Corporate Video Production Stuart Sweetow, 2016-07-15 In this updated edition of *Corporate Video Production*, Stuart Sweetow teaches aspiring and seasoned videographers how to make imaginative corporate videos with eye-catching designs, rhythmic editing tricks, and essential scriptwriting and interview techniques. Readers will learn how to shoot on location or in a studio, work with employees-turned-actors, find new clients, and produce online videos and podcasts for corporations, government agencies, and non-profit organizations. Additionally, this new edition has been updated to include discussion questions, chapter summaries, and professional tips, and to cover live webcasting, mobile devices, shooting in 4K, micro-videos, micro-cameras, and storytelling techniques for corporate social responsibility programs. A companion website features downloadable forms and further resources.

Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Independent Filmmaking and Digital Convergence Vladan Nikolic, 2016-12-01 *Independent Filmmaking and Digital Convergence: Transmedia and Beyond* offers a comprehensive analysis of the technological changes of the past few decades in independent film and media-making, and explores new strategies and practices in media production, exhibition and distribution for independent producers and content creators. The book examines how independent filmmaking concepts have merged with digital and online technologies to create new hybrid multi-platform content creations. It explores key questions like how to reach an audience at a time when media conglomerates and their products dominate the market, and simultaneously, there is an overabundance of content competing for viewer time. The book investigates what kind of stories we tell and why; how the audience has changed, and what their expectations are; what the various niche markets are for independent producers and creators in new media; and new models for media financing and distribution. The content found in this book: Bridges the gap between professional media-makers and amateurs by focusing on new and emerging media models and practices. Provides a holistic view of the new media landscape, and practical advice on producing content in the new multi-platform media environment. Demonstrates how to create financially sustainable models for independent producers and creators in a shifting and unstable environment, providing many challenges, but also opportunities for independents. The author's website (<http://www.filmconvergence.com/>) supports this book with case studies, news and updates.

Digital Culture & Society (DCS) Ramón Reichert, Annika Richterich, Pablo Abend, Mathias Fuchs, Karin Wenz, 2016-12-31 »Digital Culture & Society« is a refereed, international journal, fostering discussion about the ways in which digital technologies, platforms and applications reconfigure daily lives and practices. It offers a forum for critical analysis and inquiries into digital media theory and provides a publication environment for interdisciplinary research approaches, contemporary theory developments and methodological innovation. The third issue »Politics of Big Data« edited by Mark Coté, Paolo Gerbaudo, and Jennifer Pybus, critically examines the political and economic dimensions

of Big Data and thus details its contestation. The contributions focus on the materialities and processes which manifest Big Data and explore forms of value beyond the state and capital. These range from open data initiatives, social media metrics, machine learning algorithms, data visualisation to data dashboards, critical data analysis, and new modes of data action research and practice.

The Fundamentals of Digital Fashion Marketing Clare Harris,2020-08-06 The Fundamentals of Digital Fashion Marketing introduces and explores contemporary digital marketing practices within the fashion industry. Imagination Neville Goddard,2016-11-09 Imagination, is a collection of lectures given by Neville Goddard on the power of Imagination. If you don't believe by now that your Imagination is the one and only reality also known as the cause of the outer world then you are in luck because in this book you will find a great and detailed explanation on why it is so, and the method of operation. This Book contains six lectures Titled: HOW TO USE YOUR IMAGINATION Now, this whole record is technique. I want to show you today how to put your wonderful imagination right into the feeling of your wish fulfilled and let it remain there and fall asleep in that state. And I promise you, from my own experience, you will realize the state in which you sleep - if you could actually feel yourself right into the situation of your fulfilled desire and continue therein until you fall asleep. MENTAL DIETS Talking to oneself is a habit everyone indulges in. We could no more stop talking to ourselves than we could stop eating and drinking. All that we can do is control the nature and the direction of our inner conversations. Most of us are totally unaware of the fact that our inner conversations are the causes of the circumstance of our life. AWAKENED IMAGINATION It may startle you to identify the central figure of the Gospels as human imagination, but I am quite sure before the series is over, you will be convinced that this what the ancients intended that we should know, but man has misread the Gospels as history and biography and cosmology, and so completely has gone asleep as to the power within himself. IMAGINATION So, God in man is man's own wonderful human Imagination. It's difficult for man to make the adjustment, having been trained to turn on the outside to some god that he worships. IMAGINATION FULFILLS ITSELF I say imagination creates reality, and if this premise is true then imagination fulfills itself in what your life becomes. Although I have changed the words, what I am saying is not new. Scripture says it in this manner: Whatsoever you desire, believe you have

