Video-Atlas of VATS Pulmonary Sublobar Resections Carlos Galvez, Sergio Bolufer, Santiago Figueroa, Andrés Obeso, 2023-05-05 The Video-Atlas of Pulmonary Sublobar Resections aims to be a reference multimedia book for Thoracic Surgeons. Mainly focused on operative technical aspects, each individual segmentectomy and many combinations are described. Each chapter opens with anatomical 3D reconstructions of the segment and its bronchoscopic anatomy. Then, the main steps for performing the procedure, that are illustrated in high-definition (HD) video-clips and figures, are described. Expert authors highlight specific tips & tricks for successfully performing the resection, and include anatomical variations that also illustrate with HD video-clips. This illustrated guide provides thoracic surgeons with an incredibly useful tool for learning and improving their technique in sublobar resections. Shoulder and Elbow Injuries in Athletes Robert A. Arciero, Frank A. Cordasco, Matthew T Provencher, 2017-10-17 Thorough and concise, this practical reference provides a unique, on-field management approach to all athletic injuries to the shoulder and elbow, as well as nonoperative and operative treatment options, including arthroscopy and open surgery. Focusing on high-performance athletes, leading authorities in the field demonstrate how to provide pain relief, restore function, and return the athlete to sport and to prior level of performance in a safe and timely fashion. Showcases the knowledge and expertise of an international group of editors and authors who have served as president of the American Orthopaedic Society for Sports Medicine, the American Shoulder and Elbow Surgeons and the Arthroscopy Association of North America, are physicians or consultants for professional and collegiate sports teams, have won awards for research in the field of shoulder surgery, are editors and reviewers for peer-reviewed journals, and

much more. Contains rehabilitation guidelines and critical return-to-sport protocols – essential information for nonsurgical healthcare providers -- primarily on athletes under the age of 40, with some consideration of the older athlete (professional golf, for example). Contains a section in each chapter covering On-the-Field Management and Early Post-Injury Assessment and Treatment – a must-read for immediate care of the injured athlete and ensuring the safe return to play. Covers the most recent advances in the management of tendon tears in elite and overhead athletes, including prevention in youth sports, early sports specialization, and changing standards of care regarding shoulder and elbow instability. Provides a thorough review of current ulnar collateral ligament injury diagnosis, imaging, non-operative management, and surgery, as well as acromioclavicular and sternoclavicular joint injuries, clavicle and olecranon fractures, and OCD of the capitellum.

Atlas of Cardiac Catheterization for Congenital Heart Disease Gianfranco Butera, Massimo Chessa, Andreas Eicken, John D. Thomson, 2019-03-11 This atlas depicts and describes catheter-based interventions across the entire pediatric age range, from fetal life through to early adulthood, with the aim of providing an illustrated step-by-step guide that will help the reader to master these techniques and apply them in everyday practice. Clear instruction is offered on a wide range of procedures, including vascular access, fetal interventions, valve dilatation, angioplasty, stent implantation, defect closure, defect creation, valve implantation, hybrid approaches, and other miscellaneous procedures. The atlas complements the previously published handbook, *Cardiac Catheterization for Congenital Heart Disease*, by presenting a wealth of photographs, images, and drawings selected or designed to facilitate the planning, performance, and evaluation of diagnostic and interventional procedures in the field of congenital heart disease. It will assist in the safe, efficient performance of these procedures, in decision making, and in the recognition and treatment of complications.

Pioneer Visual Neuroscience James M. Brown, 2018-09-21 This book honors Naomi Weisstein's foreshortened span of work published from 1964 to 1992. Naomi Weisstein was a pioneer in the areas we now call visual neuroscience, visual cognition, and cognitive neuroscience. Her enthusiastic pursuit of the mind was infectious, inspiring many others to take up the challenge. Despite her time as an active researcher being cut short, Weisstein's impact was far reaching and long lasting, and many of her ideas and insights foreshadowed today's active areas of inquiry into the inner workings of the mind. Comprising contributions from leading scholars in the field, *Pioneer Visual Neuroscience* outlines Weisstein's many contributions to the study of visual perception and processing and their effects on the field today. This volume will be of interest to anyone interested in visual perception, visual cognition, and cognitive neuroscience.

Trauma Counseling, Second Edition Lisa López Levers, PhD, LPCC-S, LPC, CRC, NCC, 2022-02-24 The only comprehensive text to focus on trauma, stress, crisis, and disaster counseling from a clinical practice perspective This overarching text, intended both for mental health practitioners-in-training and for practicing clinicians, focuses on the impact of stress, crisis, trauma, and disaster on diverse populations across the lifespan as well as on effective treatment strategies. The second edition is newly grounded in a trauma scaffold, providing foundational information that therapists can build upon, step-by-step, to treat individuals affected by more complex trauma events. This resource newly addresses the mental health implications of COVID-19, which has had an enormous impact on multitudes of people since the beginning of the pandemic, its repercussions likely to continue for some time into the future. The text also is updated to provide the most recent diagnostic information regarding trauma in the DSM-5. Two new chapters address the confluence of crises related to anthropogenic climate change and the effects of mass violence. This unrivalled resource emphasizes stress management and crisis intervention skills as important building blocks for working with more complex issues of trauma and disaster. It underscores the idea that trauma must be approached from multiple perspectives and in multiple dimensions encompassing individual, community, societal, and systemic implications along with multicultural and diversity frames of reference. The text integrates the latest findings from neuropsychology and psychopharmacology with an emphasis on Polyvagal Theory. Additionally, the text highlights the importance of clinical supervision in trauma care and examines ethical dimensions and the need for self-care among trauma counselors. Purchase includes digital access for use on most mobile devices or computers. New to the Second Edition: Reconceptualizes the text with the concept of a Trauma Scaffold as a foundation upon which to understand and develop treatment for increasingly complex trauma events Addresses the COVID-19 pandemic and its profound effect on the mental health of vast numbers of people Includes two new chapters on the confluence of crises related to anthropogenic climate change and the effects of mass violence Includes PowerPoint slides to accompany an updated Instructor's Manual Key Features: Delivers both introductory and advanced clinical information addressing complex trauma Addresses trauma from a bioecological framework with emphasis on trauma-informed practices, multicultural pluralism, diversity, and social justice Considers neurobiological responses to trauma

with new research and the contributions of Polyvagal Theory Examines individual, familial, community, society, and systemic understandings of stress, crisis, trauma, and disaster Includes a wealth of resources for further study, text boxes, and case studies to reinforce learning

Motion and Space across Languages Iraide Ibarretxe-Antuñano,2017-08-15 This volume offers a unique combination of interdisciplinary research and a comprehensive overview of motion and space studies from a semantic typological perspective. The chapters present cutting-edge research covering central topics such as the status of semantic components in motion event descriptions and their role in typological variation, the function of linguistic multimodal structures for the codification of motion, the diachronic evolution of motion expressions and its effects on motion typologies, the correspondences between physical and non-physical (fictive, metaphorical) motion, and the impact of contexts and genres on the characterization and interpretation of motion events. These issues are examined from a theoretical and applied linguistic perspective (L1–L2 acquisition, translation/interpreting). The analyses make use of diachronic and synchronic data collected by a range of methods (elicitation, experimentation, and corpus research) in more than fifteen languages. All in all, this book will be of great value to scholars and students interested in the expression of motion and space across languages.
