African Violets - Gifts From Nature Melvin J. Robey,2010-02 African Violets: Gifts from Nature-The Series Book One In 1892 while on an evening stroll with his fiancée in East Africa, Baron Walter von Saint Paul discovered an unusual plant with delicate purple flowers growing along a stream on his plantation. Legend has it that he picked a bouquet and presented it to his fiancée, starting the world's love affair with the African violet. Today, this plant is indeed the most popular indoor flowering plant grown by gardeners and plant enthusiasts around the world. Whether your goal is to enjoy beautifully flowering African violets in your home, to become an expert grower of these lovely plants, or to develop a deeper understanding of how the plants function, a series of three books are being written to meet your needs. The Series provides you with an authoritative guide, taking you through all the steps necessary for growing elegant African violets and at the same time explaining to you the secrets of why the plants respond to the various growing practices used daily in their care. When writing about African violets, Melvin J. Robey's expertise, pragmatism, humor and love of the subject are clearly evident. The reader will find down-to-earth, up-to-date information in this first of three books in The Series of African Violets: Gifts from Nature. Your African violets won't flower? In this book eight common problems are explored, exposing the secrets to having plants whose crowning glory of blossoms tells everyone you are the superhero of the African violet world. You will also enjoy 44 dazzling color photographs and illustrations, along with several black and white illustrations. A unique chapter on the history of the African violet plant allows the reader to explore the fascinating story of how this spectacular houseplant has captured the imagination of plant-ologists worldwide. Diode Laser Materials and Devices - A Worldwide Market and Technology Overview to 2005 R. Szweda,2001-12-20 This report examines the development of the diode laser industry over a six-year period, 2000 to 2005, incorporating analysis of trends in markets, technologies and industry structure. It is designed to provide key information to users and manufacturers of substrates, epitaxial wafers (epiwafer) and devices. The coverage includes components, laser diodes, and the semiconducting (SC) wafers and epiwafers on which most of these devices are made. The geographical coverage of the report includes North America, Japan and Europe, which together will account for over 90% of the production and consumption of diode laser materials and devices over the next five years. However, many other countries have activities in this field including South-East Asia (Taiwan, South Korea, Singapore, Malaysia etc), China, India, Australia and Eastern Europe (Russia, Poland, Hungary, the Czech Republic) amongst others. Activities in these countries are commented on in the text where relevant, but are not quantified in the market data. Chapter 1 is an introduction to the market study. Chapter 2 contains an executive summary. Chapter 3 overviews materials markets. The size, quality, and particularly the price, of substrates and wafers are key factors in determining the ability of companies to produce competitive laser products. Chapter 3 also examines trends in materials technologies for laser diodes, the impact of the device markets on wafer demand, and the main suppliers. This chapter introduces the semiconductor materials that are presently or will likely become important to the fabrication of diode laser devices. The principal distinguishing properties of these materials are explained with reference to their application. Chapter 4 chapter examines the basic application sectors for laser diode devices as well as the basic commercial opportunities, changes and forces acting within each sector. The chapter also examines the market for the basic types of device as well as the promising newer types. For each type of device, market data and forecasts are provided and future prospects described. The application data are presented for the following industrial groups: • Automotive • Computers • Consumer • Industrial • Military and Aerospace • Telecommunications • Others A full 5-year forecast and analysis is provided by application and region. Chapter 5 is a technology overview. In this chapter a background and overview of developments in the principal technological R&D and production processes for devices is provided. The main focus is on the most important enabling technology for the production of the present and future generations of laser diodes and related devices. This process is crystal growth and involves the following sequence: • Bulk growth of single crystals • Epitaxial growth of semiconductor single crystal layers • Ion implantation • Device fabrication, ie gate and contact formation, etc • Packaging & test Chapter 6 profiles substrate suppliers, epiwafers suppliers and merchant and captive producers of GaAs devices. Chapter 7 lists universities and selected industrial labs involved in the areas of diode laser research. Chapter 8 is a directory of suppliers. Chapter 9 provides acronyms and exchange rates. COOP 2014 - Proceedings of the 11th International Conference on the Design of Cooperative Systems, 27-30 May 2014, Nice (France) Chiara Rossitto, Luigina Ciolfi, David Martin, Bernard Conein,2014-06-02 This volume presents the proceedings of the 11th International Conference on the Design of Cooperative Systems (COOP 2014). The conference is a venue for multidisciplinary research contributing to the design, assessment and analysis of cooperative systems and their integration in organizations, public venues, and everyday life. COOP emerged from the European tradition of Computer Supported Cooperative Work (CSCW) and Cognitive Ergonomics as practiced in France. These proceedings are a collection of 28 papers reflecting the variety of research activities in the field, as well as an increasing interest in investigating the use and design of ICT in all aspects of everyday life and society, and not merely in the workplace. The papers represent a variety of research topics, from healthcare to sustainable mobility to disaster response, in settings from all over the world. For the first time, the proceedings include papers presented in an Early-Career Researchers Track which was organized in order to give young researchers the opportunity to discuss their work with an international community. This collection of papers provides a picture of new developments and classic topics of research around cooperative systems, based on the principle that a deep knowledge of cooperative practices is a key to understanding technology impacts and producing quality designs. The articles presented will appeal to researchers

and practitioners alike, as they combine an understanding of the nature of work with the possibilities offered by novel digital technologies.
