Bianca C. Williams

Virtual Girlfriend: A VR Gender Swap Romance Alyson Belle, When you build your pixel-perfect dream girl, it's love at first byte... Michelle's best friend Andrew has always been her idea of a perfect partner—or at least, he would have been if she wasn't a gold-star, card-carrying lesbian. Despite being besties since childhood and knowing each other about as well as two people can, they both know it can never be more than a friendship between them. But when Michelle realizes that the VR gaming technology they both love so much offers her an interesting alternative to the problem, she innocently persuades Andrew to give her a full-mind scan of his brain on a disc, which he does happily, even if he doesn't understand what she wants it for. He knows she'd never hurt him. Whatever she has planned for his digital self, it's got to be all in good fun. When Andrew's copy wakes up in Michelle's VR game world, though, he's shocked to discover that her plans involved some pretty big changes to his physical body! Michelle took Andrew's brain scan and turned him into her perfect VR dream girl, and now "Andrea" is going to have to decide if she can get used to being Michelle's new virtual girlfriend... for the rest of his digital life!

How Games Move Us Katherine Isbister, 2016-03-04 An engaging examination of how video game design can create strong, positive emotional experiences for players—with examples from popular, indie, and art games. This is a renaissance moment for video games—in the variety of genres they represent, and the range of emotional territory they cover. But how do games create emotion? In *How Games Move Us*, Katherine Isbister takes the reader on a timely and novel exploration of the design techniques that evoke strong emotions for players. She counters arguments that games are creating a generation of isolated, emotionally numb, antisocial loners. Games, Isbister shows us, can actually play a powerful role in creating empathy and other strong, positive emotional experiences; they reveal these qualities over time, through the act of playing. She offers a nuanced, systematic examination of exactly how games can influence emotion and social connection, with examples—drawn from popular, indie, and art games—that unpack the gamer's experience. Isbister describes choice and flow, two qualities that distinguish games from other media, and explains how game developers build upon these qualities using avatars, non-player characters, and character customization, in both solo and social play. She shows how designers use physical movement to enhance players' emotional experience, and examines long-distance networked play. She illustrates the use of these design methods with examples that range from Sony's *Little Big Planet* to the much-praised indie game *Journey* to art games like Brenda Romero's *Train*. Isbister's analysis shows us a new way to think about games, helping us appreciate them as an innovative and powerful medium for doing what film, literature, and other creative media do: helping us to understand ourselves and what it means to be human.

Women's Journey to Empowerment in the 21st Century Kristen Zaleski, Annalisa Enrile, Eugenia L. Weiss, Xiyang Wang, 2019-10-03 *Women's Journey to Empowerment in the 21st Century* offers a global view into the patriarchal attitudes that shape cultural practices that oppress women and continue to take form in the modern era. In closely examining a range of issues—from the college campus rape epidemic in the United States to the climate change effects in Ghana—this book compels readers to utilize a contextual framework in order to take a closer look into contemporary violence and oppression against women in our world. Written through the lens of transnational feminism, it examines the intersections of nationhood, race, gender, sexuality, and economics within the context of a world shaped by globalization and colonialism, causing the redefinition of borders and the realignment of migration patterns. A transnational feminist perspective also supports a definition of global sisterhood based on equity, understanding, and mutual experiences. Students focusing on social justice, social work, women's studies, feminist theory, and/or violence against women will find the book to be an invaluable resource.

Media Technologies and Posthuman Intimacy Jan Stasienko, 2021-12-16 Constructing a theory of intimacy describing processes occurring between a 'human' subject and information creations, Jan Stasienko shows in what way and in what phases that relationship is built and what its nature is. He discusses technologies and genres related to the construction of a new television message

(teleprompter, interactive television forms appearing both in the analogue and digital eras), composition of the film image and specificity of cinematic technologies (peep show, hybrid animation, digital visual effects). Also new-media technologies and genres will be discussed (for example, aspects relating to computer games and Web portals making video materials available). This diversity is prompted by the desire to show that the building of intimacy protocols is not the domain of the digital era, and on the other hand, that the posthumanism of media apparatus is a wide-ranging problem, i.e. the area encompasses various vehicles findable throughout various historical periods.

