Mobile TV Amitabh Kumar,2007 Publisher description

After the Mobile Phone? Maren Hartmann,Patrick Rössler,Joachim Höflich,2008-07-30 After the Mobile Phone? Social Changes and the Development of Mobile Communication is a book that looks beyond. It looks beyond in terms of the coming developments concerning mobile technologies, of changes in the mobile media markets, of new aspects of mobile media uses. Moreover, it expands existing theoretical frameworks, since it uses diverse approaches from social sciences, from media studies, from technology studies, etc. After the Mobile Phone? also goes beyond the usual work on mobile media as it looks at wider societal appropriation processes. It is an up-to-date survey of how mobile media are used, produced and imagined. The authors in this book represent a range of well-known scholars in the field. They come from diverse backgrounds and represent a number of different countries.

Mobile TV: Customizing Content and Experience Aaron Marcus,Anxo Cereijo Roibás,Riccardo Sala,2009-12-01 Developing usable, useful, and appealing solutions for the customer or user experience requires customization according to specific users' needs amidst frequently changing physical and social environments. Complex design problems like these require interdisciplinary perspectives that cover software functionality, human interaction and communication experiences, and perceived value. After defining and summarizing current research and development, this book focuses on Mobile TV experience in everyday life, innovative conceptual and participatory design methods, contextual analysis methods, social context for interactive multimedia systems, advanced interaction with mobile digital content, and future trends for the wide range of products and services that will be offered in the decade to come. The Editors have carefully balanced the theoretical and empirical approaches providing a valuable insight into principles and methods, as well as actionable guidelines and recommendations for all those interested in exploring how to achieve the core objectives of usability, usefulness, and social appeal of this new mobile-video technology. The book answers many questions, and raises some new ones that only future technology development and deployment in mobile human-computer interaction and communication can answer.

Plunkett's Wireless, Wi-Fi, Rfid & Cellular Industry Almanac: Wireless, Wi-Fi, Rfid & Cellular Industry Market Research, Statistics, Trends & Leading Jack W. Plunkett,2007-07 The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.

Wireless Technology Steven Powell,J.P. Shim,2009-08-11 Wireless technology and handheld devices are dramatically changing the degrees of interaction throughout the world, further creating a ubiquitous network society. The emergence of advanced wireless telecommunication technologies and devices in today's society has increased accuracy and access rate, all of which are

increasingly essential as the volume of information handled by users expands at an accelerated pace. The requirement for mobility leads to increasing pressure for applications and wireless systems to revolve around the concept of continuous communication with anyone, anywhere, and anytime. With the wireless technology and devices come flexibility in network design and quicker deployment time. Over the past decades, numerous wireless telecommunication topics have received increasing attention from industry professionals, academics, and government agencies. Among these topics are the wireless Internet; multimedia; 3G/4G wireless networks and systems; mobile and wireless network security; wireless network modeling, algorithms, and simulation; satellite based systems; 802.11x; RFID; and broadband wireless access.

Regulating Telecommunications in the EU and China Bernd Holznagel,Junqi Xu,Thomas Hart,2009 Chinese as well as European regulatory decisions need to consider regional particularities but insist on an implementation system that never loses sight of its goal. In the area of electronic communications policy, this goal is the establishment of a market environment that ensures innovation, high quality and affordable prices. The present survey aims at improving the process of knowledge exchange between European and Chinese experts and decision-makers in Information Society law and policy. The EU-China Information Society Project asked the authors to assess both the EU's and the Chinese status quo, and to bring together both perspectives together in a joint effort to learn from the EU experiences for the Chinese decision-making process today.

Global Business Alliances Refik Culpan,2002-03-30 Forging business alliances can vitalize corporate strategies. This book is a road map to the concepts and theories underlying successful business alliances in four critical industries: automobile manufacturing, pharmaceuticals, airlines, and telecommunications. Dr. Culpan offers the essentials of global partnering as seen from a strategic management viewpoint. He examines joint ventures, non-equity alliances, and business options designed to give a competitive edge over other allied firms. New conceptual models help to clarify various strategies and collaborative processes. By comparing the four major industries—and specific companies in each—this study explores not only the uniqueness of its subjects, but also the common grounds of various multinationals. Through key insights and ideas, the possibilities and realities of corporate alliances begin to emerge. Attention is also paid to the decision-making process as it relates cooperative ventures, as well as to the inevitable managerial challenges of forming, and managing, strategic alliances. The result is an astute analysis ideal for teachers, students, and strategists seeking fresh insights into the workings and benefits of corporate alliance.
