**Media Moms & Digital Dads** Yalda T Uhls, 2016-10-04 Is social media ruining our kids? How much Internet activity is too much? What do FOMO (Fear of Missing Out), sexting, and selfies mean for teens? Are you curious about what research says about how media and technology are affecting childhood? Supported by academic research focused on technology, Media Moms & Digital Dads breaks down complex issues in a friendly, accessible fashion, making it a highly useful and, ultimately, reassuring read for anyone who worries about the impact that media might be having on young minds. Each chapter delves into a different issue related to kids and media so parents can easily find their particular issue of concern. Dr. Uhls ends each chapter with quick takeaways, in the form of tips and guidance for parents. Dr. Uhls' expertise

as a former Hollywood film executive and as a current expert on child development and the media gives her a unique and important perspective. As a trained scientist she understands the myriad studies conducted by researchers, and as a mom of digital teens, she knows what actually works and can relate to the reality of being a parent in the 21st century. Dr. Uhls also describes the primary research she conducted at UCLA, including whether extensive screen time impacts non-verbal emotional understanding, which has been covered in the New York Times, Time magazine, and on National Public Radio. There are few more important issues for parents today than helping children safely navigate the digital world in which we live, a world that provides immense opportunity for learning and connecting yet also puts kids in a position to make mistakes and even cause harm. Knowing what the facts are and when and how to get involved is perhaps one of the most challenging aspects of modern parenting. Media Moms & Digital Dads offers parents reassuring and fact-based guidance on how best to manage screens and media for their children.

It illuminates the different substantive and procedural aspects of the legal proceedings and negotiations between the various local and transnational actors implicated in the Ali Enterprises fire, as well as the legal and policy reforms sparked by the incident. This endeavour serves to embed these legal cases and reform efforts in the larger context of human and labour rights protection and global value chain governance. It also offers a concrete case study relevant for ongoing debates around the role of transnational approaches in making human rights litigation, advocacy, and law reform more effective. In this regard, the book interrogates and critically reflects on such legal campaigns and local and transnational reform work with a view to future transformative legal and social activism.
