**Windows Video Editor Made Easy** James Bernstein, 2021-06-12 Video editing software has been around for many years and for many years only people who were in the movie business or had a large budget could afford to use such software. Even when your average home videographer was able to afford their own video camera, they still had no reasonable way to edit their movies. Now that everyone has a smartphone and considers themselves a professional movie maker, the need to edit their own footage has dramatically increased. Thankfully, Microsoft has a free app built into Windows that allows anyone with a camera and a computer to make some great looking movies. If you have some basic computer skills and a little creativity, it's not too difficult to create your own movies that will make your viewers think you are a video editing pro. You can even use the footage from your smartphone to create custom videos and add all kinds of fun effects, text and music to your movies. The goal of this book is to get you up and running with the Windows Video Editor and cover all the things you need to know to get you started on making great looking videos without confusing you at the same time. It sticks with the basics yet covers a wide variety of topics to help you achieve some great looking results without needing to be a movie editing expert. The chapters in the book cover the following topics: Chapter 1 - The Video Editor Interface Chapter 2 - Importing Videos Into Your Project Chapter 3 - Editing Your Videos Chapter 4 - Exporting Your Video Chapter 5 - Settings and Additional Features About the Author James Bernstein has been working with various companies in the IT field for over 20 years, managing technologies such as SAN and NAS storage, VMware, backups, Windows Servers, Active Directory, DNS, DHCP, Networking, Microsoft Office, Exchange, and more. He has obtained certifications from Microsoft, VMware, CompTIA, ShoreTel, and SNIA, and continues to strive to learn new technologies to further his knowledge on a variety of subjects. He is also the founder of the website OnlineComputerTips.com, which offers its readers valuable information on topics such as Windows, networking, hardware, software, and troubleshooting. Jim writes much of the content himself and adds new content on a regular basis. The site was started in 2005 and is still going strong today.

*Video Marketing Made Simple For Business Owners* Raymond Wayne, 2020-09-18 Video Marketing is literally on fire! Embrace the Power and Potential of Video Marketing And use this medium to catapult your web business to the next level. Check out on " Video Marketing Made Simple For Business Owners " Finally, you have this once in lifetime opportunity to get your hands on the video marketing tools & Strategies that are generating million dollar revenues . Businesses invest a lot of time determining who their target demographic is, and for good reason. When a business knows which demographic is buying and using their product, it's going to be easier to market to that demographic. Middle-aged women are going to respond to ads differently than millennials; and what one group finds engaging and interesting, another may not. So it's important for businesses to understand what demographic they are targeting so they get the marketing just right for them. But, businesses don't have to go to such trouble when they're using video marketing because video marketing reaches every demographic and is interesting to every demographic. And this is because men and women, and people of every age, love video. As long as it's interesting and creative, people will like a video regardless of their background or history. This can be a bonus for businesses that know who their demographic is, simply because more people will share it and like it, even if they don't make up part of the business' demographic. But it's also especially good news for businesses with a shifting demographic, or for those that don't know how makes up their demographic.

That happens sometimes when a business changes directions or changes their product or service slightly, and then they have to start back at square one with their marketing efforts. But when a business has already created videos as part of their marketing plan, they don't have to change a thing because those videos will already be suitable for every demographic. Imagine one type of marketing that appeals to every single demographic. It seems too good to be true, but it's not. That type of marketing is video marketing, and reaching every demographic is just one very good reason why every business should be investing in it.
