Verizon Untethered Ivan Seidenberg,2018-05-01 The Verizon leadership team stands apart from most leadership teams today in their willingness repeatedly to put the enterprise before the individual. At first blush, this might look like a hopelessly old-fashioned notion in the age of the selfie. Yet, I would argue this is a trait that future leaders and boards of directors across industries would do well to understand and embrace. Seidenberg not once but twice in the service of company shareholders and employees subordinated himself and put off taking sole leadership of the company to advance the enterprise's odds of success. And many others in this story exhibited the same trait to help build this industry-leading enterprise. They understood that the risk of not acting and thereby destroying value during a period of accelerating technological change and industry consolidation—a situation faced by leadership teams around the world today—was much greater than the risk of stepping in as No. 2 or co-CEO. In my 50 years of experience, it is a rare leadership team that will subordinate itself for the benefit of the industry, customers and the company. That principle, that the company comes first, the individual second, is what will define successful leadership teams of the future. Multiple leadership principles, some new, some timeless, emerge from this narrative and will be of great use to the next generation of leaders across industries and around the world. By taking a look at a company that successfully executed exponential transformation, we can take the strategies of Verizon leaders and apply them to our own experiences.—Ram Charan

How I Invest My Money Brian Portnoy,Joshua Brown,2020-11-17 The world of investing normally sees experts telling us the 'right' way to manage our money. How often do these experts pull back the curtain and tell us how they invest their own money? Never. *How I Invest My Money* changes that. In this unprecedented collection, 25 financial experts share how they navigate markets with their own capital. In this honest rendering of how they invest, save, spend, give, and borrow, this group of portfolio managers, financial advisors, venture capitalists and other experts detail the 'how' and the 'why' of their investments. They share stories about their childhood, their families, the struggles they face and the aspirations they hold. Sometimes raw, always revealing, these stories detail the indelible relationship between our money and our values. Taken as a whole, these essays powerfully demonstrate that there is no single 'right' way to save, spend, and invest. We see a kaleidoscope of perspectives on stocks, bonds, real assets, funds, charity, and other means of achieving the life one desires. With engaging illustrations throughout by Carl Richards, *How I Invest My Money* inspires readers to think creatively about their financial decisions and how money figures in the broader quest for a contented life. With contributions from: Morgan Housel, Christine Benz, Brian Portnoy, Joshua Brown, Bob Seawright, Carolyn McClanahan, Tyrone Ross, Dasarte Yarnway, Nina O'Neal, Debbie Freeman, Shirl Penney, Ted Seides, Ashby Daniels, Blair duQuesnay, Leighann Miko, Perth Tolle, Josh Rogers, Jenny Harrington, Mike Underhill, Dan Egan, Howard Lindzon, Ryan Krueger, Lazetta Rainey Braxton, Rita Cheng, Alex Chalekian

The Chinese Information War Dennis F. Poindexter,2018-06-07 China's information war against the United States is clever technically, broadly applied and successful. The intelligence community in the U.S. has publicly stated this is a kind of war we do not know how to fight--yet it is the U.S. military that developed and expanded the doctrine of information war. In fact, the U.S. military is at a disadvantage because it is part of a democratic, decentralized system of government that separates the state from commercial business. China's political systems are more easily adapted to this form of warfare, as their recent land seizures in the South China Sea demonstrate. We call this annexation, when it is a new form of conquest.

The Intention Economy Doc Searls,2012-04-10 Caveat venditor—let the seller beware While marketers look for more ways to get personal with customers, including new tricks with “big data,” customers are about to get personal in their own ways, with their own tools. Soon consumers will be able to: • Control the flow and use of personal data • Build their own loyalty programs • Dictate their own terms of service • Tell whole markets what they want, how they want it, where and when they should be able to get it, and how much it should cost And they will do all of this outside of any one vendor's silo. This new landscape we're entering is what Doc Searls calls *The Intention Economy*—one in which demand will drive supply far more directly, efficiently, and compellingly than ever before. In this book he describes an economy driven by consumer intent, where vendors must respond to the actual intentions of customers instead of vying for the attention of many. New customer tools will provide the engine, with VRM (Vendor Relationship Management) providing the consumer counterpart to vendors' CRM (Customer Relationship Management) systems. For example, imagine being able to change your address once for every company you deal with, or combining services from multiple companies in real time, in your own ways—all while keeping an auditable accounting of every one of your interactions in the marketplace. These tantalizing possibilities and many others are introduced in this book. As customers become more independent and powerful, and the Intention Economy emerges, only vendors and organizations that are ready for the change will survive, and thrive. Where do you stand?