received it and you will. THE FOUNDATION STONE - IMAGINATION We believe that man can create anything he desires. We believe the Universe is infinite response and the one who causes it is the individual perceiver. Nothing is independent of your perception of it. We are so interwoven we are part of the machine, but as we awake we detach ourselves from this machine and make life as we wish it to be.

Trophy Son Douglas Brunt, 2017-05-30 Growing up in the wealthy suburbs of Philadelphia, Anton Stratis is groomed to be one thing only: the #1 tennis player in the world. Trained relentlessly by his obsessive father, a former athlete who plans every minute of his son's life, Anton both aspires to greatness and resents its all-consuming demands ... Anton explodes from nowhere onto the professional scene and soon becomes one of the top-ranked players in the world, with a coach, a trainer, and an entourage. But as Anton struggles to find a balance between stardom and family, he begins to make compromises--Amazon.com.

Organic Gardening for Everyone CaliKim, 2019-12-24 If you want to grow healthy vegetables at home, but have hesitated because it seems too hard and time consuming, Organic Gardening for Everyone is your perfect hands-on guide—an “if I can do it, you can do it” case study that addresses your concerns and gets you started. Loaded with practical advice and step-by-step guidance, Organic Gardening for Everyone takes a very personal and friendly approach to a subject that can be intimidating. It is a first-class primer on organic vegetable gardening, and an inspirational story about how anyone can balance the rigors of gardening with the demands of a modern, family-oriented lifestyle. In 2012, a California mom decided to start an organic vegetable garden. But she went about it in an unusual way: she crowdsourced it by launching a YouTube channel under the name CaliKim and asking for help. And then she started planting. As questions came up, she turned to her viewers and subscribers and they replied with answers and advice. As she learned, her garden grew successfully—even in the hot, harsh California climate. Her expertise also grew, and now she answers many more questions than she asks and has become a very accomplished home gardener. And CaliKim has a great story to tell: growing healthy organic vegetables for your family is not difficult, even for today's time-challenged lifestyles. She provides complete step-by-step information on growing the most popular edibles organically, and also gives sound advice on how to take on the challenges of balancing a hectic lifestyle with successful growing—and how to involve the whole family in the process. You'll be rewarded for your effort every time you place a plate of natural, organic vegetables on the family dinner table knowing exactly what they are, what is in them, and where they came from.

Armitage's Vines and Climbers Allan M. Armitage, 2011-12-13 “Climbing plants are hugely underrated—this book with its lively expression of deep knowledge should encourage everyone to grow more of them.” —Noël Kingsbury Climbing plants constitute a huge, and largely untapped,

resource for today's gardeners. Because their habit of growth is primarily vertical, they can be used for utilitarian as well as ornamental purposes like providing privacy, or screening eyesores. In this comprehensive reference, renowned horticulturist Allan Armitage selects and profiles the most useful and attractive climbing plants for a wide range of sites and conditions, from well-known favourites like clematis, morning glories, and wisteria to more unusual plants like Dutchman's pipe, passion flowers, and the tropical mandevillas. Each profile includes a general description (enlivened by Armitage's trademark wry humour) along with the plant's hardiness, plant family, best method of propagation, method of climbing, and etymology of botanical and common names. "Climbing plants are hugely underrated—this book with its lively expression of deep knowledge should encourage everyone to grow more of them." —Noël Kingsbury
