Vehicle Excise Duty as Environmental Tax Great Britain. Parliament. House of Commons. Environmental Audit Committee, 2008-08-04 This year's budget made some significant changes to annual road tax (vehicle excise duty or VED). The main changes included: introduction of six new VED bands from 2009-10, bringing the total number of bands to 13; applying this new regime of 13 bands to existing cars on the road first registered on or after 1 March 2001; and introduction of a new rate of VED for new cars in the first year in which they are bought. The Environmental Audit Committee's aims in this report were to examine the projected environmental impacts of these changes, to review how fair these changes are, and to make recommendations to the Treasury as to how it should proceed. The Committee felt that there was nothing intrinsically wrong in the rebanding of cars registered since 2001 but that there was a lack of data about the financial impacts of these changes on lower-income groups. The new-first year rates were welcomed. However concerns remain that the differentials between VED bands are still not large enough to drive market transformation. The Treasury should have taken much greater care to explain the changes in VED in the Budget. If the point of green taxes is to change behaviour, they need to be properly publicised. In general, the Treasury needs to develop a proper communications strategy

**Transport Lessons from the Fuel Tax Protests of 2000** Kiron Chatterjee, 2017-07-05 The UK fuel tax protests of

September 2000 generated considerable debate about fuel prices and taxation and put transport in the media spotlight. Away from the immediate events and debates surrounding the protests, the experience offered the opportunity for longer-term lessons on transport to be gained. The editors of this volume, Glenn Lyons and Kiron Chatterjee, saw the opportunity to get fresh insight into car dependence and conducted a large-scale travel behaviour survey to find out how car users coped when restricted in being able to buy petrol. This book presents their findings and collects together articles written by other researchers on a range of topics including fuel taxation, transport pricing, policy acceptability, travel behaviour and goods distribution.
