New Perspectives on CALL for Second Language Classrooms
Sandra Fotos, Charles M. Browne, 2013-06-17 This practical handbook is designed to help language teachers, teacher trainers, and students learn more about their options for using computer-assisted language learning (CALL) and develop an understanding of the theory and research supporting these options. The chapters in New Perspectives on CALL for Second Language Classrooms synthesize previous CALL theory and research and describe

practical applications to both second and foreign language classrooms, including procedures for evaluating these applications. The implementation of CALL at the institutional level is also addressed, with attention to designing multimedia language laboratories and creating collaborative CALL-based projects between educational institutions. Although many chapters locate their descriptions of CALL activities and projects within the ESL/EFL setting, the principles and activities described are equally useful for other language settings. The book does not require prior knowledge of CALL, computers, or software. To assist readers, a glossary of CALL terms and an appendix of CALL Web sites are provided. The book also has its own accompanying Web site (<http://www.erlbaum.com/callforL2classrooms>) presenting chapter abstracts, author contact information, and regularly updated links to pedagogical, research, and teacher development sites. By integrating theoretical issues, research findings, and practical guidelines on different aspects of CALL, this book offers teachers multiple levels of resources for their own professional development, for needs-based creation of specific CALL activities, for curriculum design, and for implementation of institutional and inter-institutional CALL projects.

Effective E-mail Made E-Z Verne Meyer, Patrick Sebranek, John Van Rys, 2006 The team that developed *Effective E-Mail Made E-Z* polled businesspeople about their experience with e-mail. Here are some of their responses: We came to realize that our company's image rests with every employee who writes or answers e-mail. We spend a lot of time opening and reading e-mail. If the message is clear, this is time well spent. But when the messages require further e-mails to explain the original e-mail, time is wasted. I often wonder: Should I use a greeting? If so,

what kind of greeting? I usually use Sincerely for my closing, but I notice that most of the international e-mails close with Regards. Should I use Regards? If I'm sending an e-mail to Sweden, do I write dates like we do here in the United States, or should I write them like they do in Sweden? Right now our biggest need is to learn how to use e-mail to better manage our teams of workers. Our second challenge is to implement an e-mail policy.
