Diverse Voices in Chinese Translation and Interpreting Riccardo Moratto,Martin Woesler,2021-02-02
This book presents a thoughtful and thorough account of diverse studies on Chinese translation and interpreting (TI). It introduces readers to a plurality of scholarly voices focusing on different aspects of Chinese TI from an interdisciplinary and international perspective. The book brings together eighteen essays by scholars at different stages of their careers with different relationships to translation and interpreting studies. Readers will approach Chinese TI studies from different standpoints, namely socio-historical, literary, policy-related, interpreting, and contemporary translation practice. Given its focus, the book benefits researchers and students who are interested in a global scholarly approach to Chinese TI. The book offers a unique window on topical issues in Chinese TI theory and practice. It is hoped that this book encourages a multilateral, dynamic, and international approach in a scholarly discussion where, more often than not, approaches tend to get dichotomized. This book aims at bringing together international leading scholars with the same passion, that is delving into the theoretical and practical aspects of Chinese TI.

A Voyage Round the World, 2 vols. George Forster,2000-01-01 George Forster's A Voyage Round the World presents a wealth of geographic, scientific, and ethnographic knowledge uncovered by Cook's second journey of exploration in the Pacific (1772-1775). Accompanying his father, the ship's naturalist Johann Reinhold Forster, on the voyage, George proved a knowledgeable and adept observer. The lively,

elegant prose and critical detail of his account, based loosely on his father's journal, make it one of the finest works of eighteenth-century travel literature and an account of prime importance in the history of European contact with Pacific peoples. The Forsters' publications reveal the sophistication and enthusiasm they brought to their observation of Polynesian peoples as well as a sensitivity to the moral ambiguities of contact. The two volumes of George Forster's work include substantially richer descriptions of encounters with island inhabitants than either his father's classic work (*Observations Made during a Voyage round the World*, UH Press, 1996) or Cook's official narrative, and its confident, even visionary, style incorporates a good deal of polemic, particularly in its criticism of the treatment of islanders by Cook's crew. In addition to the range and depth of its anthropological considerations, it provides a thrilling account of life aboard one of Cook's vessels. In its author's German translation, this work becomes a classic of natural history writing, but its original English version has long been neglected by anglophone scholars. This new scholarly edition makes this important book readily available for the first time since its initial publication more than two centuries ago. But it also presents the work in fresh terms, making it more accessible and relevant to a contemporary audience. The valuable introduction and annotations draw on the wide range of anthropological and ethnohistorical scholarship published since the 1960s and contextualize the book in relation to both the cultures of Oceania documented by the Forsters and the history of European voyaging in the Pacific. Appendixes include a translation of the introduction to the German edition and the polemical pamphlets by George Forster and the ship's astronomer William Wales, in which some of the book's more controversial claims were debated. *A Voyage Round the World* brings the disciplines of history and

anthropology to bear on Cook's voyages in an illuminating and readable fashion. This edition will help complete the corpus of basic documents on Cook's voyages--a crucial resource for researchers in cultural, Pacific, and maritime history; archaeologists, anthropologists, and art historians; and most recently for scholars engaged in revisionist interpretations of eighteenth-century exploration and colonization.

Voice-over Translation Eliana Franco, Anna Matamala, Pilar Orero, 2010 This book presents the first study of voice-over from a wide approach, including not only academic issues but also a description of the practice of voice-over around the globe. The authors define the concept of voice-over in Film Studies and Translation Studies and clarify the relationship between voice-over and other audiovisual transfer modes. They also describe the translation process in voice-over both for production and postproduction, for fiction and non-fiction. The book also features course models on voice-over which can be used as a source of inspiration by trainers willing to include this transfer mode in their courses. A global survey on voice-over in which both practitioners and academics express their opinions and a commented bibliography on voice-over complete this study. Each chapter includes exercises which both lecturers and students can find useful.

Textual and Contextual Voices of Translation Cecilia Alvstad,Annjo K. Greenall,Hanne Jansen,Kristiina Taivalkoski-Shilov,2017-10-15 The notion of voice has been used in a number of ways within Translation Studies. Against the backdrop of these different uses, this book looks at the voices of translators, authors, publishers, editors and readers both in the translations themselves and in the texts that surround these translations. The various authors go on a hunt for translational agents' voice imprints in a variety of textual and contextual material, such as literary and non-literary translations, book reviews, newspaper articles,

academic texts and e-mails. While all stick to the principle of studying text and context together, the different contributions also demonstrate how specific textual and contextual circumstances require adapted methodological solutions, ending up in a collection that takes steps in a joint direction but that is at the same time complex and pluralistic. The book is intended for scholars and students of Translation Studies, Comparative Literature, and other disciplines within Language and Literature.