Angel from Hell Warren W. Pratt,2010-02-22 In a relationship between a couple, things are not always affectionate and tender. Even some of the sweetest beginnings end up in heartbreaks—even in violence. Author Warren W. Pratt opens readers' eyes to some of life's cruel realities as he pens an emotion-stirring novel, *Angel from Hell*, released through Xlibris. This fictional tale follows a man's journey and the woman in his life. Already with two failed marriages, he decides to concentrate on his work. However, when his company sends him to Mongolia, he unexpectedly finds the woman he finally wants to spend the rest of his life with—or so he thinks. The first weeks seemed perfect for them, as love overflowed every single minute. Months passed, the woman got pregnant, and they decided to marry. After their marriage however, the woman changed. She became impatient, irritable, disrespectful, and violent towards her husband. She would throw things at him and manipulate her children to go against their father. Wounding yet based on true life experiences, *Angel from Hell* sends a dose of reality to readers. It is a wakeup call for readers, young adults and adults, to be careful in choosing their partners in life. For more information on this book, log on to www.Xlibris.com.

Bricklin on Technology Dan Bricklin, 2009-04-15 In a world that divides us, technology creates connection. Cell phones, e-mail, digital cameras, personal Web sites—they all join us, however tenuously, to what we value. Is connectivity what we're willing to pay for? Should technology be our servant or a tool that helps us do other things? What can we really learn from Napster? What would intelligent standards for touch-screen user interface look like? How does technology evolve, and what drives that evolution? For Dan Bricklin, technology cannot exist independently of the lives and needs of those who use it. For more than a decade he has shared his thoughts on this essential interdependence in blogs, podcasts, and essays. This volume compiles those observations, putting together case histories and new reflections for a fascinating study of how people and technology affect one another. Whether you're a software developer or a student of human nature, you'll find yourself drawn into this most intriguing discourse—because you are its subject.

Tech Panic Robby Soave, 2024-04-02 From award-winning journalist and author of the “methodical, earnest, and insightful” (The Guardian) *Panic Attack*, an examination of recent kneejerk calls to regulate Big Tech from both sides of the aisle. Not so long ago, we embraced social media as a life-changing opportunity to connect with friends and family all across the globe. Today, the pendulum of public opinion is swinging in the opposite direction as Facebook, Twitter, Google, YouTube, Instagram, TikTok, and similar sites are being accused of corrupting our democracy, spreading disinformation, and fanning the flames of hatred. We once marveled at the revolutionary convenience of ordering items online and having them show up on our doorsteps overnight. Now we fret about Amazon outsourcing our jobs overseas or building robots to do them for us. With insightful analysis and in-depth research, Robby Soave offers “a refreshing dose of sanity and common sense about big tech” (David French, author of *Divided We Fall*) and explores some of the biggest issues animating both the right and the left: bias, censorship, disinformation, privacy, screen addiction, crime, and more. Far from polemical, *Tech Panic* is grounded in interviews with insiders at companies like Facebook and Twitter, as well as expert analysis by both tech boosters and skeptics—from Mark Zuckerberg to Josh Hawley. You will learn not just about the consequences of Big Tech, but also the consequences of altering the ecosystem that allowed tech to get big. Offering a fresh and crucial perspective on one of the biggest influences of the 21st century, Soave seeks to stand athwart history and yell, Wait, are we sure we really want to do this?

The Book of Broken Promises Bruce Kushnick, 2015-02-20 *Broken Promises* is the third book in a trilogy spanning 18 years. Bruce Kushnick, author, senior telecom analyst and industry insider, lays out, in all of the gory details, how America paid over \$400 billion to be the first fully fiber optic-based nation yet ended up 27th in the world for high-speed Internet (40th in upload speeds). But this is only a part of this story. With over four million people filing with the FCC to 'Free the Net', one thing is abundantly clear -- customers know something is terribly wrong. Every time you pay your bills you notice that the price of your services keeps going up, you don't have a serious choice for Internet (ISP), broadband or cable service, much less competitors fighting for your business, or maybe you can't even get very fast broadband service. Worse, over the last few years, America's ISPs and cable companies have been rated the most hated companies in America. While Net Neutrality concerns (detailed in *Broken Promises*) are important, the actions are only a first step and will most likely be tied up in court for the next few years. More importantly, it does not resolve most of the customer issues and there is nothing else on the horizon that will fix what's broken. *Broken Promises* documents the massive overcharging and failure to properly upgrade the networks, the deceptive billing practices, the harms caused from a lack of competition, the gaming and manipulating of the regulatory system, from the states to the FCC, and exposes the companies' primary strategy: How much can we get away with? There has been little, if any, regard for the customers they serve.--From <http://newnetworks.com/bookbrokenpromises/> --(viewed on June 12, 2015).
