Advances in Image and Video Technology Yo-Sung Ho, 2011-11-07 The two-volume proceedings LNCS 7087 + LNCS 7088 constitute the proceedings of the 5th Pacific Rim Symposium on Image and Video Technology, PSIVT 2011, held in Gwangju, Korea, in November 2011. The total of 71 revised papers was carefully reviewed and selected from 168 submissions. The topics covered are: image/video coding and transmission; image/video processing and analysis; imaging and graphics hardware and visualization; image/video retrieval and scene understanding; biomedical image processing and analysis; biometrics and image forensics; and computer vision applications.

Multidimensional Processing of Video Signals Giovanni L. Sicuranza, Sanjit K. Mitra, 2012-12-06 A color time-varying image can be described as a three-dimensional vector (representing the colors in an appropriate color space) defined on a three-dimensional spatiotemporal space. In conventional analog television a one-dimensional signal suitable for transmission over a communication channel is obtained by sampling the scene in the vertical and temporal directions and by frequency-multiplexing the luminance and chrominance information. In digital processing and transmission systems, sampling is applied in the horizontal direction, too, on a signal which has been already scanned in the vertical and temporal directions or directly in three dimensions when using some solid-state sensor. As a consequence, in recent years it has been considered quite natural to assess the potential advantages arising from an entire multidimensional approach to the processing of video signals. As a simple but significant example, a composite color video signal, such as the conventional PAL or NTSC signal, possesses a three-dimensional spectrum which, by using suitable three-dimensional filters, permits horizontal sampling at a rate which is less than that required for correctly sampling the equivalent one-dimensional signal. More recently it has been widely recognized that the improvement of the picture quality in current and advanced television systems requires well-chosen signal processing algorithms which are multidimensional in nature within the demanding constraints of a real-time implementation.

Computer Vision -- ECCV 2010 Kostas Daniilidis, Petros Maragos, Nikos Paragios, 2010-09-08 The 2010 edition of the European Conference on Computer Vision was held in Heraklion, Crete. The call for papers attracted an absolute record of 1,174 submissions. We describe here the selection of the accepted papers: Thirty-eight area chairs were selected coming from Europe (18), USA and Canada (16), and Asia (4). Their selection was based on the following criteria: (1) Researchers who had served at least two times as Area Chairs within the past two years at major vision conferences were excluded; (2) Researchers who served as Area Chairs at the 2010 Computer Vision and Pattern Recognition were also excluded (exception: ECCV 2012 Program Chairs); (3) Minimization of overlap introduced by Area Chairs being former student and advisors; (4) 20% of the Area Chairs had never served before in a major conference; (5) The Area Chair selection process made all possible efforts to achieve a reasonable geographic distribution between countries, thematic areas and trends in computer vision. Each Area Chair was assigned by the Program Chairs between 28–32 papers. Based on paper content, the Area Chair recommended up to seven potential reviewers per paper. Such assignment was made using all reviewers in the database including the conflicting ones. The Program Chairs manually entered the missing conflict domains of approximately 300 reviewers. Based on the recommendation of the Area Chairs, three reviewers were selected per paper (with at least one being of the top three suggestions), with 99.

Audio- and Video-Based Biometric Person Authentication Takeo Kanade, Anil Jain, Nalini K. Ratha, 2011-04-06 This book constitutes the refereed proceedings of the 5th International Conference on Audio- and Video-Based Biometric Person Authentication, AVBPA 2005, held in Hilton Rye Town, NY, USA, in July 2005. The 66 revised oral papers and 50 revised poster papers presented were carefully reviewed and selected from numerous submissions. The papers discuss all aspects of biometrics including iris, fingerprint, face, palm print, gait, gesture, speaker, and signature; theoretical and algorithmic issues are dealt with as well as systems issues. The industrial side of biometrics is evident from presentations on smart cards, wireless devices, and architectural and implementation aspects.

