Video Editing will help the reader to become both knowledgeable about and comfortable with practical editing concepts, techniques, and practices. It possesses a unique combination of technical information, hands-on techniques, applied aesthetics, and discussions of industry procedures, thus making an often intimidating process easy to understand and follow. This new edition provides up-to-date information on the newest technologies and includes extensive coverage of digital editing, as well as random access and digital off-line systems. This timely and significant revision will bring anyone up to speed in the fast-paced postproduction environment. Steven E. Browne is currently the supervising editor at New Wave Productions, where he oversees video finishing of all Walt Disney, Hollywood Pictures, and Touchstone Pictures first-run feature film broadcast commercials. Nonlinear Editing Basics Steven E. Browne,1998 Nonlinear Editing Basics is an essential guide for the student or professional to understanding nonlinear editing. Not a technical manual, this easy-to-understand guide to film and video post-production incorporates the basics of nonlinear editing along with the telecine bay, three two pulldown, and simple operation of five important and powerful editing systems. The author incorporates his experience with the Editbox, Media 100, Avid Lightworks, and DVision to bring not only an overview of the nonlinear process, but to describe the basic operation of each of these powerful editors. Regardless of whether one is looking for film or video information, this text explains the basics of both, as well as how they are interrelated. If there is a film project to be finished on video or a video project to finish in the nonlinear editor, the answer to how it is done can be found in this book. Starting with film and video basics, this book explains the integration of the nonlinear editor, as well as why some projects continue to cut workprint alongside the nonlinear editor. It addresses the use of the electronic editors to complete feature films in record time, in addition to the dangers of cutting on these quick and sometimes too powerful systems. The nonlinear editor can be mastered quickly and efficiently if the overall concept is understood. This text not only offers a clear, concise conceptual understanding, but also gives practical operation techniques using specific machines. Steven E. Browne is a Senior Editor in the Finishing Department of New Wave Entertainment in California. He is the author of two other Focal Press titles, Video Editing, now in its third edition, and Film/Video Terms and Concepts.

Editing Digital Video Robert M. Goodman,Patrick McGrath,2002-10 Rebecca Harding Davis was a prominent author of radical social fiction during the latter half of the nineteenth century. In stories that combine realism with sentimentalism, Davis confronted a wide range of contemporary American issues, giving voice to working women, prostitutes, wives seeking divorce, celibate utopians, and female authors. Davis broke down distinctions between the private and the public worlds, distinctions that trapped women in the ideology of domesticity. By engaging current strategies in literary hermeneutics with a strong sense of historical radicalism in the Gilded Age, Jean Pfaelzer reads Davis through the public issues that she forcefully inscribed in her fiction. In this study, Davis's realistic narratives actively construct a coherent social work, not in a fictional vacuum but in direct engagement with the explosive movements of social change from the Civil War through the turn of the century.