Godwired Rachel Wagner, 2012-03-12 Godwired offers an engaging exploration of religious practice in the digital age. It considers how virtual experiences, like stories, games and rituals, are forms of world-building or cosmos construction that serve as a means of making sense of our own

world. Such creative and interactive activity is, arguably, patently religious. This book examines: the nature of sacred space in virtual contexts technology as a vehicle for sacred texts who we are when we go online what rituals have in common with games and how they work online what happens to community when people worship online how religious worlds and virtual worlds nurture similar desires. Rachel Wagner suggests that whilst our engagement with virtual reality can be viewed as a form of religious activity, today's virtual religion marks a radical departure from traditional religious practice – it is ephemeral, transient, rapid, disposable, hyper-individualized, hybrid, and in an ongoing state of flux.

Contemporary Consumer Culture Theory John F. Sherry, Eileen M Fischer, 2017-05-25

Contemporary Consumer Culture Theory contains original research essays written by the premier thought leaders of the discipline from around the world that reflect the maturation of the field Customer Culture Theory over the last decade. The volume seeks to help break down the silos that have arisen in disciplines seeking to understand consumer culture, and speed both the diffusion of ideas and possibility of collaboration across frontiers. Contemporary Consumer Culture Theory begins with a re-evaluation of some of the fundamental notions of consumer behaviour, such as self and other, branding and pricing, and individual vs. communal agency then continuing with a reconsideration of role configurations as they affect consumption, examining in particular the ramifications of familial, gender, ethnic and national aspects of consumers' lived experiences. The book move on to a reappraisal of the state of the field, examining the rhetoric of inquiry, the reflexive history and critique of the discipline, the prospect of redirecting the effort of inquiry to practical and humanitarian ends, the neglected wellsprings of our intellectual heritage, and the ideological underpinnings of the evolving construction of the concept of the brand. Contemporary Consumer Culture Theory is a reflective assessment, in theoretical, empirical and evocative keys, of the state of the field of consumer culture theory and an indication of the scholarly directions in which the discipline is evolving providing reflection upon a rapidly expanding discipline and altered consumption-scapes by some of its prime movers.

The Toxic Meritocracy of Video Games Christopher A. Paul, 2018-02-20 An avid gamer and sharp media critic explains meritocracy's negative contribution to video game culture—and what can be done about it Video games have brought entertainment, education, and innovation to millions, but gaming also has its dark sides. From the deep-bred misogyny epitomized by GamerGate to the endemic malice of abusive player communities, gamer culture has had serious real-world repercussions, ranging from death threats to sexist industry practices and racist condemnations. In *The Toxic Meritocracy of Video Games*, new media critic and longtime gamer Christopher A. Paul explains how video games' focus on meritocracy empowers this negative culture. Paul first shows why meritocracy is integral to video-game design, narratives, and values. Games typically valorize skill and technique, and common video-game practices (such as leveling) build meritocratic thinking into the most basic premises. Video games are often assumed to have an even playing field, but they facilitate skill transfer from game to game, allowing certain players a built-in advantage. *The Toxic Meritocracy of Video Games* identifies deep-seated challenges in the culture of video games—but all is not lost. As Paul argues, similarly meritocratic institutions like professional sports and higher education have found powerful remedies to alleviate their own toxic cultures, including active recruiting and strategies that promote values such as contingency, luck, and serendipity. These can be brought to the gamer universe, Paul contends, ultimately fostering a more diverse, accepting, and self-reflective culture that is not only good for gamers but good for video games as well.

The Pursuit of Happiness Bianca C. Williams,2018-02-08 In *The Pursuit of Happiness* Bianca C. Williams traces the experiences of African American women as they travel to Jamaica, where they address the perils and disappointments of American racism by looking for intimacy, happiness, and a connection to their racial identities. Through their encounters with Jamaican online communities and their participation in trips organized by Girlfriend Tours International, the women construct notions of racial, sexual, and emotional belonging by forming relationships with Jamaican men and other girlfriends. These relationships allow the women to exercise agency and find happiness in ways that resist the damaging intersections of racism and patriarchy in the United States. However, while the women require a spiritual and virtual connection to Jamaica in order to live happily in the United States, their notion of happiness relies on travel, which requires leveraging their national privilege as American citizens. Williams's theorization of emotional transnationalism and the construction of affect across diasporic distance attends to the connections between race, gender, and affect while highlighting how affective relationships mark nationalized and gendered power differentials within the African diaspora.
