*Magic Mirror, Magic Mirror, Am I Attractive* Yanzhuo Niu,2021 In the recent years, photographic filters (e.g. Snapchat lenses) are gaining tremendous popularity among young people. Some filters adjust one's look to make it better align with the narrowly defined societal beauty of unblemished skin and defined facial features. College-age females are especially drawn to these tools as they are under great appearance pressure and are heavy users of photo sharing-based social media platforms. Yet, the psychosocial impacts of virtual makeover use on these young females remain unclear. Extending social comparison theory, this study considered a digitally enhanced image of self as a novel upward appearance comparison target and investigated the impact of exposure to such images on Chinese college female's self-evaluation and mood with an experimental design. A sample of 205 undergraduate female students attending a college in China participated in this study. Findings showed positive impact of virtual makeover use on Chinese college females' explicit state physical appearance self-esteem and mood but not on implicit self-esteem. For those who were exposed to a selfie with virtual makeover applied, the more enhancement they perceived, the more positive their explicit self-evaluation and mood. The extent to which these college females view physical appearance was malleable was not found to be moderating the impact of virtual makeover use on self-evaluation with this sample. Implications for future research and practical work are discussed.

*The Joy of Movement* Kelly McGonigal,2021-03-02 Now in paperback. The bestselling author of *The Willpower Instinct* introduces a surprising science-based book that doesn't tell us why we should exercise but instead shows us how to fall in love with movement. Exercise is health-enhancing and life-extending, yet many of us feel it's a chore. But, as Kelly McGonigal reveals, it doesn't have to be. Movement can and should be a source of joy. Through her trademark blend of science and storytelling, McGonigal draws on insights from neuroscience, psychology, anthropology, and evolutionary biology, as well as memoirs, ethnographies, and philosophers. She shows how movement is intertwined with some of the most basic human joys, including self-expression, social connection, and mastery--and why it is a powerful antidote to the modern epidemics of depression, anxiety, and loneliness. McGonigal tells the stories of people who have found fulfillment and belonging through running, walking, dancing, swimming, weightlifting, and more, with examples that span the globe, from Tanzania, where one of the last hunter-gatherer tribes on the planet live, to a dance class at Juilliard for people with Parkinson's disease, to the streets of London, where volunteers combine fitness and community service, to races in the remote wilderness, where athletes push the limits of what a human can endure. Along the way, McGonigal paints a portrait of human nature that highlights our capacity for hope, cooperation, and self-transcendence. The result is a revolutionary narrative that goes beyond familiar arguments in favor of exercise, to illustrate why movement is integral to both our happiness and our humanity. Readers will learn what they can do in their own lives and communities to harness the power of movement to create happiness, meaning, and connection.

**Clones, Fakes and Posthumans** ,2015-06-24 Clones, Fakes and Posthumans: Cultures of Replication explores cloning and related phenomena that inform each other, like twins, fakes, replica, or homogeneities, through a cultural prism. What could it mean to think of a cloning mentality? Could it be that a "cloning culture" has made biotechnological cloning desirable in the first place, and vice versa that biotechnological cloning then enforces technologies of social and cultural cloning? What does it mean to say that a culture replicates? If biotechnological cloning has to do with choice and repetitive reproduction of selected characteristics, how are those kinds of desires expressed socially, politically and culturally? Lifting the issue of cloning above the biotechnological domain, we problematize the cultural context, including modernity's readiness to imitate and manipulate nature, and the skewed privileging of desirable socialities as a basis for exclusive replication. We also explore possible relations between a cloning mentality and a consumer society that fosters a brand-name mentality. The construction and (coercive) implementation of copy-prone technological and symbolic items are at the very heart of the consumer society and its modes of mass production as they have emerged from and seek to articulate, define, and refine modernity and modernization.
