God and Popular Culture [2 volumes] Stephen Butler Murray, Aimée Upjohn Light, 2015-08-11 This contributed two-volume work tackles a fascinating topic: how and why God plays a central role in the modern world and profoundly influences politics, art, culture, and our moral reflection—even for nonbelievers. God—in the many ways that people around the globe conceptualize Him, Her, or It—is one of the most powerful, divisive, unifying, and creative elements of human culture. The two volumes of *God and Popular Culture: A Behind-the-Scenes Look at the Entertainment Industry's Most Influential Figure* provide readers with a balanced and accessible analysis of this fascinating topic that allows anyone who appreciates any art, music, television, film, and other forms of entertainment to have a new perspective on a favorite song or movie. Written by a collective of both believers and nonbelievers, the essays enable both nonreligious individuals and those who are spiritually guided to consider how culture approaches and has appropriated God to reveal truths about humanity and society. The book discusses the intersections of God with film, television, sports, politics, commerce, and popular culture, thereby documenting how the ongoing messages and conversations about God that occur among the general population also occur within the context of the entertainment that we as members of society consume—often without our recognition of the discussion.

Global Filipinos Deirdre McKay, 2012 Contract workers from the Philippines make up one of the world's largest movements of temporary labor migrants. Deirdre McKay follows Filipino migrants from one rural community to work sites overseas and then home again. Focusing on the experiences of individuals, McKay interrogates current approaches to globalization, multi-sited research, subjectivity, and the village itself. She shows that rather than weakening village ties, temporary labor migration gives the village a new global dimension created in and through the relationships, imaginations, and faith of its members in its potential as a site for a better future.

The Pacific Basin since 1945 Roger C. Thompson, 2014-09-25 The nations of the Pacific Basin - in East and Southeast Asia, Australasia, the Pacific islands and the Americas - make up the world's largest economic zone, and its most culturally diverse region. In recent years its Asian 'Tiger Economies' have suffered economic collapse and unfinished business from the Cold War has produced continuing conflict and instability. The new edition of this pioneering book traces the postwar inter-relationships of all the rim and island nations. It gives a unique impression of the make-up of the region, and the tensions within it. The book integrates a wide range of information from books and articles; from published and unpublished sources, including recently opened Russian and American archives; and from the first-hand experiences of participants, including those of the author, in Pacific Basin affairs. Vigorously written and strongly argued, no other account brings together all the threads of the development of international relations in this complex and fascinating region.

Routledge International Handbook of the Sociology of Art and Culture Laurie Hanquinet, Mike Savage, 2015-09-16 The Routledge Handbook of the Sociology of Arts and Culture offers a comprehensive overview of sociology of art and culture, focusing especially – though not exclusively – on the visual arts, literature, music, and digital culture. Extending, and critiquing, Bourdieu's influential analysis of cultural capital, the distinguished international contributors explore the extent to which cultural omnivorousness has eclipsed highbrow culture, the role of age, gender and class on cultural practices, the character of aesthetic preferences, the contemporary significance of screen culture, and the restructuring of popular culture. The Handbook critiques modes of sociological determinism in which cultural engagement is seen as the simple product of the educated middle classes. The contributions explore the critique of Eurocentrism and the global and cosmopolitan dimensions of cultural life. The book focuses particularly on bringing cutting edge 'relational' research methodologies, both qualitative and quantitative, to bear on these debates. This handbook not only describes the field, but also proposes an agenda for its development which will command major international interest.

Cyber Physical Computing for IoT-driven Services Vladimir Hahanov, 2018-01-30 This book presents the cyber culture of micro, macro, cosmological, and virtual computing. The book shows how these work to formulate, explain, and predict the current processes and phenomena monitoring and controlling technology in the physical and virtual space. The authors posit a basic proposal to transform description of the function truth table and structure adjacency matrix to a qubit vector that focuses on memory-driven computing based on logic parallel operations performance. The authors offer a metric for the measurement of processes and phenomena in a cyberspace, and also the architecture of logic associative computing for decision-making and big data analysis. The book outlines an innovative theory and practice of design, test, simulation, and diagnosis of digital systems based on the use of a qubit coverage-vector to describe the functional components and structures. Authors provide a description of the technology for SoC HDL-model diagnosis, based on Test Assertion Blocks Activated Graph. Examples of cyber-physical systems for digital monitoring and cloud management of social objects and transport are proposed. A presented automaton model of cosmological computing explains the cyclical and harmonious evolution of matter-energy essence, and also a space-time form of the Universe.
