How to Create 3D Virtual Tours Deniss Cernisevs,2015 About 3D virtual Tours We often face a problem - where to eat and have a rest? You want to visit a restaurant. Where can you find information about it? Probably, you will find the list of restaurants with photos. But photos won't give a full idea about a place. If we had opportunity to walk virtually over the restaurant or real estate object, to examine everything attentively and make the decision ... Panorama allows using various options - maps, reservation, video and music addition, and many other things. The person, going to business trip or vacation, has to have opportunity in advance to choose hotel, restaurant for a business dinner and a conference room for presentations, museum or real estate purchase without spending time... Technology of virtual tour and 3d panoramas is intended generally for visualization of objects, as efficiency of final product in that case sharply increases. Panorama has to work for the owner 24 hours per day, seven days in a week, without giving persuasive advice but only doing the part. What are virtual tours and panoramas? Virtual panoramas (synonyms: 3D - panoramas, spherical panoramas, 360-photopanoramas) is a photorealistic way of demonstration of dimensional space. This is one of the most spectacular and evident visualization tools, and also is the most demanded advertising products in a network existing today. Virtual tour is a set of panoramas united by cross hyperlinks, and also by plan of tour. On the screen of monitor we can see panoramic 3D - image surrounding the viewer with 360 degrees sphere. Operating by keys or mouse, we can look around or turn back, approach or distance an interesting subject, develop a picture under necessary angle wise. As a part of tour all panoramas are integrated by active zones by means of which it is possible to move from one 3D - panoramas into another.

Anne Frank's Tales from the Secret Annexe Anne Frank,2010 In these tales the reader can observe Anne's writing prowess grow from that of a young girl's into the observations of a perceptive, edgy, witty and compassionate woman--Jacket flaps.

The Virtual Worlds Handbook: How to Use Second Life® and Other 3D Virtual Environments Elizabeth Hodge,Sharon Collins,Tracy Giordano,2009-12-14 Step into the world of virtual reality with your newly created avatar and begin to experience the tools that make this world interactive! During their infancy stage, virtual environments were largely based upon the gaming community and over time have been adapted to meet the growing number of users and educators. The Virtual Worlds Handbook, with CD-ROM, provides a user-friendly approach that will help trainers and educators create an effective and interactive environment within the Second Life virtual world. This book was written to help the novice user tackle the natural learning curve while providing the experienced user with tips, tools, and tricks to help any educator or trainer meet their professional goals faster. The opportunities using virtual reality are limitless and provide online students with a unique opportunity to connect both physically and educationally to one another, to faculty, to university, and to a worldwide market.

Building Interactive Worlds in 3D Jean-Marc Gauthier,2013-05-02 In Building Interactive Worlds in 3D readers will find turnkey tutorials that detail all the steps required to build simulations and interactions, utilize virtual cameras, virtual actors (with self-determined behaviors), and real-time physics including gravity, collision, and topography. With the free software demos included, 3D artists and developers can learn to build a fully functioning prototype. The book is dynamic enough to give both those with a programming background as well as those who are just getting their feet wet challenging and engaging tutorials in virtual set design, using Virtools. Other software discussed is: Lightwave, and Maya. The book is constructed so that, depending on your project and design needs, you can read the text or interviews independently and/or use the book as reference for individual tutorials on a project-by-project basis. Each tutorial is followed by a short interview with a 3D graphics professional in order to provide insight and additional advice on particular interactive 3D techniques-from user, designer, artist, and producer perspectives.

