Surveillance Futures Emmeline Taylor, Tonya Rooney, 2016-08-05 From birth to adulthood, children now find themselves navigating a network of surveillance devices that attempt to identify, quantify, sort and track their thoughts, movements and actions. This book is the first collection to focus exclusively on technological surveillance and young people. Organised around three key spheres of children's day-to-day life: schooling, the self and social lives, this book chronicles the increasing surveillance that children, of all ages, are subject to. Numerous surveillance apparatus and tools are examined, including, but not limited to: mobile phones, surveillance cameras, online monitoring, GPS and RFID tracking and big data analytics. In addition to chronicling the steady rise of such surveillance practices, the chapters in this volume identify and problematise the consequences of technological surveillance from a range of multidisciplinary perspectives. Bringing together leading scholars working across diverse fields – including sociology, education, health, criminology, anthropology, philosophy, media and information technology – the collection highlights the significant socio-political and ethical implications of technological surveillance throughout childhood and youth.

Mobile Communication James E. Katz, 2017-07-28 In the few short decades since their commercial deployment, 5 billion people—about three-quarters

of all humanity, including children—have become mobile phone users. No technology has even approached the mobile phone's wildfire success. Effects of this success are apparent everywhere, ranging from accident scenes and earthquake rescue efforts to demeanor in the classroom and at dinner tables. No one interested in the next generation of issues provoked by the mobile communication revolution will want to miss this important new collection of essays. The mobile phone has given near-transcendent power to ordinary people. All aspects of social life have been touched by mobile technology. An ever-growing host of tracking, immersion, gaming, and commercial applications are becoming available. The community of mobile communication scholars has blossomed from a handful of pioneers a decade ago to a large and dynamic intellectual community that spans the globe. Area researchers have gained much insight into cultural, symbolic, and social interaction aspects of mobile communication as well as its relevance to commerce. To address the social policy dimension of the mobile communication revolution, this volume presents analyses by leading thinkers in the field. The volume offers novel and keen insights into the topic. Subjects include the role of mobiles in policy formation and evaluation in several areas including the mobile-digital divide and political campaigns. Also explored are processes and policy implications of mobiles in creating or alleviating social problems including social isolation and family dispersion. Other chapters analyze social policies for mobile devices, including attempts to regulate the use of

the technology and to understand and moderate its potential harm to human health. The contributors' scope ranges across five continents and they address concerns at local, national, and international levels.

Mobile Social Networking and Computing Yufeng Wang, Jianhua Ma, 2014-09-05 Recent advancements in mobile device technologies are revolutionizing how we socialize, interact, and connect. By connecting the virtual community with the local environment, mobile social networks (MSNs) create the opportunity for a multitude of new personalized services for mobile users. Along with that comes the need for new paradigms, mechanism

Everyday Surveillance William G. Staples, 2013-10-18 When we think of surveillance in our society, we usually imagine “Big Brother” scenarios with the government tracking our every move. The actual surveillance of our everyday lives is much more subtle, however, and may be more insidious. William G. Staples shows how our lives are tracked by both public and private organizations—sometimes with our consent, and sometimes without—through our internet use, cell phones, public video cameras, credit cards, license plates, shopping habits, and more. Everyday Surveillance is a provocative exploration of the myriad ways we are watched each day, and how this surveillance shapes our lives. Thoroughly revised, the second edition considers new topics, such as the rise of social media, and updates research throughout. Everyday Surveillance introduces students to concepts of social control and incites classroom discussion about how

surveillance impacts the ways we understand people and our lives at home, work, school, or in the community.

Adamson, 2013-01-08 Explains how top brands have maintained a competitive edge, how rapid Internet-based networks are challenging the control of brand reputation, and how companies can safeguard marketing messages for maximum clarity, focus, and profit.

Electronic Devices Sylvia Engdahl, 2012-06-01 Editor Sylvia Engdahl has completed no small task in compiling a collection of essays that tackle an array of issues relating to electronic devices and teen rights. The use of electronic devices in the home, school, and life is prolific to a distracting degree. Issues covered here include whether or not wireless devices improve teen lives; the impact of excessive video gaming; the use of cell phones in school; dangers related to texting; tracking teens via parental G.P.S. devices; and digital music piracy.

