Voice-over Translation Eliana Franco,Anna Matamala,Pilar Orero,2010 This book presents the first study of voice-over from a wide approach, including not only academic issues but also a description of the practice of voice-over around the globe. The authors define the concept of voice-over in Film Studies and Translation Studies and clarify the relationship between voice-over and other audiovisual transfer modes. They also describe the translation process in voice-over both for production and postproduction, for fiction and non-fiction. The book also features course models on voice-over which can be used as a source of inspiration by trainers willing to include this transfer mode in their courses. A global survey on voice-over in which both practitioners and academics express their opinions and a commented bibliography on voice-over complete this study. Each chapter includes exercises which both lecturers and students can find useful.

Human Language Technologies - The Baltic Perspective A. Utka,G. Grigonytė,J. Kapočiūtė-Dzikienė,2014-09-12 In the modern information society, there is an ever-growing need for improved natural language processing and human language technologies.This book presents the proceedings of the Sixth International Conference 'Human Language Technologies – The Baltic Perspective' (Baltic HLT 2014) held in Kaunas, Lithuania in September 2014. The Baltic HLT conferences provide an important forum for gathering and consolidating ideas, and are an opportunity for the Baltic countries to present important research results to an international audience. The book contains 39 long and short papers presented at the conference. These cover a wide range of topics: syntactic analysis, sentiment analysis, co-reference resolution, authorship attribution, information extraction, document clustering, machine translation, corpus and parallel corpus compiling, speech recognition, synthesis and others. The book is divided into three main sections: speech technology, methods in computational linguistics, and preparation of language resources. This book will be of interest to anyone whose work involves the use and application of computational linguistics and related disciplines.

Beginner's Dictionary of USA English Thomas E. Zurinskas,2006-02 This dictionary of USA English is directly taken from the Voice of America (VOA) Intermediate Dictionary of English. There are about 1,500 words in the dictionary. The VOA uses these words primarily for broadcasting in a simplified English mode. The words and definitions in this book are exactly as in the VOA version. However, because there is no pronunciation guide in the VOA version, a truespel pronunciation guide is provided modeled after the voicings of English on m-w.com, the Merriam-Webster talking dictionary. Unique to this dictionary is a reverse guide that lists phonetic words alphabetically so they can be looked up phonetically. This solves the problem of silent first letters. A large volume reverse dictionary will be available as truespel book 2. More info is available at truespel.com.

The Bloomsbury Companion To Lexicography Howard Jackson,2013-10-10 The Bloomsbury Companion to Lexicography offers the definitive guide to a key area of linguistic study. Each companion is a comprehensive reference resource featuring an overview of key topics, research areas, new directions and a manageable guide to beginning or developing research in the field. Lexicography, as the practice of compiling dictionaries, has a long tradition that has been, for much of the time, largely independent of linguistics. The direct influence of linguistics on lexicography goes back around 50 years, though longer in the case of learners' dictionaries. The present volume aims to reflect on the research that has been and is being done in lexicography and to point the way forward. It tackles, among other topics, the critique of dictionaries in the electronic medium, the future of historical lexicography in the electronic mode with special reference to the online Oxford English Dictionary, and e-lexicography in general.

The Feldenkrais Method Staffan Elgelid,Chrish Kresge,2021-05-04 This book brings the Feldenkrais Method® and the concept of Somatic Education to a wide audience. As well as providing an introduction to the Feldenkrais Method® and its applications, a team of highly qualified contributors, representing a variety of therapeutic professions, explore how the Feldenkrais Method® interacts with and supports other professions and modalities, including Pilates, yoga, dance, physical therapy, sports coaching, rehabilitation medicine, and more. (See the table of contents for full details.) Moshe Feldenkrais (1904-1984), the founder of the Feldenkrais Method®, built his Method around the concept of improving human functioning by increasing self-awareness through movement. The concept of neuroplasticity - the brain's amazing capacity to change and adapt - was one of Feldenkrais' basic tenets of how the brain organizes movement, and is now in our daily lexicon. Pain, illness and injuries all affect how our nervous system and brain react to events in us and around us. Feldenkrais' thesis is that our nervous system always does the best it can with the information it has, and learning through the nervous system is the theme that runs through this book. Coverage includes: Comparisons about similarities as well as differences between the different modalities. Theory and practice of how the Feldenkrais Method® can be applied in a variety of specific settings. Coverage of the research base that supports evidence-informed practices for clients Online video of theory and practice accessed by QR codes throughout the book

