating financial conditions and declining mail volume have reinforced the need for the USPS to increase operational efficiency and reduce expenses in its mail processing network (MPN). This network consists of interdependent functions in 600 facilities. USPS developed several initiatives to reduce costs and increase efficiency; however, moving forward on some initiatives has been challenging because of the complexities involved in consolidating operations. This report assessed: (1) the overall status and results of USPS's efforts to realign its MPN; and (2) the extent to which USPS has consistently followed its guidance and applied these criteria in reviewing Area Mail Processing proposals for consolidation since the beginning of FY 2009. Illus.

U. S. Postal Service (USPS) Phillip Herr, 2011-06 The USPS's financial outlook has deteriorated as customers have shifted to electronic alternatives. Mail volumes have declined over 20% since FY 2006 and are expected to continue declining. To help its financial outlook, in March 2010, USPS presented a detailed proposal to move from a 6-day to a 5-day delivery schedule. USPS projected this would save about \$3 billion annually and reduce mail volume by less than 1%. This proposal factors in widespread changes to USPS's workforce and networks. This report assessed: (1) USPS's cost and volume estimates and the operational impacts associated with its 5-day delivery proposal; and (2) the trade-offs and other implications associated with this proposal. Illus. A print on demand report.

Working For USPS A. Gregory, 2016-06-21 Have you ever thought about being a mail carrier for the USPS? If so, now's the time because the United States Postal Service is hiring like never before. After a job freeze for far too long, full-time employees now retiring, and a growth in packages, the post office needs help delivering the mail like never before. A new position called City Carrier Assistant (CCA) is now open for prospective employees. But before you go to the trouble of jumping through hoops to get the position, only to find it's simply not what you expected, read this book to get more of an idea what you're getting yourself into. The author tried the job, and within these pages is what this one particular person experienced. The conflict of what happens in reality and the proposed practices was so unbelievable to the author, that this book had to be written. This is a first-hand account of what an average person might experience as they go through the process of applications, orientations, training, and finally on the street delivering the mail. We guarantee what you imagined will be nothing like the reality. So don't go in blind to a job you're not familiar with, and quickly become overwhelmed with propaganda

and infinite forms to learn. Read this book and at least have a general idea of what to expect by seeing through the eyes of someone who has already done it. Whether you're looking to apply for the position, or just a postal customer who's curious about how their mail gets around from point A to point B, once finished with this book, you'll never look at the mail system the same way again.

The Persian Wars Herodotus, 2021-04-10 Herodotus, the great Greek historian, wrote this famous history of warfare between the Greeks and the Persians in a delightful style. Herodotus portrays the dispute as one between the forces of slavery on the one hand and freedom on the other. This work covers the rise of the Persian influence and a history of the Persian empire, a description and history of Egypt, and a long digression on the landscape and traditions of Scythia. Because of the comprehensiveness of this work, it was considered the founding work of history in Western literature. A must-have for history enthusiasts.

U. S. Postal Service: USPS Has Taken Steps to Strengthen Network Realignment Planning and Accountability and Improve Communication Phillip Herr, 2009 Reports have been issued on the USPS strategy for realigning its mail processing network and improving delivery performance info. These reports recommended that the USPS: (1) strengthen planning and the overall integration of its realignment efforts, and enhance accountability by establishing measurable targets and evaluating results; (2) improve delivery service standards and performance measures; and (3) improve communication with stakeholders by improving public notice, engagement, and transparency. This testimony discusses USPS's actions toward: (1) strengthening network realignment planning and accountability; (2) improving delivery performance info.; and (3) improving communication with stakeholders. Discover the secrets behind driving views for listings Find out how to source merchandise for resale Get advice on the back-office tasks of running a business Grow your business beyond the eBay platform If you have an eye on building a business on eBay—and beyond—this is the one-stop guide you need to succeed.

U. S. Postal Service (USPS) Phillip Herr, 2011 The USPS recently reported that its financial results for the first half of this fiscal year -- a net loss of \$2.6 billion -- are worse than projected. USPS expects continued financial challenges as mail volume continues to decline. Most notable is the decline of First-Class Mail (its

most profitable mail) by over 25 billion pieces, or about 25%, over the past decade. There have been reports on proposals to revise USPS pension and retiree health obligations, but such actions alone will not be sufficient to address the accelerating volume decline and changing use of the mail. This statement discusses: (1) why it is important to restructure USPS's networks; and (2) what actions are needed to facilitate additional progress. Illustrations. This is a print on demand report.

U. S. Postal Service Bernard L. Ungar, 2001-04 Reviews electronic-commerce initiatives (ECI) of the USPS. Some have questioned the merits of USPS' development of non-postal products and services, including those that are e-commerce related. The report describes USPS': (1) ECI that have been implemented or are being developed, (2) goals and strategies for the ECI, (3) processes for approving these ECI, and (4) expected performance and results to date related to ECI. Discusses areas where USPS can improve its management of its ECI. Describes USPS' views on how major federal laws and regulations apply to its ECI and identifies legal issues that have been raised concerning its ECI.

How the Post Office Created America Winifred Gallagher, 2016-06-28 A masterful history of a long underappreciated institution, *How the Post Office Created America* examines the surprising role of the postal service in our nation's political, social, economic, and physical development. The founders established the post office before they had even signed the Declaration of Independence, and for a very long time, it was the U.S. government's

largest and most important endeavor—indeed, it was the government for most citizens. This was no conventional mail network but the central nervous system of the new body politic, designed to bind thirteen quarrelsome colonies into the United States by delivering news about public affairs to every citizen—a radical idea that appalled Europe’s great powers. America’s uniquely democratic post powerfully shaped its lively, argumentative culture of uncensored ideas and opinions and made it the world’s information and communications superpower with astonishing speed. Winifred Gallagher presents the history of the post office as America’s own story, told from a fresh perspective over more than two centuries. The mandate to deliver the mail—then “the media”—imposed the federal footprint on vast, often contested parts of the continent and transformed a wilderness into a social landscape of post roads and villages centered on post offices. The post was the catalyst of the nation’s transportation grid, from the stagecoach lines to the airlines, and the lifeline of the great migration from the Atlantic to the Pacific. It enabled America to shift from an agrarian to an industrial economy and to develop the publishing industry, the consumer culture, and the political party system. Still one of the country’s two major civilian employers, the post was the first to hire women, African Americans, and other minorities for positions in public life. Starved by two world wars and the Great Depression, confronted with the country’s increasingly anti-institutional mind-set, and struggling with its doubled mail volume, the post stumbled badly in the turbulent 1960s. Distracted by the ensuing modernization of its traditional services, however, it failed to transition from paper mail to email, which prescient observers saw as its logical next step. Now the post office is at a crossroads. Before deciding its future, Americans should understand what this grand yet overlooked institution has accomplished since 1775 and consider what it should and could contribute in the twenty-first century. Gallagher argues that now, more than ever before, the imperiled post office deserves this effort, because just as the founders anticipated, it created forward-looking, communication-oriented, idea-driven America.
