*Vancouverism* Larry Beasley,2019-05-15 Until the 1980s, Vancouver was a typical mid-sized North American city. But after the city hosted Expo 86, something extraordinary happened. This otherwise unremarkable urban centre was transformed into an inspiring world-class city celebrated for its livability, sustainability, and competitiveness. This book tells the story of the urban planning phenomenon called “Vancouverism” and the philosophy and practice behind it. Writing from an insider’s perspective, Larry Beasley, a former chief planner of Vancouver, traces the principles that inspired Vancouverism and the policy framework developed to implement it. A prologue, written by Frances Bula, outlines the political and urban history of Vancouver up until the 1980s. The text is also beautifully illustrated by the author with 200 colour photographs depicting not only the city’s vibrancy but also the principles of Vancouverism in action.

**SkyTrain Explorer** John Atkin,2005 Lydia McKenzie is an artist whose medium is the

camera. She's having her first one-woman show. It is a series that ties to actual murders committed in the city's past. Her method is to find a model—someone who can match in a general way the actual female victim—and pose her in the clothes and position in which the actual victim was found. The night of her showing, however, is disappointing; the owner of the gallery makes her pay for the invitations down to the stamps, hang the whole show herself, and rush for the usual wine and snacks. But what happens next is much worse: two plainclothes policemen shut down the event and take Lydia in for questioning. A young woman whom she knew well, and who was the model in one of her photographs, has been murdered. Worried that the police aren't doing what they should, Lydia and another friend set out to find the killer. The winner of the celebrated St. Martin's Minotaur/Malice Domestic Best First Traditional Mystery Novel Competition, *Posed for Murder* presents a snapshot of crime in a lasting and memorable story.

*Trains, Buses, People* Christof Spieler, 2018-10-23 What are the best transit cities in the US? The best Bus Rapid Transit lines? The most useless rail transit lines? The missed opportunities? In the US, the 25 largest metropolitan areas and many smaller cities have fixed guideway transit—rail or bus rapid transit. Nearly all of them are talking about expanding. Yet discussions about transit are still remarkably unsophisticated. To build good transit, the discussion needs to focus on what matters—quality of service (not the technology that delivers it), all kinds of transit riders, the role of buildings, streets and sidewalks, and, above all, getting transit in the right places. Christof Spieler has spent over a decade advocating for transit as a writer, community leader, urban planner, transit board

member, and enthusiast. He strongly believes that just about anyone—regardless of training or experience—can identify what makes good transit with the right information. In the fun and accessible *Trains, Buses, People: An Opinionated Atlas of US Transit*, Spieler shows how cities can build successful transit. He profiles the 47 metropolitan areas in the US that have rail transit or BRT, using data, photos, and maps for easy comparison. The best and worst systems are ranked and Spieler offers analysis of how geography, politics, and history complicate transit planning. He shows how the unique circumstances of every city have resulted in very different transit systems. Using appealing visuals, *Trains, Buses, People* is intended for non-experts—it will help any citizen, professional, or policymaker with a vested interest evaluate a transit proposal and understand what makes transit effective. While the book is built on data, it has a strong point of view. Spieler takes an honest look at what makes good and bad transit and is not afraid to look at what went wrong. He explains broad concepts, but recognizes all of the technical, geographical, and political difficulties of building transit in the real world. In the end, *Trains, Buses, People* shows that it is possible with the right tools to build good transit.

**Straphanger** Taras Grescoe, 2012-04-24 Taras Grescoe rides the rails all over the world and makes an elegant and impassioned case for the imminent end of car culture and the coming transportation revolution I am proud to call myself a straphanger, writes Taras Grescoe. The perception of public transportation in America is often unflattering—a squalid last resort for those with one too many drunk-driving charges, too poor to afford insurance, or too decrepit to get behind the wheel of a car. Indeed, a century of auto-centric culture and city planning has left most of the country with public transportation that is

underfunded, ill maintained, and ill conceived. But as the demand for petroleum is fast outpacing the world's supply, a revolution in transportation is under way. Grescoe explores the ascendance of the straphangers—the growing number of people who rely on public transportation to go about the business of their daily lives. On a journey that takes him around the world—from New York to Moscow, Paris, Copenhagen, Tokyo, Bogotá, Phoenix, Portland, Vancouver, and Philadelphia—Grescoe profiles public transportation here and abroad, highlighting the people and ideas that may help undo the damage that car-centric planning has done to our cities and create convenient, affordable, and sustainable urban transportation—and better city living—for all.

