Good Economics for Hard Times Abhijit V.

Banerjee,Esther Duflo,2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard

Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

Tour Tempo John Novosel, John Garrity, 2004-04-27 What swing secret is shared by nearly all golf greats – from Ben Hogan to Tiger Woods? John Novosel's revolutionary breakthrough has cracked the "genetic code" of the golf swing – Tour Tempo. Tiger Woods...Greg Norman...Ben Hogan. What secret do these and nearly all golf legends share? Identical swing tempo. John Novosel has cracked the "genetic code" of the golf swing – and has derived a simple and effective system to teach it to golfers of all levels, from tour players to weekend warriors. This book includes a revolutionary instructional CD, featuring videos that illustrate exactly how to learn the tempo secrets of the tour pros, and a calibrated soundtrack that you can use while practicing at a driving range or in your living room. As an avid golfer and inventor, John Novosel studied film footage of the PGA greats, searching, along with countless others over the last century, for the key to what made certain golfers' swings so effortless and powerful. Novosel made a startling discovery. Nearly every champion demonstrated identical time proportion in his or her swing, a common ratio between takeaway and downswing. Regardless of style or form, the winning tempo was always the same – Tour Tempo. In this breakthrough book, Novosel and Sports Illustrated senior writer John Garrity explain exactly how to achieve Tour Tempo. Through clear, step-by-step instruction, golfers are taught how to master two basic drills to synchronize their swings. Novosel's technique has yielded rapid and tremendous improvement for players of every level –adding distance, automatically correcting

typical swing problems, and noticeably shaving strokes off one's game. TOUR TEMPO is a remarkable breakthrough – truly golf's last secret finally revealed.

The Secrets of Story Matt Bird, 2016-11-01 You've just boarded a plane. You've loaded your phone with your favorite podcasts, but before you can pop in your earbuds, disaster strikes: The guy in the next seat starts telling you all about something crazy that happened to him--in great detail. This is the unwelcome storyteller, trying to convince a reluctant audience to care about his story. We all hate that guy, right? But when you tell a story (any kind of story: a novel, a memoir, a screenplay, a stage play, a comic, or even a cover letter), you become the unwelcome storyteller. So how can you write a story that audiences will embrace? The answer is simple: Remember what it feels like to be that jaded audience. Tell the story that would win you over, even if you didn't want to hear it. The Secrets of Story provides comprehensive, audience-focused strategies for becoming a master storyteller. Armed with the Ultimate Story Checklist, you can improve every aspect of your fiction writing with incisive questions like these:

- **Concept:** Is the one-sentence description of your story uniquely appealing?
- **Character:** Can your audience identify with your hero?
- **Structure and Plot:** Is your story ruled by human nature?
- **Scene Work:** Does each scene advance the plot and reveal character through emotional reactions?
- **Dialogue:** Is your characters' dialogue infused with distinct personality traits and speech patterns based on their lives and backgrounds?
- **Tone:** Are you subtly setting, resetting, and upsetting expectations?
- **Theme:** Are you using multiple ironies throughout the story to create meaning?

To succeed in the world of fiction and film, you have to work on every aspect of your craft and satisfy your audience. Do

both--and so much more--with The Secrets of Story.

Range David Epstein, 2021-04-27 The #1 New York Times bestseller that has all America talking—with a new afterword on expanding your range—as seen on CNN's Fareed Zakaria GPS, Morning Joe, CBS This Morning, and more. “The most important business—and parenting—book of the year.” —Forbes “Urgent and important. . . an essential read for bosses, parents, coaches, and anyone who cares about improving performance.” —Daniel H. Pink Shortlisted for the Financial Times/McKinsey Business Book of the Year Award Plenty of experts argue that anyone who wants to develop a skill, play an instrument, or lead their field should start early, focus intensely, and rack up as many hours of deliberate practice as possible. If you dabble or delay, you’ll never catch up to the people who got a head

start. But a closer look at research on the world's top performers, from professional athletes to Nobel laureates, shows that early specialization is the exception, not the rule. David Epstein examined the world's most successful athletes, artists, musicians, inventors, forecasters and scientists. He discovered that in most fields—especially those that are complex and unpredictable—generalists, not specialists, are primed to excel. Generalists often find their path late, and they juggle many interests rather than focusing on one. They're also more creative, more agile, and able to make connections their more specialized peers can't see. Provocative, rigorous, and engrossing, *Range* makes a compelling case for actively cultivating inefficiency. Failing a test is the best way to learn. Frequent quitters end up with the most fulfilling careers. The most impactful inventors cross domains rather than deepening their knowledge in a single area. As experts silo themselves further while computers master more of the skills once reserved for highly focused humans, people who think broadly and embrace diverse experiences and perspectives will increasingly thrive.
