**Flexible Databases Supporting Imprecision and Uncertainty** Gloria Bordogna, Giuseppe Psaila, 2007-06-02 This volume offers the advice of selected expert contributors on the application of heterogeneous methods for managing uncertainty and imprecision in databases. It contains both survey chapters on classic topics such as flexible querying in databases, and up to date information on database models to represent imperfect data. Further, it includes specific contributions on uncertainty management in database integration, and in representing and querying semistructured and spatial data.

**Project Management for PhDs** Jeanine de Bruin, Brigitte Hertz, 2010 Only a small percentage of PhD students manage to complete their PhD thesis on time. How can a student plan his/her PhD program in such a way that it will be completed within a set period? Project Management for PhDs shows how to plan and manage a PhD program, no matter how complex and unique the project may be. The writing process receives special attention, as it has been proven to be one of the most important factors in delaying PhD progress. Offering a practical step-by-step plan, the book uses an associated planning system so the student can create a custom-made project schedule. Project Management for PhDs will benefit students and supervisors from all fields and any type of PhD program - not only for those in the classic four-year program, but also for those working part-time, either on their own time or combining the PhD with other commitments.

**Bonita Avenue** Peter Buwalda, 2015-01-13 Dazzling...Critics hailed Buwalda as 'The Dutch answer to Jonathan Franzen', but his brilliance is entirely unique.--The Times (UK) Siem Sigerius is a beloved, brilliant professor of mathematics with a promising future in politics. His family—including a loving wife, two

gorgeous, intelligent stepdaughters and a successful future son-in-law—and carefully appointed home in the bucolic countryside complete the portrait of a comfortable, morally upright household. But there are elements of Siem's past that threaten to upend the peace and stability that he has achieved, and when he stumbles upon a deception that's painfully close to home, things begin to fall apart. A cataclysmic explosion in a fireworks factory, the advent of internet pornography, and the reappearances of a discarded, dangerous son all play a terrible role in the spectacular fragmentation of the Sigerius clan. A riveting portrait of a family in crisis and the ways that even the smallest twists of fate can forever change our lives, *Bonita Avenue* is an incendiary, unpredictable debut of relationships torn asunder by lies, and minds destroyed by madness.

*Changing Cultures in Higher Education* Ulf-Daniel Ehlers, Dirk Schneckenberg, 2010-03-10 More and more educational scenarios and learning landscapes are developed using blogs, wikis, podcasts and e-portfolios. Web 2.0 tools give learners more control, by allowing them to easily create, share or reuse their

own learning materials, and these tools also enable social learning networks that bridge the border between formal and informal learning. However, practices of strategic innovation of universities, faculty development, assessment, evaluation and quality assurance have not fully accommodated these changes in technology and teaching. Ehlers and Schneckenberg present strategic approaches for innovation in universities. The contributions explore new models for developing and engaging faculty in technology-enhanced education, and they detail underlying reasons for why quality assessment and evaluation in new – and often informal – learning scenarios have to change. Their book is a practical guide for educators, aimed at answering these questions. It describes what E-learning 2.0 is, which basic elements of Web 2.0 it builds on, and how E-learning 2.0 differs from Learning 1.0. The book also details a number of quality methods and examples, such as self-assessment, peer-review, social recommendation, and peer-learning, using illustrative cases and giving practical recommendations. Overall, it offers a step-by-step guide for educators so that they can choose their own quality assurance or assessment methods, or develop their own evaluation methodology for specific learning scenarios. The book addresses everyone involved in higher education – university leaders, chief information officers, change and quality assurance managers, and faculty developers. Pedagogical advisers and consultants will find new insights and practices for the integration and management of novel learning technologies in higher education. The volume fosters in lecturers and teachers a sound understanding of the need and strategy for change, and it provides them with practical recommendations on competence and quality methodologies.

*Implementation and Application of Functional Languages*  
Clemens Grelck, Frank Huch, Greg Michaelson, Phil Trinder, 2005-05-24 The 16th International Workshop on Implementation and Application of Functional Languages (IFL 2004) was held in Lub<sup>o</sup> eck, Germany, September 8-10, 2004. It was jointly organized by the Institute of Computer Science and Applied Mathematics of the University of Kiel and the Institute of Software Technology and Programming Languages of the University of Lub<sup>o</sup> eck. IFL 2004 was the sixteenth event in the annual series of IFL workshops. The aim of the workshop series is to bring together researchers actively engaged in the implementation and application of functional and function-based programming languages. It provides an open forum for researchers who wish to present and discuss new ideas and concepts, work in progress, preliminary results, etc., related primarily, but not exclusively, to the implementation and application of functional languages. Topics of interest cover a wide range from theoretical aspects over language design and implementation towards applications and tool support. Previous IFL workshops were held in the United Kingdom (Southampton, Norwich, London, St Andrews, and Edinburgh), in the Netherlands (Nijmegen and Lochem), in Germany (Aachen and Bonn), in Sweden (B<sup>o</sup> astad and Sto- holm), and in Spain (Madrid). In 2005, the 17th International Workshop on - plementation and Application of Functional Languages will be held in Dublin, Ireland.

Who's Who in Plastics Polymers, First Edition James P.