Voices in Translation Gunilla M. Anderman, 2007 This volume includes contributions on dialect translation as well as other studies concerned with the problems facing the translator in bridging cultural divides.

Is That a Fish in Your Ear? David Bellos, 2011-10-11 A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes; we wouldn't even be able to put together flat-pack furniture. Is That a Fish in Your Ear? ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between

translating unprepared natural speech and translating Madame Bovary? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.

Voice and Versification in Translating Poems James W. Underhill, 2016-12-09 Great poets like Shelley and Goethe have made the claim that translating poems is impossible. And yet, poems are translated; not only that, but the metrical systems of English, French, Italian, German, Russian and Czech have been shaped by the translation of poems. Our poetic traditions are inspired by translations of Homer, Dante, Goethe and Baudelaire. How can we explain this paradox? James W. Underhill responds by offering an informed account of meter, rhythm, rhyme, and versification. But more than that, the author stresses that what is important in the poem—and what must be preserved in the translated poem—is the voice that emerges in the versification. Underhill's book draws on the author's translation experience from French, Czech and German. His comparative analysis of the versifications of French and English have enabled him

to revise the key terms involved in translating the poetic voice and transposing the poem's versification. The theories of versification from the Prague School of Linguistics, the French and Swiss schools of versification, and recent scholarship in metrics and rhythm in the UK and in the USA have been integrated into this synthetic but rigorously coherent approach to translating poems. The extensive glossary at the end of the book will prove useful for both students and teachers alike. And the detailed case studies on translating poems by Baudelaire and Emily Dickinson allow the author to categorize and appraise the various poetic and aesthetic strategies and theories that are brought to bear in translating Baudelaire into English, and Dickinson into French.

Advances in Natural Language Processing Adam Przepiórkowski, Maciej Ogrodniczuk, 2014-09-05 This book constitutes the refereed proceedings of the 9th International Conference on Advances in Natural Language Processing, PolTAL 2014, Warsaw, Poland, in September 2014. The 27 revised full papers and 20 revised short papers presented were carefully reviewed and selected from 83 submissions. The papers are organized in topical sections on morphology, named entity recognition, term extraction; lexical semantics; sentence level syntax, semantics, and machine translation; discourse, coreference resolution, automatic summarization, and question answering; text classification, information extraction and information retrieval; and speech processing, language modelling, and spell- and grammar-checking.

Reimagining the Transatlantic, 1780-1890 Joselyn M. Almeida, 2011 Proposing the pan-Atlantic as a critical model that extends the geographical and linguistic boundaries of transatlantic and circumatlantic scholarship, Almeida uncovers the shared cultural discourses that connects discourses of discovery, conquest, enslavement and liberation. Her analysis of works by, among others, William Robertson, Ottobah Cugoana, José Blanco White, Juan Manzano and Charles Darwin expands our understanding of Romantic and Victorian Britain's relationship with Latin America and the Caribbean.

Discourse Markers in Early Koine Greek Christopher J. Fresch, 2023-07-07 Using a cognitive-functional linguistic framework and cross-linguistic research on discourse markers, Christopher J. Fresch investigates the use of five discourse markers in the documentary papyri of the third to first centuries BCE and the Greek translations of the Hebrew Bible. Through this analysis, Fresch proposes linguistically grounded descriptions for how each discourse marker uniquely functions to guide readers in how they process and comprehend the text. Based on these descriptions, he examines the instances of these discourse markers in the Greek translation of the Minor Prophets and how the translator used them to render the Hebrew text. Fresch presents a picture of a translator who selected discourse markers based on their own understanding of the structure, flow, and meaning of the underlying Hebrew text. Their use attests to a translator who was contextually aware and who desired to produce a translation in idiomatic Koine.

A Prosody of Free Verse Richard Andrews, 2016-07-15 There is to date no comprehensive account of the rhythms of free verse. The main purpose of *A Prosody of Free Verse: explorations in rhythm* is to fill that gap and begin to provide a systematic approach to describing and analyzing free verse rhythms. Most

studies have declared the attempt to write such a prosody as impossible: they prefer to see free verse as an aberrant version of regular metrical verse. They also believe that behind free verse is the 'ghost of metre'. Running against that current, *A Prosody of Free Verse* bases its new system on additive rhythms that do not fit conventional time signatures. Inspiration is taken from jazz, contemporary music and dance, not only in their systems of notation but in performance. The book argues that twentieth and twenty-first century rhythms in poetry as based on the line rather than the metrical foot as the unit of rhythm , and that larger rhythmic structures fall into verse paragraphs rather than stanzas.