Fear: Critical Geopolitics and Everyday Life Susan J. Smith, 2016-04-22 'Fear' in the twenty-first century has greater currency in western societies than ever before. Through scares ranging from cot death, juvenile crime, internet porn,

asylum seekers, dirty bombs and avian flu, we are bombarded with messages about emerging risks. This book takes stock of a range of issues of 'fear' and presents new theoretical arguments and research findings that cover topics as diverse as the war on terror, the immigration crisis, stranger danger, global disease epidemics and sectarian violence. This book charts the association of fear discourses with particular spaces, times, social identities and sets of geopolitical relations. It examines the ways in which fear may be manufactured and manipulated for political purposes, sometimes becoming a tool of repression, and relates fear to political, economic and social marginalization at different scales. Furthermore, it highlights the importance and sometimes unpredictability of everyday lived experiences of fear - the many ways in which people recognize, make sense of and manage fear; the extent of resistance to fear; the relation of fear and hope in everyday life; and the role of emotions in galvanizing political and social action and change.

Facebook Nation Newton Lee, 2012-09-15 President Barack Obama, in his 2011 State of the Union Address, called America the nation of Edison and the Wright brothers and of Google and Facebook. U.S. Chief Information Officer, Steven VanRoekel, said that America has become a Facebook nation that demands increased transparency and interactivity from the federal government. Facebook as a nation in 2012 would be the third largest country in the world with over 900 million citizens, after China and India. This book portrays the social media ecosystem as a world of increasing Total Information Awareness, which is essentially a civilian version of the controversial Total Information Awareness program unveiled in 2002 by the Defense Advanced Research Projects Agency (DARPA) at the U.S. Department of Defense. Back in the 60's, DARPA initiated and funded the research and development of Advanced Research Projects Agency Network (ARPANET) that went online in 1969. The success of ARPANET gave rise to the global commercial Internet in the 90's and the new generation of Fortune 500 companies today including Amazon.com, Google, eBay, and Yahoo!. As if life comes full circle in the 21st century, private businesses and the ubiquity of social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies and infrastructures necessary for the DARPA-proposed Total Information Awareness program. WikiLeaks founder Julian Assange called Facebook the most appalling spying machine that has ever

been invented. Indeed, military and civilian technologies have interwoven into every fabric of our society, as Facebook co-founder and CEO Mark Zuckerberg said, We exist at the intersection of technology and social issues. This book offers discourse and practical advice on the privacy issue in the age of big data, the rise of Facebook nation, and Total Information Awareness. Opening with President Ronald Reagan's 1984 National Security Decision Directive and ending with George Orwell's novel 1984, the author takes us on a roller-coaster ride through Facebook's botched IPO, Carrier IQ, Kony 2012, SOPA/PIPA blackout, cyber bullying, crime fighting, and a host of other timely issues facing our Facebook nation. Social media strategists, information architects, social scientists, policymakers, and academic scholars in the Program in Science, Technology, and Society (STS) will find this book a valuable asset.

Edited Clean Version Raiford Guins, 2008-12-31
According to Guins, these new control technologies are designed to embody an ethos of neoliberal governance - through the very media that have been previously presumed to warrant management, legislation, and policing. Repositioned within a discourse of empowerment, security, and choice, the action of regulation, he reveals, has been relocated into the hands of users.--BOOK JACKET.

Big Brother Mark Dice,2011-01 In **Big Brother: The Orwellian Nightmare Come True**, Mark Dice details actual NSA high-tech spy systems, mind-reading machines, secret government projects, and emerging artificial intelligence programs that seem as if they came right out of George Orwell's novel *Nineteen Eighty-Four*. Orwell's famous book was first published in 1949, and tells the story of a nightmarish future where citizens have lost all privacy and are continuously monitored by the omniscient Big Brother surveillance system which keeps them obedient to a totalitarian government. The novel is eerily prophetic as many of the fictional systems of surveillance described have now become a reality. Mark Dice shows you the scary documentation that Big Brother is watching you, and is more powerful than you could imagine.
