Intermediate-Advanced German Vocabulary Hermes Language Reference, This intensive lexical builder is addressed to B1-B2 intermediate learners of German, who are already capable of reading easy German stories, and who would like to enrich (and/or refresh) their vocabulary up to the advanced level in order to approach more complex German texts. Each piece of vocabulary is embedded in at least three example sentences in order to appeal to active understanding and trigger both short-term and long-term memory. Whenever possible, different meanings of the terms or expressions concerned are also illustrated. The vocabulary lessons are interspersed with concise but essential reminders of German grammar. At the end of the book, readers are offered a bilingual, paragraph for paragraph version of one of E. T. A. Hoffmann's famous stories, namely "Rath Krespel" (1818), translated in English by J. T. Bealby (1885). In each pair of bilingual paragraphs, important words to retain or recognize are emphasized in bold or underlined. Finally, the bilingual version is followed by the original, German only text of Hoffmann's novel – which readers are advised to go through, even if by now they know the narrative – since it is essential to retrieve and fully consolidate all learned German terms into their original context. Should you have any suggestions as to how this book can be improved, please email us at: hermeslanguage@reference@gmail.com, or visit us at www.hermeslanguage@reference.wordpress.com And of course, as always when it comes to foreign language learning, remember to stay brave!

Classic Writings for a Phenomenology of Practice Michael van Manen, Max Van Manen, 2020-10-01 *Classic Writings for a Phenomenology of Practice* features examples of newly translated classic phenomenological texts that have been largely forgotten or misunderstood. The writings are unique in that they speak to the practice of doing phenomenological research for the purpose of gaining insights and better understandings regarding aspects of professional practice and ordinary life phenomena and events. Phenomenology does not have to be impenetrable philosophy, dealing with tedious technical issues. Instead, phenomenology may offer relevance, value, and enduring allure to readers and researchers who are engaged with the quotidian life experiences and events of students, patients, clients, friends, and other individuals. This phenomenological approach aims to stay as close as possible to the ordinary events of everyday life: seeing the first smile of a child, feeling compulsive, being humorous, having a conversation, experiencing childhood secrecy, encountering new things—topics that span a manifold of life experiences. In this collection of classic phenomenological writings, each author is thoughtfully introduced, and each text is followed by a conversational descant: a reflection on the phenomenological reflection. The presentation of these classic writings and their reflections aims to show us what it means to do phenomenology directly on the phenomena that we live—thus asking us to be attentive to the fascinating varieties and subtleties of primal lived experiences and consciousness in all its remarkable complexities. This book is relevant for scholars and students who are interested in human science research and the origins and practices of the phenomenological method.

"How we're going about it" Melinda Dooly, Diana Eastment, 2009-03-26 "How we're going about it" provides a space for teachers' voices in the nexus between research and practice by outlining specific cases of innovative approaches to language teaching and learning as they have been applied in the classroom. The volume includes descriptions of some of the most representative recent work and practice in the field while at the same time covering a wide geographic scope. The case descriptions help synthesize research and teaching practice in a way that is accessible to busy teachers, teacher trainers or anyone interested in language development. Each chapter focuses on a similar approach taken by teachers and researchers from different countries and while the book contains contributions from some well-known authors, it also includes contributions from lesser-known practitioners who merit recognition of their innovative practices. This book is an important contribution to language teaching and learning for several reasons. It deals with educational innovation at various levels of education (young learners, primary, secondary, tertiary); it deals with perspectives from different areas of Europe and beyond; and it provides examples of grass-roots experiences being carried out by real teachers in real classrooms and is honest about the problems faced when implementing educational changes. It is therefore a book about authentic experiences with both a theoretical and problem-solving base, experiences which in turn make an important contribution to the underlying theories described herein.

The Oxford Handbook of Deaf Studies in Learning and Cognition Marc Marschark, Harry Knoors, 2020-04-15 In recent years, the intersection of cognitive psychology, developmental psychology, and neuroscience with regard to deaf individuals has received increasing attention from a variety of

academic and educational audiences. Both research and pedagogy have addressed questions about whether deaf children learn in the same ways that hearing children learn, how signed languages and spoken languages might affect different aspects of cognition and cognitive development, and the ways in which hearing loss influences how the brain processes and retains information. There are now a number of preliminary answers to these questions, but there has been no single forum in which research into learning and cognition is brought together. The Oxford Handbook of Deaf Studies in Learning and Cognition aims to provide this shared forum, focusing exclusively on learning, cognition, and cognitive development from theoretical, psychological, biological, linguistic, social-emotional, and educational perspectives. Each chapter includes state-of-the-art research conducted and reviewed by international experts in the area. Drawing this research together, this volume allows for a synergy of ideas that possesses the potential to move research, theory, and practice forward.

Cyclical Change Continued Elly van Gelderen,2016-03-09 This book presents new data and additional questions regarding the linguistic cycle. The topics discussed are the pronoun, negative, negative existential, analytic-synthetic, distributive, determiner, degree, and future/modal cycles. The papers raise questions about the length of time that cycles take, the interactions between different cycles, the typical stages and their stability, and the areal factors influencing cycles. The languages and language families that are considered in depth are Central Pomo, Cherokee, Chinese, English, French, Gbe, German, Hmong-Mien, Maipurean, Mayan, Mohawk, Mon-Khmer, Niger-Congo, Nupod, Quechuan, Sino-Tibetan, Tai-Kadai , Tuscarora, Ute, and Yoruboid. One paper covers several of the world’s language families. Cyclical change connects linguists working in various frameworks because it is exciting to find a reason behind this fascinating phenomenon.
