Agricultural Supply Chain Management Research Onur Boyabatlı,Burak Kazaz,Christopher S. Tang,2021-12-09 This book focuses on three essential elements of agricultural supply chains: Planting and Growing, Processing and Selling, and Government Interventions. For decades, most agricultural economists applied macro-economic theory in decisions pertaining to the optimization of food production and distribution. However, few researchers used micro-economic theory to examine how individual farmers respond to market information, incentive pricing mechanisms and different market structures in the trade of agricultural goods. Examining challenges in agricultural supply chain operations through the lens of micro-economic theory is imperative because it can enable policymakers and social enterprises to develop and design market information provision policy, incentive contracts and market structures for improving farmer and consumer welfare. In each chapter, contributing authors motivate their research questions by providing the context and articulating the importance of their questions. They present their analysis to examine the respective research questions and explain their results. At the end of each chapter, they provide a short list of future research questions.

The Significance of Linguistic Diversity in the Hebrew Bible Cian Power,2023-03-10 Cian J. Power explores how the biblical authors viewed and presented a fundamental human reality: the existence of the world's many languages. By examining explicit references to this diversity - such as the ambivalent account of its origins in the Tower of Babel episode - and implicit acknowledgements that included the use of strange-sounding speech to portray alien peoples, he illuminates ideas about Aramaic, Egyptian, Akkadian, and other ancient languages. Drawing on sociolinguistics, Power detects a consistent link between language and - ethnic, political, religious, and divine/human boundaries, and argues that changing historical circumstances are key to the Bible's varying attitudes. Furthermore, the study's findings regarding the biblical authors' ideas about their own language and its importance challenge our very notion of Hebrew.