Learning in 3D Tony O'Driscoll,Karl M. Kapp,2009-12-30 Praise for Learning in 3D Learning is the key to our future and powerful learning will result from immersive, interactive, and creative 3D designs. Tony O'Driscoll and Karl Kapp have written a disruptive book about a disruptive technology that we all need to explore. This is a must read! Elliott Masie, chair, The LearningCONSORTIUM Karl Kapp and Tony O'Driscoll are, amazingly, both the best theorists and practitioners in using virtual worlds in every type of educational venue. Many will love their vision, but I am more hooked on their practicality and hand-holding. Clark Aldrich, author, Learning Online with Games, Simulations, and Virtual Worlds: Strategies for Online Instruction Kapp and O'Driscoll nailed it. The right balance of case studies, theories and practical advice for any organization pursing the use of virtual worlds for learning. If you are interested in virtual worlds for learning and collaboration, this book is for you. David A. Manning, managing partner, Performance Development Group The big contribution of Learning in 3D is that it provides research informed guidance and practical tips and techniques for using 3D virtual environments to achieve real business results...the case studies are outstanding. Lisa Clune, president, Kaplan EduNeering As the world makes its way through a period of significant change, Learning in 3D couldn't come at a better time. Today, organizations and individuals are being challenged to make the most of learning collaboratively. This book stimulates our thinking on how to maximize the impact of technology, while providing a practical blueprint with 'revolutionary' examples of how to bring a new dimension to learning. John Malitoris, regional managing director, Duke Corporate Education Tony O'Driscoll and Karl Kapp remind us that learning is the fourth dimension and the one that really counts in collaboration. A must-read for the future of learning in environments virtual and otherwise. Cathy Davidson, Ruth F. DeVarney Professor of English at Duke University and co-director HASTAC/MacArthur Foundation Digital Media and Learning Competition.

Welcome to the Universe in 3D Neil deGrasse Tyson,Michael A. Strauss,J. Richard Gott,Robert J. Vanderbei,2022-04-19 Presenting a rich array of stereoscopic color images, which can be viewed in 3D using a special stereo viewer that folds easily out of the cover of the book, this book reveals your cosmic environment as you have never seen it before. Journey into the vast depths of the observable universe by visualising the most spectacular images in astronomy in stereoscopic 3D. Welcome to the Universe in 3D takes you on a grand tour of the observable universe, guiding you through the most spectacular sights in the cosmos a in breathtaking 3D. Astronomy is the story of how humankind's perception of the two-dimensional dome of the sky evolved into a far deeper comprehension of an expanding three-dimensional cosmos. This book invites you to take part in this story by exploring the universe in depth, as revealed by cutting-edge astronomical research and observations. You will journey from the Moon through the solar system, out to exoplanets, distant nebulas, and galaxy clusters, until you finally reach the cosmic microwave background radiation (or CMB), the most distant light we can observe. The distances to these celestial wonders range from 1.3 light-seconds to 13.8 billion light-years. Along the way, the authors explain the fascinating features of what you are seeing, including how the 3D images were made using the same technique that early astronomers devised to measure distances to objects in space. The dramatic 3D images in this one-of-a-kind book will astonish you, extending your vision out to the farthest reaches of the universe. You will never look up into the night sky the same way again.

Remote Work and Sustainable Changes for the Future of Global Business Ali, Mohammed,2021-06-25 There is a void of research and other academic materials to support stakeholders operating within industry and the service sector with respect to their perceptions and experiences of remote work, particularly in the context of global business, sustainability, and change management. As more businesses consider remaining and maintaining a remote workforce, it is of paramount importance that new research be conducted regarding the multifaceted area of remote work and sustainable change for global business. Remote Work and Sustainable Changes for the Future of Global Business raises awareness of the multifaceted area of remote work in the context of sustainable change. In particular, it explores remote technology in an attempt to cope with the changing landscape of work environments amidst global change from a sociotechnical perspective. This book provides insight into the challenges both national and international businesses face during a world crisis. Covering topics such as crisis management, the human cloud, and virtual collaboration, this book is essential to business managers, project managers, business clusters, entrepreneurs, higher education practitioners, faculty and PhD researchers, educational boards, technology vendors and firms, and academic researchers.