**Transit Crime and Sexual Violence in Cities** Vania Ceccato, Anastasia Loukaitou-Sideris, 2020-05-17 How cities are planned and designed has a major impact on individuals' mobility and safety. If individuals feel unsafe in public transportation or on the way to it, they may avoid certain routes or particular times of the day. This is problematic, since research has also found that, in some cities, especially those in the Global South, a large percentage of women are transit captives. Namely, they have relatively less access to non-public forms of transportation and are, therefore, especially reliant on public transport. This issue is important not only because it affects people's safety but also because it influences the long-term sustainability of a city. In a sustainable city, safety guarantees the ability to move freely for everyone and provides a wider sense of place attachment. *Transit Crime and Sexual Violence in Cities* examines the evidence of victimization in transit environments in countries around the world, exploring individuals' feelings of perceived safety or lack thereof and the necessary improvements that can make transit safer and,

hence, cities more sustainable. The book's contributions are grounded in theories at the crossroads of several disciplines such as environmental criminology, architecture and design, urban planning, geography, psychology, gender and LGBTQI studies, transportation, and law enforcement. International case studies include Los Angeles, Vancouver, Stockholm, London, Paris, São Paulo, Mexico City, Bogotá, Tokyo, Guangzhou, Melbourne, and Lagos, among others.

**Integrating Passenger Ferry Service with Mass Transit** Timothy D. Payne, 2013 The purpose of this synthesis was to document the state of the practice of integration between land- and water-based transit systems and to explore successful aspects of seamless integration. The report assembles and presents information in numerous locations around the United States, supplemented with examples from Canada, Australia, and Bermuda. To accomplish this effort a literature review was undertaken that received limited

results. However, a selected survey of 46 respondents out of 57 transit and ferry agencies, as well as agencies and companies in Canada, Australia, and the United Kingdom, including Bermuda, received an 80% response rate. The respondents represent a geographically representative sample--varying in size and age of system, degree of coordination between ferry and transit, and type of community served. The synthesis summarizes findings from 60 different ferry-to-land-based transit interfaces. Case examples of key factors of land- and water-based integration are offered for Long Wharf in Boston, Massachusetts; TransLink's SeaBus in Vancouver, British Columbia; New York Waterway's Hoboken Terminal; and Washington State Ferries and Kitsap Transit in Bremerton, Washington. Tim Payne, Danielle Rose, and Hazel Scher, Nelson\Nygaard Consulting Associates, Inc., Seattle, Washington, collected and synthesized the information and wrote the report, under the guidance of a panel of experts in the subject area. The members of the topic panel are acknowledged on the preceding page. This synthesis is an immediately useful document that records the practices that were acceptable within the limitations of the knowledge available at the time of its preparation. As progress in research and practice continues, new knowledge will be added to that now at hand--Preface.

**Governing Metropolitan Regions in the 21st Century** Donald Phares, 2015-01-28

While government provides the structure of public leadership, governance is the art of public leadership. This timely book examines current trends in metropolitan governance issues. It analyzes specific cases from thirteen major metropolitan regions in the United States, Canada, and Mexico, all woven together by an overall framework established in the first three chapters. The distinguished contributors address such governance issues as city-county consolidation, local-federal coordination, annexation and special districting, and private contracting, with special attention to lessons learned from both successes and

failures. As urban governance innovations have clearly outpaced urban government structures in recent years, the topics covered here are especially relevant.

Governing Cities Through Regions Roger Keil, Pierre Hamel, Julie-Anne Boudreau, Stefan Kipfer, 2016-12-12 The region is back in town. Galloping urbanization has pushed beyond historical notions of metropolitanism. City-regions have experienced, in Edward Soja's terms, "an epochal shift in the nature of the city and the urbanization process, marking the beginning of the end of the modern metropolis as we knew it." *Governing Cities Through Regions* broadens and deepens our understanding of metropolitan governance through an innovative comparative project that engages with Anglo-American, French, and German literatures on the subject of regional governance. It expands the comparative angle from issues of economic competitiveness and social cohesion to topical and relevant fields such as housing and transportation, and it expands comparative work on municipal governance to the regional scale. With contributions from established and emerging international scholars of urban and regional governance, the volume covers conceptual topics and case studies that contrast the experience of a range of Canadian metropolitan regions with a strong selection of European regions. It starts from assumptions of limited conversion among regions across the Atlantic but is keenly aware of the remarkable differences in urban regions' path dependencies in which the larger processes of globalization and neo-liberalization are situated and materialized.
