Forgotten Origins J. Douglas Kenyon, 2015-10-01 Considered by many to be the magazine of record for ancient mysteries, future science, and unexplained anomalies, Atlantis Rising® provides some of the most astounding reading to be found anywhere. Who we are and where we come from are the eternal mysteries that have engaged humanity for millennia. Evidence for human origins—our biology, technology, intellect, and spirituality—spans realms from scientific research and the bible to mystical traditions and clues that point us to alien beginnings. Today's information highway has provided us with a great stew of information; what we have been missing is the lens through which we can focus that information, and rescue order from chaos. Editor J. Douglas Kenyon has culled from the pages of Atlantis Rising® magazine this collection of 34 concise and well-illustrated articles by world-class researchers and theoreticians who offer thought-provoking insights from the lost secrets of ancient and primordial wisdom. Featuring: Alien Giants and Alien DNA. . . Or Not? by Zecharia Sitchin Atlantis and the Neanderthals by Colin Wilson Apostle of Mu by David Childress America's Mound Builders: The Mystery Deepens by Greg Little Echoes of Atlantis from Homer by Steven Sora Project Stardust: Accessing the Cosmic Hall of Records by William Henry Life in the Solar System Then & Now by William Stoecker Giza Underground by Philip Coppens

Space Atlas Tom Jackson, 2018-09-20 What is life like on the International Space Station? Can we survive on Mars? Why is Pluto no longer a planet? Just how big is the universe anyway? The ultimate guide to our galaxy, Space Atlas answers all these questions and more while exploring the far reaches of space, from our own planet to neutron stars, thousands of light years away. Showcasing significant locations in space which are explored in-depth with stunning illustrations, interesting fact files, diagrams and information on scientific achievements, this unique atlas tells you everything you could ever want to know about the universe, while taking you on a stunning visual journey through the stars. Featuring in-depth explorations of the Sun, the Earth, the solar system, black holes, quasars and the Milky Way, Space Atlas presents a mix of stunning, graphic illustrations and factual photographs that brings the subject of space to life in the most beautiful and informative way.

Photo-guide to the Constellations C. R. Kitchin, 2012-12-06 I hope that people all around the world never forget what a wonderful thing it is to lie on your back and look up at the stars Pete Seeger What is the fascination that constellations hold for people? There are probably as many different answers to that question as there are people. For many, though, the constellations are the stepping-off point into the fabulous, mind-bending discoveries and concepts of modern astronomy. For others it is their long and intriguing history that beckons. For some people the constellations provide the means for navigation and orientation over the surface of the Earth, and of course there are the millions who place some faith in horoscopes. But for most people the patterns in the sky are a beautiful part of their environment to be treasured alongside the forests, fields and rivers that make life worth living. However just as we are losing our green environment to pollution, so we are losing our sky. The glow from cities across the world swamps the stars in the night sky. Astronomers have had to retreat to remote mountain tops to escape that light pollution. The rest of us must make do with what is available. From the centre of a city, or any other brightly lit area, probably no stars at all will be visible even on the clearest of nights. From the suburbs, the brighter stars should normally be seen.

A Saving Science Eric M. Ramírez-Weaver, 2017-02-24 In *A Saving Science*, Eric Ramírez-Weaver explores the significance of early medieval astronomy in the Frankish empire, using as his lens an astronomical masterpiece, the deluxe manuscript of the Handbook of 809, painted in roughly 830 for Bishop Drogo of Metz, one of Charlemagne's sons. Created in an age in which careful study of the heavens served a liturgical purpose—to reckon Christian feast days and seasons accurately and thus reflect a “heavenly” order—the diagrams of celestial bodies in the Handbook of 809 are extraordinary signifiers of the intersection of Christian art and classical astronomy. Ramírez-Weaver shows how, by studying this lavishly painted and carefully executed manuscript, we gain a unique understanding of early medieval astronomy and its cultural significance. In a time when the Frankish church sought to renew society through education, the Handbook of 809 presented a model in which study aided the spiritual reform of the cleric's soul, and, by extension, enabled the spiritual care of his community. An exciting new interpretation of Frankish painting, *A Saving Science* shows that constellations in books such as Drogo's were not simple copies for posterity's sake, but functional tools in the service of the rejuvenation of a creative Carolingian culture.