Empowering Online Learning Curtis J. Bonk,Ke Zhang,2008-07-21 This is an essential resource for anyone designing or facilitating online learning. It introduces an easy, practical model (R2D2: read, reflect, display, and do) that will show online educators how to deliver content in ways that benefit all types of learners (visual, auditory, observational, and kinesthetic) from a wide variety of backgrounds and skill levels. With a solid theoretical foundation and concrete guidance and examples, this book can be used as a handy reference, a professional guidebook, or a course text. The authors intend for it to help online instructors and instructional designers as well as those contemplating such positions design, develop, and deliver learner-centered online instruction. Empowering Online Learning has 25 unique activities for each phase of the R2D2 model as well as summary tables helping you pick and choose what to use whenever you need it. Each activity lists a description, skills addressed, advice, variations, cost, risk, and time index, and much more. This title is loaded with current information about emerging technologies (e.g., simulations, podcasts, wikis, blogs) and the Web 2.0. With a useful model, more than 100 online activities, the latest information on emerging technologies, hundreds of quickly accessible Web resources, and relevance to all types and ages of learners--Empowering Online Learning is a book whose time has come.

Virtual Space Lars Qvortrup,J.F. Jensen,E. Kjems,N. Lehmann,C. Madsen,2011-06-28 Containing the edited research papers resulting from an ambitious, cross-disciplinary research project, this volume examines the spatiality of virtual inhabited 3D worlds - virtual reality and cyberspace. (Three other volumes look at Interaction, Staging and Methodology.) It is about the communication spaces emerging at the Internet and supported by special 3D interfaces. It is also about the virtual spaces created by virtual reality hardware (CAVEs, panoramic screens, head mounted display systems etc.) and software. Virtual Space: Spatiality in Virtual Inhabited 3D Worlds is interdisciplinary. It deals with philosophical, psychological, communicational, technological and aesthetic aspects of space. While philosophy raises the question concerning the ontology of space - what is space - psychology deals with our perception of space. Communication theory looks at the way in which space supports communication (i.e. that space is a medium for communication), and finally aesthetic analyses exemplify the use of virtual space in virtual cities, in museums and in art.

Constructing Self-Discovery Learning Spaces Online: Scaffolding and Decision Making Technologies Hai-Jew, Shalin,2011-11-30 As an increasing amount of information is made available online, the assumption is that people who visit Web sites will be able to strategize their learning to optimize access to this information. Constructing Self-Discovery Learning Spaces Online: Scaffolding and Decision Making Technologies raises awareness of the strategies supporting self-driven learner efficacy on a number of site types. This book reflects on existing literature about self-discovery learning and what learners need in terms of scaffolding to help them make the right decisions, assess their own level of learning, vet information strategically, collaborate with other learners, and build their own skill sets.

Computer Support for Collaborative Learning Gerry Stahl,2023-01-13 Computer Support for Collaborative Learning (CSCL) is a field of study centrally concerned with meaning and the practices of meaning-making in the context of joint activity, and the ways in which these practices are mediated through designed artifacts. This volume includes abstracts of papers that were presented during interactive poster sessions at CSCL 2002. Documenting an extremely heterogeneous, productive phase of inquiry with broad social consequences, these proceedings reflect the current state of CSCL research--particularly in North America and Western Europe.

Ditch That Textbook Matt Miller,2015-04-13 Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting by the textbook implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

World View 1904 Robert Whiteside,2015-03-26 70 pages with hand-colored images of the 1904 Louisiana Purchase Exposition in St. Louis, Missouri. These colorized views are extremely rare and offer an exciting look at an historic event normally seen only in black & white. We've adapted 30 superb 3D photocards of the Fair to viewing with modern red/blue 3D glasses. Re-live the excitement people had viewing the Fair in 3D... without purchasing an antique stereopticon. The Introduction discusses historic photography, music of the time. and includes web links to a music video and soundtrack of period music created especially for this book.