Voice and Diction: a Program for Improvement Jon Eisenson,Arthur M. Eisenson,1974

Singing the Body Electric: The Human Voice and Sound Technology Miriama Young,2016-03-03 Singing the Body Electric explores the relationship between the human voice and technology, offering startling insights into the ways in which technological mediation affects our understanding of the voice, and more generally, the human body. From the phonautograph to magnetic tape and now to digital sampling, Miriama Young visits particular musical and literary works that define a century-and-a-half of recorded sound. She discusses the way in which the human voice is captured, transformed or synthesised through technology. This includes the sampled voice, the mechanical voice, the technologically modified voice, the pliable voice of the digital era, and the phenomenon by which humans mimic the sounding traits of the machine. The book draws from key electro-vocal works spanning a range of genres - from Luciano Berio's Thema: Omaggio a Joyce to Radiohead, from Alvin Lucier's I Am Sitting in a Room, to Björk, and from Pierre Henry's Variations on a Door and a Sigh to Christian Marclay's Maria Callas. In essence, this book

transcends time and musical style to reflect on the way in which the machine transforms our experience of the voice. The chapters are interpolated by conversations with five composers who work creatively with the voice and technology: Trevor Wishart, Katharine Norman, Paul Lansky, Eduardo Miranda and Bora Yoon. This book is an interdisciplinary enterprise that combines music aesthetics and musical analysis with literature and philosophy.

On the Frontline with Voices Keith Butler,2017-07-05 This is a jargon-free, user-friendly resource for voice-hearers and their carers, as well as the clinicians and groups who support them both. It offers a new and practical way of looking at voice-hearing as well as a host of practical strategies to assist in recovery. The resource is built around three core sections. Each of the sections speaks directly to voice-hearers, clinicians and carers, in turn. The style and content addresses each group's individual needs in terms appropriate to them and schools them in how to deal with voices from their particular perspective. The core aim is to provide these three groups with practical techniques they can use on a daily basis. The resource offers a proactive, practical and client-centred framework that is designed to reduce anxiety and increase the likelihood of learning new ways to deal with voices. Keith Butler is a consultant clinical psychologist and an associate fellow of the BPS (British Psychological Society). He was a key player in the development of the Buckinghamshire Early Intervention Service (BEIS) and occupied the position of clinical lead in the BEIS for its first 6 years up to his retirement at the end of 2010.

Rethinking Who We Are Paul U. Angelini,2020-07-10T00:00:00Z Rethinking Who We Are takes a non-conventional approach to understanding human difference in Canada. Contributors to this volume critically re-examine Canadian identity by rethinking who we are and what we are becoming by scrutinizing the "totality" of difference. Included are analyses on the macro differences among Canadians, such as the disparities produced from unequal treatment under Canadian law, human rights legislation and health care. Contributors also explore the diversities that are often treated in a non-traditional manner

on the bases of gender, class, sexuality, disAbility and Indigeniety. Finally, the ways in which difference is treated in Canada's legal system, literature and the media are explored with an aim to challenge existing orthodoxy and push readers to critically examine their beliefs and ideas, particularly in an age where divisive, racist and xenophobic politics and attitudes are resurfacing.

Crime & Criminal Alan Elangovan,2021-09-21 In a bid to dissect criminal body language, there are a lot of things attached to it which must first be understood. In this book, many of those issues were tackled and body language of criminals was discussed in the basic terms—nothing blurring or too technical to be understood. Even though suspects do deny their involvement in a crime they are being interrogated for, the signs are subtly written all over their body and it only takes a body language expert to decode them. This book is an invaluable guide to every law enforcement officer and everyone who craves for a tranquil society.

Claiming Your Voice Norvene Vest,2022-08-15 Has the contemporary American polity remained capable of asking itself questions about its purpose and integrity? We recall our optimistic beginnings, sure of God's blessing, yet something has gone wrong. We are at odds with each other and even our friends. What brought us to this moment, and is there anything "we the people" can do? In Claiming Your Voice, Vest examines four contemporary deforming patterns: market culture, American empire, climate crisis, and racism. In consideration of the Christian foundations in prophetic imagination and Benedictine spirituality, she illustrates that Americans are called to provide energy for hope, to cut through public numbness, and to penetrate the deceptions of imperial consciousness so that God and the sacred again become visible and empowering for all our people.
