The Virtual Haydn Tom Beghin,2015-05-22 This is a highly original book about Haydn's keyboard music, about 18th-century keyboard practices and culture, and about performance. Written in the first person by the author, himself a professional keyboard player, the study places the performer, both historical and contemporary, at the center of the scholarly inquiry and explores in exquisite detail the process by which a modern performer arrives at a historically-informed interpretation of Haydn's sonatas. The veiled reference to Diderot's Paradox of an Actor in the title explicitly situates the study within the context of 18th-century debates on performance--a crucial issue in the period, with the rapid expansion of music publishing, of concert culture, of amateur music making, especially among aristocratic women performers, and with rapid changes in the technology and the physical properties of the instruments themselves. The reference to Diderot also hints at the way in which Beghin's text itself performs" in the manner of many 18th-century critical texts: like them, it has a tendency to be personal and idiosyncratic. Discussing a group of Viennese sonatas, for example, the author explores the contemporary fascination with physiognomy and goes on to try out facial gestures in his own performance of the music, which he documents in photographs reproduced in the book vis-à-vis Messerschmidt's grimacing busts of the same period. Introducing the female dedicatees and performers of sonatas written for both Vienna and London, he links rhetoric and gender showing how femininity was encoded into the music through rhetorical gestures comparable to those Haydn employed in letters to female friends and patrons. Using wit and imagination to illuminate and bridge the gulf between 18th-century and 21st-century concepts of performance, this book helps define a fresh approach to keyboard studies and performance studies today.

My First Piano Adventure: Lesson Book A with CD ,2007-01-01 (Faber Piano Adventures). Written for ages 5 and 6, My First Piano Adventure captures the child's playful spirit. Fun-filled songs, rhythm games and technique activities develop beginning keyboard skills. Three distinguishing features of the Lesson Book A make it unique and effective for the young 5-6 year old beginner. 1. A strong focus on technique embedded in the book through playful technique games, chants, and carefully-composed pieces that gently lead the child into pianistic motions. 2. An outstanding CD for the young student to listen, sing, tap, and play along with at the piano. The orchestrated songs on the CD feature children singing the lyrics, which has great appeal to the 5-6 year old beginner. The CD becomes a ready-made practice partner that guides the student and parent for all the pieces and activities in the books. 3. The fanciful art features five multi-cultural children who are also learning to play. These friends at the piano introduce basic rhythms, white key names, and a variety of white and black-key songs that span classical, folk, and blues. Young students will listen, sing, create, and play more musically with Nancy and Randall Faber s My First Piano Adventure, Lesson Book A. The Lesson Book introduces directional pre-reading, elementary music theory and technique with engaging songs, games, and creative discovery at the keyboard. Young students will enjoy the multi-cultural friends at the piano who introduce white-key names, basic rhythms, and a variety of songs which span classical, folk, and blues. Ear-training and eye-training are also part of the curriculum. The Fabers' instructional theory ACE - Analysis, Creativity, and Expression, guides the pedagogy of My First Piano Adventure. Analysis leads to understanding, creativity leads to self-discovery, and expression develops personal artistry. The CD for this book offers a unique listening experience with outstanding orchestrations and vocals. Erard Robert Adelson,2021-03-05 Sébastien Erard's (1752-1831) inventions have had an enormous impact on instruments and musical life and are still at the foundation of piano building today. Drawing on an unusually rich set of archives from both the Erard firm and the Erard family, author Robert Adelson shows how the Erard piano played an important and often leading role in the history of the instrument, beginning in the late eighteenth century and continuing into the final decades of the nineteenth. The Erards were the first piano builders in France to prioritise the more sonorous grand piano, sending gifts of their new model to both Haydn and Beethoven. Erard's famous double-escapement action, which improved the instrument's response while at the same time producing a more powerful tone, revolutionised both piano construction and repertoire. Thanks to these inventions, the Erard firm developed close relationships with the greatest pianist composers of the nineteenth century, including Hummel, Liszt, Moscheles and Mendelssohn. The book also presents new evidence concerning Pierre Erard's homosexuality, which helps us to understand his reluctance to found a family to carry on the Erard tradition, a reluctance that would spell the end of the golden era of the firm and lead to its eventual demise. The book closes with the story of Pierre's widow Camille, who directed the firm from 1855 until 1889. Her influential position in the male-dominated world of instrument building was unique for a woman of her time.
