Expanding College Access for Urban Youth Tyrone C. Howard, Jonli Tunstall, Terry K. Flennaugh, 2016 This timely book demonstrates why there needs to be a more thoughtful and collaborative effort on the part of K-12 schools, as well as institutions of higher education, to provide better college access to students from low-income communities. Building on a 10-year case study of a successful school-university partnership, the authors examine the supports, mentoring, and resources needed to transform the college opportunities and life chances for under-represented urban youth. Featuring first-hand accounts from student participants, the book documents how the model provided college access to some of the most selective and prestigious universities across the nation. Because this partnership situates college access within a social justice framework, it is one of the more unique programs in the country. "Few social problems are of more pressing importance than the challenge of increasing access to higher education. Howard, Tunstall, and Flennaugh carefully outline those problems and give us our marching orders. Historical. Empirical. Well-written. Thoughtful. Provocative. This book is useful for all of us concerned about access and equity in education." —William G. Tierney, professor & co-director, Pullias Center for Higher Education, University of Southern California "This book represents a moral and ethical call to any of us who believe in an educational pipeline for liberty, humanity, possibility, and justice for all—everyday!" —H. Richard Milner IV, Helen Faison

Professor of Urban Education, University of Pittsburgh Contributors: Irene Atkins, Bree Blades, Jon Carroll, Whitney Gouche, Tr'Vel Lyons, Justyn Patterson, Jerry Morrison, Michelle Smith, Ashley V. Williams

Risk and Hazard Management for Festivals and Events Peter Wynn-Moylan, 2017-09-07
Events of all types are produced every day for all manner of purposes, attracting all sorts of people. To provide a safe and secure setting in which people gather is imperative. Event risk and hazard management must be fully integrated into all event plans and throughout the event management process. Hazard management is the planning process required for the effective management of potential adverse incidents and areas of uncertainty. It involves intensive, detailed planning and cooperation to apply control systems to minimise hazards associated with venues, outdoor sites, work procedures, facilities, equipment and crowds of spectators. It involves planning for emergencies and security, and compliance with legal constraints and requirements. Risk and Hazard Management for Festivals and Events provides students with a comprehensive, fully integrated planning and management mechanism that can be applied to events of all types and size. The Event Safety Management System provides guidelines and processes for proactive methods to identify, assess and control hazardous conditions and practices. The system incorporates design of festival venues and sites, and unites the operational functions of crowd control, communications, security, terrorism prevention processes and emergency response protocols. Explanation of the causes of crowd disasters and studies into crowd behaviour

are supported with international case studies. Written in an accessible, practical way, this book is essential reading for all events students and event managers.

Orderly Britain Tim Newburn,Andrew Ward,2022-08-04 How do British pavements

remain free of dog mess? Why are paths not littered with cigarette butts or roads not lined with abandoned cars? What does the decline of the public lavatory say about us and is the national reputation for queuing still deserved today? Orderly Britain takes a topical look at modern society, examining how it is governed and how it organises itself. It considers the rules of daily life, where they come from and why they exist. It asks whether citizens are generally compliant and uncomplaining or rebellious and defiant. This quirky social history takes a close look at shifting customs and practices, people's expectations of each other and how rule-makers seek to shape everyone's lives - even when ignoring some of those rules themselves. Taking the reader on a journey that covers a range of topics - dog mess,

smoking, drinking, parking, queuing, toilets - Orderly Britain examines the rapidly changing patterns of everyday life, from post-war to present day, and concludes with an extended look at the unparalleled shifts in social routines that resulted from the global COVID-19 pandemic. Asking whether it is the proliferation of rules and regulations in the UK or something else that keeps people in line, authors Tim Newburn and Andrew Ward offer a unique insight into what creates orderly Britons.

Relationship Marketing in the Digital Age Robert W. Palmatier,Lena Steinhoff,2019-01-15 The concept of relationship marketing has been discussed among marketing academics and managers since the early 1980s. But instead of reaching its maturity stage, relationship marketing is nowadays encountering its next upsurge. Due to a confluence of trends driving the global business world—including the transition to service-based economies, faster product commoditization, intensified competition worldwide, growth among emerging markets, aging populations, advertising saturation, and (above all) the digital age—strong customer relationships are more than ever vital to company strategy and performance. *Relationship Marketing in the Digital Age* provides a comprehensive overview of the state-of-the-art of relationship marketing, offering fruitful insights to marketing scholars and practitioners. In seven chapters, divided into two main sections on understanding (Part I) and effectively applying (Part II) relationship marketing, an introductory and a concluding chapter, readers learn how to successfully manage customer-seller relationships.

Project America Marshall Elijah Hatch, 2012-05 PROJECT AMERICA: Memoirs of Faith and Hope to Win the Future, is one of the most impactful and relevant literary works of our time. The author, Dr. Marshall E. Hatch, sheds light on the timeless maxim that each generation must chart its own course. In looking back to Dr. King's global vision, he conscientiously looks forward to summon the probing question Where do we go from here? Project America offers a nostalgic yet visionary memoir that weaves together scenes from the author's personal journey with historical analysis and commentaries to address contemporary public policy issues. In his expansive, thoughtful, and powerful treatise, Dr. Hatch presents us with the challenge to move forward, beyond the sins of America's shameful history of slavery to a symphony for winning the future. In this literary treasure-trove, Hatch's four symphonic movements unfold as the pathway to fulfilling the American promise, including a massive investment in education, adapting to the changing complexion of world power, embracing environmental stewardship, and renewing our faith

to reengage the social covenant with the American people. Through Project America, we reflect upon Chicago's and the nation's past. While learning from Hatch's insights, we are encouraged to draw from the wellsprings of our faiths and to act purposefully together to achieve a brand new world. Project America is truly within our grasp; therefore, let us heed Dr. Hatch's clarion call to make a brighter future start happening now.

Montreal Olympics Paul Charles Howell, 2008-06-01 Paul Howell, a planning consultant and key player in the Montreal Olympic Organizing Committee, offers an insider's perspective on how a vast, complex, expensive, and highly politicized event was organized within the constraints imposed by limited resources, an unyielding deadline, and intense pressures from international and local special interest groups. He looks at both the struggles and what went uniquely right in Montreal, setting the record straight on operations, political involvement, and finance, including details of the well-publicized multi-billion dollar deficit that was misrepresented by the press and misunderstood by the public for decades.