Galaxies David J. Eicher, 2020-05-26 Tour the incredible scope of the cosmos as we know it with the editor in chief of *Astronomy*, featuring jaw-dropping illustrations and full-color photography from the magazine's archives, much of it never before published. “The natural history of the galaxies is majestic and deserves its own David Attenborough. In David Eicher, it may have just found him.”—Richard Dawkins Journey to the edges of our galaxy and beyond with one of the most widely recognized astronomy experts as your guide. Delve into the history of stargazing and space observation, learn how black holes power galaxies, and understand the classification of the different galaxy types. This illuminating book—with artful illustrations and never-before-seen space photography—will open your mind to the wonders of the universe that await.

Cosmic Navigator Gahl Eden Sasson, 2008-07-01 Gahl Sasson's second book, *Cosmic Navigator*, is like a GPS for the soul. It combines Astrology, the map of where and who we are, with Kabbalah the navigation system that tells us how to get to our goal and avoid those traffic patterns and areas of gridlock in our lives. This three part text is the first book of its kind. Not only is it the first book to use Astrology as a resource for self help, it also weds the wisdom of ancient Kabbalistic truths with the powerful archetypes of the zodiac to help you improve and change your life. The first part of the book introduces the basic concepts of Kabbalah and Astrology and how they work together. The second part teaches you how to interpret your own astrological chart as the road map of your life. The third and final part of the book, which is based on Gahl's twelve week workshop, walks the reader through the twelve signs and teaches them how to use each one to bring balance and success into their lives. Is your love life in need of more passion? Turn to the chapter on Scorpio and learn how to invoke that sexual mysterious energy. Do you need to be more assertive at work? Turn to the chapter on Aries and discover your inner warrior. Unlike other astrology books that simply offer stereotypical profiles, *Cosmic Navigator* teaches us how to take control of our astrological destinies.

Evolving Cosmos Govert Schilling, 2004-11-18 Science journalist Govert Schilling takes the reader on a whirlwind journey through time by describing the evolution of the cosmos, from the beginning of space and time fourteen billion years ago, to the creation of the Earth and humankind. Ending with a glance into the distant future of the universe, the book's combination of compelling text and breathtaking photographs provides an impressive vision of the place of man in the cosmos. Govert Schilling is a Dutch science writer and astronomy publicist. He is a contributing editor of

Sky and Telescope magazine, and regularly writes for the news sections of Science and New Scientist. Schilling is the astronomy writer for de Volkskrant, one of the largest national daily newspapers in The Netherlands, and frequently talks about the Universe on Dutch radio broadcasts. He is the author of more than twenty popular astronomy books, including Flash! (Cambridge, 2002), and hundreds of newspaper and magazine articles on astronomy.

The New Universe and the Human Future Nancy Ellen Abrams,Joel R. Primack,2011-04-19 A cultural philosopher and an astrophysicist attempt to decipher how we fit into the universe, and the impact our placement has on us. After a four-century rupture between science and the questions of value and meaning, this groundbreaking book presents an explosive and potentially life-altering idea: if the world could agree on a shared creation story based on modern cosmology and biology—a story that has just become available—it would redefine our relationship with Planet Earth and benefit all of humanity, now and into the distant future. Written in eloquent, accessible prose and illustrated in magnificent color throughout, including images from innovative simulations of the evolving universe, this book brings the new scientific picture of the universe to life. It interprets what our human place in the cosmos may mean for us and our descendants. It offers unique insights into the potential use of this newfound knowledge to find solutions to seemingly intractable global problems such as climate change and unsustainable growth. And it explains why we need to “think cosmically, act globally” if we're going to have a long-term, prosperous future on Earth. “Should be read by anyone, not just scientists, who worry about the human condition.”—Deepak Chopra, The Huffington Post “A prophetic book. Its message ranks right up there with those of Isaiah, Jeremiah, Ezekiel, and Joel. Like the prophets, it is at times poetic, demanding, grounded, soaring, empowering, and always awe-inspiring.”—Matthew Fox, Tikkun “The ideas and images are fascinating and certainly contribute to a sense of the profound stakes involved in what we’re doing to the planet and ourselves.”—William Kowinski, North Coast Journal