MultiMedia Modeling Cathal Gurrin, Frank Hopfgartner, Wolfgang Hurst, Håvard Johansen, Hyowon Lee, Noel O'Connor, 2014-01-02 The two-volume set LNCS 8325 and 8326 constitutes the thoroughly refereed proceedings of the 20th Anniversary International Conference on Multimedia Modeling, MMM 2014, held in Dublin, Ireland, in January 2014. The 46 revised regular papers, 11 short papers and 9 demonstration papers were carefully reviewed and selected from 176 submissions. 28 special session papers and 6 papers from Video Browser Showdown workshop are also included in the proceedings. The papers included in these two volumes cover a diverse range of topics including: applications of multimedia modelling, interactive retrieval, image and video collections, 3D and augmented reality, temporal analysis of multimedia content, compression and streaming. Special session papers cover the following topics: Mediadrom: artful post-TV scenarios, MM analysis for surveillance video and security applications, 3D multimedia computing and modeling, social geo-media analytics and retrieval, multimedia hyperlinking and retrieval.

Proceedings of the 2nd International Conference on Data Engineering and Communication Technology Anand J. Kulkarni, Suresh Chandra Satapathy, Tai Kang, Ali Hussein Zadeh Kashan, 2018-10-03 This book features research work presented at the 2nd International Conference on Data Engineering and Communication Technology (ICDECT) held on December 15–16, 2017 at Symbiosis International University, Pune, Maharashtra, India. It discusses advanced, multi-disciplinary research into smart computing, information systems and electronic systems, focusing on innovation paradigms in system knowledge, intelligence and sustainability that can be applied to provide feasible solutions to varied problems in society, the environment and industry. It also addresses the deployment of emerging computational and knowledge transfer approaches, optimizing solutions in a variety of disciplines of computer science and electronics engineering.

Religious Fundamentalism in the Age of Pandemic Nina Käsehage, 2021-03-31 The multidisciplinary anthology Religious Fundamentalism in the Age of Pandemic provides deep insights concerning the current impact of Covid-19 on various religious groups and believers around the world. Based on contributions of well-known scholars in the field of Religious Fundamentalism, the contributors offer about a window into the origins of religious fundamentalism and the development of these movements as well as the creation of the category itself. Further recommendations regarding specific (fundamentalist) religious groups and actors and their possible development within Buddhism, Christianity, Islam and Judaism round up the discussion about the rise of Religious Fundamentalism in the Age of Pandemic.

Computer Vision - ECCV 2002 Anders Heyden, Gunnar Sparr, Mads Nielsen, Peter Johansen, 2003-08-02 Premiering in 1990 in Antibes, France, the European Conference on Computer Vision, ECCV, has been held biennially at venues all around Europe. These conferences have been very successful, making ECCV a major event to the computer vision community. ECCV 2002 was the seventh in the series. The privilege of organizing it was shared by three universities: The IT University of Copenhagen, the University of Copenhagen, and Lund University, with the conference venue in Copenhagen. These universities lie geographically close in the vivid Öresund region, which lies partly in Denmark and partly in Sweden, with the newly built bridge (opened summer 2000) crossing the sound that formerly divided the countries. We are very happy to report that this year's conference attracted more papers than ever before, with around 600 submissions. Still, together with the conference board, we decided to keep the tradition of holding ECCV as a single track conference. Each paper was anonymously refereed by three different reviewers. For the final selection, for the first time for

ECCV, a system with area chairs was used. These met with the program chairs in Lund for two days in February 2002 to select what became 45 oral presentations and 181 posters. Also at this meeting the selection was made without knowledge of the authors' identity.

Z Generation Ian Garner, 2023-05-04 How did Vladimir Putin galvanise the Russian people to back his genocidal war in Ukraine and why are so many of them willing to embrace fascism? This vivid, on-the-ground narrative reveals how Russia's fascist generation came into being—and the dark future that awaits the country if that hold cannot be broken. Wartime Russia is drowning in fascist symbols. Zealous patriots attack journalists, opposition activists, and anyone suspected of betraying the motherland. Russians are urged to join the cause by hordes of online trolls and sleek videos of angry young men bellowing patriotic slogans. State television terrifies viewers with trumped up tales of anti-Russian conspiracies and genocidal yearnings. Child soldiers proudly parade across Red Square. This is Russia in the 2020s: a land of performative rage and nationalist untruth, where play-acting, pretence and broken promises are a way of life. But in a world where pretence has become the norm, a terrifying, apocalyptic mindset is seizing the Russians of tomorrow. As enrapturing as it is terrifying, Z Generation reveals how Russia ended up where it is today, and where its young people are headed: a fascist generation more zealous, violent and ideological than anything the country has seen before.

