Engaging the Public to Fight the Consequences of Terrorism and Disasters I. Apostol, J. Mamasakhlisi, D. Subotta, 2015-05-07

Governments must work tirelessly to update their preparedness for dealing with natural and man-made disasters, as well as taking account of the increasingly present threat of terrorism. Efficient international cooperation is key to achieving safety and internationalizing security policy. This book presents the proceedings of the NATO Advanced Research Workshop (ARW) Engaging the Public to Fight the Consequences of Terrorism and Disasters, held in Tbilisi, Georgia, in June 2014. The purpose of the workshop was to analyze accumulated European theoretical knowledge and practical experience in the field of disaster prevention and the involvement of the public in preventing and fighting the consequences of terrorism, as well as natural and man-made disasters. There was a particular focus on the perspective of the region, especially with a view to meeting European Union standards and setting uniform and independent standards for

hazard and risk assessment methods. The protection of economically critical infrastructure, such as dams, pipelines and transport and storage facilities, was addressed as were the issues of managing water and non-renewable resources, the disposal of dangerous chemicals and radioactive waste, and defensible methods of transport for fuel supplies and key personnel.

Contributions reflected the extensive experience of the participating NATO and partner countries, including Armenia, Austria, Bulgaria, Georgia, Germany, Italy, Moldova, the Netherlands, Romania, Turkey and Ukraine as well as international organizations such as UNECE and NATO.

## *Emergency Remote Teaching and Beyond* Julian

Chen,2022-02-01 This timely volume addresses issues pertaining to language teaching, learning and research during the pandemic. In times of a global emergency, the aftermath of emergency remote teaching (ERT) cannot be ignored. The question of how language educators and researchers unleash creativity and employ strategies vis-à-vis ERT still remains to be answered. With practitioners in mind, it covers a broad spectrum of educational settings across continents, target languages and methodologies. Specifically, it reveals viable ways of utilizing digital technologies to bypass social distancing while highlighting the pitfalls and challenges associated with crisis teaching and research. This volume comprises two parts: Teacher Voice vicariously transports readers to practitioners' compelling stories of how teacher resilience, identity and professional development are crystallized in adaptive pedagogy, online teaching practicum, virtual study programs and communities of practice during ERT. The second part, Researcher Corner, showcases innovative approaches for both novice and seasoned researchers to upskill their toolkits, ranging from case study research and mixed methods designs, to auto- and virtual ethnography and social media research. The array of food for

thought provides a positive outlook and inspires us to rethink our current practices and future directions in the post-COVID world. Regardless of their backgrounds and experiences, readers will be able to relate to this accessible volume that harmonizes research and practice, and speaks from the hearts of all the contributors.

*Routledge Handbook on Arab Media* Nouredine Miladi, Noha Mellor, 2020-11-29 This handbook provides the first comprehensive reference book in English about the development of mass and social media in all Arab countries. Capturing the historical as well as current developments in the media scene, this collection maps the role of media in social and political movements. Contributors include specialists in the field from North America, Europe, and the Middle East. Each chapter provides an overview of the history, regulatory frameworks and laws governing the press, and socio-political functions of the media. While the geopolitical complexities of the region have been reflected in the expert analyses collectively, the focus is always the local context of each member state. All 38 chapters consider the specific historical, political, and media trajectories in each country, to provide a contextual background and foundation for further study about single states or comparative analysis in two or more Arab states. Capturing significant technological developments and the widespread use of social media, this all-inclusive volume on Arab media is a key

resource for students and scholars interested in journalism, media, and Middle East studies.
