Digital Entertainment Superguide , Audio and video content is all around us. And these days much of it comes not from TV cables, satellite dishes, and radio antennas, but from our digital devices around the house, streaming over the Internet and local networks. And that's why we created the Digital Entertainment Superguide, a primer with everything you need to know to get started. This book walks you through how to set up your home network and choose the right hardware—set-top boxes, smart TVs, media center computers, streaming speakers, remote controls, and more—for your needs. Like to watch TV shows and movies but not sure where to find what? We've got you covered with a guide to streaming video sources for your TV or mobile devices. We don't leave music lovers out either, as we help you choose the best streaming audio service. Do you want Mog, Rdio, Rhapsody, Slacker, or Spotify? How much does each service cost? Which sounds best? We answer all those questions and more in the pages that follow. Finally, if you're wondering how to move audio and video around the house—stream music wirelessly from an iPhone to an AirPlay speaker in the living room or send video from a computer to your beautiful wall-mounted HDTV—you've come to the right place. We'll even show you how to use your smartphone or tablet to control it all. So read on, and let the fun begin!

We base this off our extensive real world experience of navigating the varying options and frustrations as full time RVers since 2006.The book covers cellular, WiFi, satellite, HAM, cable/DSL, boosting, hints & tricks, managing bandwidth and most importantly - setting your expectations for what life on the road with mobile internet is like. Information you need to know to help understand your options and build your own arsenal to suit your needs.This handbook is geared specifically towards US based internet options, and does not specifically cover international travel. And more precisely, it is geared towards frequent or full-time RVers and road warriors, although frequent US travelers will probably find plenty of useful information too. Our aim with the book is not to provide a shopping list of gear to go purchase, but rather give you enough information to build your own unique mobile internet arsenal. While we do cover specific products, we do not have financial interest in any of the devices, services or products mentioned. We are frequently referred to as 'tech-Switzerland', and simply share our opinions and experiences. This book is written to help those with minimal tech backgrounds to geeks like us; and for folks who just need a little e-mail & surfing, to fellow bandwidth junkies.Chris and Cherie each have decades of combined technology experience. Chris has worked in the mobile technology industry for over a decade and holds degrees in computer engineering and science. Cherie has been a location independent software developer since the mid-90s. And together we have been on the road working remotely full time since 2006. Our home on wheels is a living laboratory for mobile technology, and we are delighted to share our experience with you.