Fundamentals of Multimedia Ze-Nian Li, Mark S. Drew, Jiangchuan Liu, 2014-04-09 This textbook introduces the "Fundamentals of Multimedia", addressing real issues commonly faced in the workplace. The essential concepts are explained in a practical way to enable students to apply their existing skills to address problems in multimedia. Fully revised and updated, this new edition now includes coverage of such topics as 3D TV, social networks, high-efficiency video compression and conferencing, wireless and mobile networks, and their attendant technologies. Features: presents an overview of the key concepts in multimedia, including color science; reviews lossless and lossy compression methods for image, video and audio data; examines the demands placed by multimedia communications on wired and wireless networks; discusses the impact of social media and cloud computing on information sharing and on multimedia content search and retrieval; includes study exercises at the end of each chapter; provides supplementary resources for both students and instructors at an associated website.

Flexible Authoritarianism Anna Schwenck, 2024 Flexible Authoritarianism challenges the idea that the transnational rise of authoritarianism is a backlash against economic globalization and neoliberal capitalism. Flexible authoritarianism--a form of government that simultaneously incentivizes a can-do spirit and suppresses dissent--reflects the resonance between authoritarian and neoliberal ideologies in today's comeback of strongman rule. The book conveys the look and feel of flexible authoritarianism in Russia through the eyes of up-and-coming youth. Drawing on field observations, in-depth interviews, and analyses of documents and video clips, Anna Schwenck demonstrates how flexible authoritarianism is stabilized ideologically by the insignia of cool start-up capitalism and by familiar cultural forms such as the summer camp. It critically evaluates how loyalty to the regime--the order underlying political and economic life in a polity--is produced and contested among those young people who seek key positions in politics, business, the public sector, or creative industries.

Advanced Video Communications over Wireless Networks Ce Zhu, Yuenan Li, 2017-12-19 Wireless video communications encompass a broad range of issues and opportunities that serve as the catalyst for technical innovations. To disseminate the most recent advances in this challenging yet exciting field, Advanced Video Communications over Wireless Networks provides an in-depth look at the fundamentals, recent technical achievements, challenges, and emerging trends in mobile and wireless video communications. The editors have carefully selected a panel of researchers with expertise in diverse aspects of wireless video communication to cover a wide spectrum of topics, including the underlying theoretical fundamentals associated with wireless video communications, the transmission schemes tailored to mobile and wireless networks, quality metrics, the architectures of practical systems, as well as some novel directions. They address future directions, including Quality-of-Experience in wireless video communications, video communications over future networks, and 3D video communications. The book presents a collection of tutorials, surveys, and original contributions, providing an up-to-date, accessible reference for further development of research and applications in mobile and wireless video communication systems. The range of coverage and depth of expertise make this book the go-to resource for facing current and future challenges in this field.

Advances in Computer Systems Architecture Chris Jesshope, 2006-08-31 This book constitutes the refereed proceedings of the 11th Asia-Pacific Computer Systems Architecture Conference, ACSAC 2006. The book presents 60 revised full papers together with 3 invited lectures, addressing such issues as processor and network design, reconfigurable computing and operating systems, and low-level design issues in both hardware and systems. Coverage includes large and significant computer-based infrastructure projects, the challenges of stricter budgets in power dissipation, and more.

Advances in Computing, Communication, and Control Srijia Unnikrishnan, Sunil Surve, Deepak Bhoir, 2013-01-11 This book constitutes the refereed proceedings of the Third International Conference on Advances in Computing, Communication and Control, ICAC3 2013, held in Mumbai, India, in January 2013. The 69 papers presented in this volume were carefully reviewed and selected for inclusion in the book. They deal with topics such as image processing, artificial intelligence, robotics, wireless communications; data warehousing and mining, and are organized in topical sections named: computing; communication; control; and others.

Scope and impact of digital marketing strategies for promoting breast-milk substitutes, 2022-04-28 Digital technologies are increasingly used for marketing food products throughout the world. Although the International Code of Marketing of Breast-milk Substitutes specifies that there should be no advertising or other form of promotion of breast-milk substitutes to the general public, the Code does not directly address many of the specific strategies used in digital marketing. In November 2020, the World Health Assembly requested that WHO review current evidence and prepare a report describing how digital marketing strategies are being used for the promotion of breast-milk substitutes. This report examines in greater depth the scope, techniques and impact of digital marketing strategies for the promotion of breast-milk substitutes.