Harrington, 2000-05-09 This is the first edition of a unique new plastics industry resource: Who's Who in Plastics & Polymers. It is the only biographical directory of its kind and includes contact, affiliation and background information on more than 3300 individuals who are active leaders in this industry and related organizations. This includes job title, full name of affiliation (e.g., business, university, association, research institute), business address, and electronic contacts-telephone, fax, e-mail and Web site. Home addresses and contacts are also provided for most of the entries. In the biographical summary section for each individual, the following information is provided: date and place of birth, education and educational achievements, work experience including company or other organization names, positions held and time periods. Also included in this section are the number of patents awarded, articles, and book chapters authored, and conference sessions chaired. Other information includes titles of books edited or written by the individual, listing of conferences where the person had a leadership position, and listing of memberships and positions held in professional organizations. Finally, professional and civic awards are listed. Indexes provide listings of individuals by company or other organization name, and also by geographical location. **Universities and Regional Economic Development** Paul

Benneworth, 2018-08-15 In a knowledge-based economy, universities are vital institutions. This volume explores the roles that universities can play in peripheral regions, contributing to processes of regional economic development and innovative

growth. Including a series of case studies drawn from Portugal, Norway, Finland, the Czech Republic, Estonia and the Dutch-German border region, this will be the first book to offer a comprehensive comparative overview of universities in European economically peripheral regions. These studies seek to explore the tensions that arise in peripheral regions where there may not be obvious matches between university activities and regional strengths. Aimed at academics, policy-makers and practitioners working on regional innovation strategies, this volume brings a much-needed sense of realism and ambition for all those concerned with building successful regional societies at the periphery of the knowledge economy.

**Battery Management Systems** H.J. Bergveld, W.S.

Kruijt, P.H.L. Notten, 2013-03-09 *Battery Management Systems - Design by Modelling* describes the design of Battery Management Systems (BMS) with the aid of simulation methods. The basic tasks of BMS are to ensure optimum use of the energy stored in the battery (pack) that powers a portable device and to prevent damage inflicted on the battery (pack). This becomes increasingly important due to the larger power consumption associated with added features to portable devices on the one hand and the demand for longer run times on the other hand. In addition to explaining the general principles of BMS tasks such as charging algorithms and State-of-Charge (SoC) indication methods, the book also covers real-life examples of BMS functionality of practical portable devices such as shavers and cellular phones. Simulations offer the advantage over measurements that less time is needed to gain knowledge of a battery's behaviour in interaction with other parts in a portable device under a wide variety of conditions. This knowledge can be used to improve the design of a BMS, even before a prototype of the portable device has been built. The battery is the central part of a BMS and good simulation models that can be used to improve the BMS design were previously unavailable. Therefore, a large part of the book is

devoted to the construction of simulation models for rechargeable batteries. With the aid of several illustrations it is shown that design improvements can indeed be realized with the presented battery models. Examples include an improved charging algorithm that was elaborated in simulations and verified in practice and a new SoC indication system that was developed showing promising results. The contents of Battery Management Systems - Design by Modelling is based on years of research performed at the Philips Research Laboratories. The combination of basic and detailed descriptions of battery behaviour both in chemical and electrical terms makes this book truly multidisciplinary. It can therefore be read both by people with an (electro)chemical and an electrical engineering background.

**Thinking Forth** Leo Brodie, 2004 Thinking Forth applies a philosophy of problem solving and programming style to the unique programming language Forth. Published first in 1984, it could be among the timeless classics of computer books, such as Fred Brooks' The Mythical Man-Month and Donald Knuth's The Art of Computer Programming. Many software engineering principles discussed here have been rediscovered in eXtreme Programming, including (re)factoring, modularity, bottom-up and incremental design. Here you'll find all of those and more, such as the value of analysis and design, described in Leo Brodie's down-to-earth, humorous style, with illustrations, code examples, practical real life applications, illustrative cartoons, and interviews with Forth's inventor, Charles H. Moore as well as other Forth thinkers.

**Communication in Turbulent Times** Marita Vos, 2017-01-12 This book is characterised by a broad approach towards corporate communication, emphasising change and crisis. The focus is not on crises as an exceptional situation but rather on broader volatility in the environment. The purpose of this book is to increase the understanding of multi-stakeholder communication concerning organisational issues and crises. From

the perspective of organisational management, this book clarifies how communication contributes to organisational resilience—the ability to adapt to a changing environment and mitigate emergency crises. In today's world, change is not the exception but a constant presence. Moreover, issues and risks occur that may grow to become crises. Coping with change and unexpected events, is what the concept of 'resilience' is about. Organisational resilience is the basis for the long-term viability of organisations in a turbulent environment. Communication, in various ways, is a bridging activity that supports the capacity of the organisation to function despite risks and disruptive incidents.

Renewable Energy and Landscape Quality Michael Roth, 2018

**Brain-Computer Interfaces** Desney S. Tan, Anton Nijholt, 2010-06-10  
For generations, humans have fantasized about the ability to create devices that can see into a person's mind and thoughts, or to communicate and interact with machines through thought alone. Such ideas have long captured the imagination of humankind in the form of ancient myths and modern science fiction stories. Recent advances in cognitive neuroscience and brain imaging technologies have started to turn these myths into a reality, and are providing us with the ability to interface directly with the human brain. This ability is made possible through the use of sensors that monitor physical processes within the brain which correspond with certain forms of thought. *Brain-Computer Interfaces: Applying our Minds to Human-Computer Interaction* broadly surveys research in the Brain-Computer Interface domain. More specifically, each chapter articulates some of the challenges and opportunities for using

brain sensing in Human-Computer Interaction work, as well as applying Human-Computer Interaction solutions to brain sensing work. For researchers with little or no expertise in neuroscience or brain sensing, the book provides background information to equip them to not only appreciate the state-of-the-art, but also ideally to engage in novel research. For expert Brain-Computer Interface researchers, the book introduces ideas that can help in the quest to interpret intentional brain control and develop the ultimate input device. It challenges researchers to further explore passive brain sensing to evaluate interfaces and feed into adaptive computing systems. Most importantly, the book will connect multiple communities allowing research to leverage their work and expertise and blaze into the future.
