The Velox Book ,2015-08-05 Excerpt from The Velox Book: The Working of a Simple Paper Told in Simple Terms Velox is the original gas-light or the developing-out paper. Up to time Velox was introduced (1889) the amateur photographer was practically dependent on daylight and the more or less slow printing-out papers, and on dark, cloudy days printing had to be entirely suspended. When Velox was first introduced most photographers were skeptical as to results and could comprehend neither the economic nor the artistic possibilities of the new product. A careful trial proved its value and soon Velox was almost universally used whenever the saving of time was important. To the amateur Velox was especially welcome, as its speed afforded ample time for making prints and its various surfaces gave opportunity to produce artistic results previously impossible. The fact that prints could be made at any time of day or night, by any light, quickly popularized this product among the users of photographic papers. Velox is suitable for every class of work as is fully demonstrated under the heading of Grades and Degrees of Contrast.
