George Forster

**Voice-over Translation** Eliana Franco, Anna Matamala, Pilar Orero, 2010 This book presents the first study of voice-over from a wide approach, including not only academic issues but also a description of the practice of voice-over around the globe. The authors define the concept of voice-over in Film Studies and Translation Studies and clarify the relationship between voice-over and other audiovisual transfer modes. They also describe the translation process in voice-over both for production and postproduction, for fiction and non-fiction. The book also features course models on voice-over which can be used as a source of inspiration by trainers willing to include this transfer mode in their courses. A global survey on voice-over in which both practitioners and academics express their opinions and a commented bibliography on voice-over complete this study. Each chapter includes exercises which both lecturers and students can find useful.

**A Voyage Round the World, 2 vols.** George Forster, 2000-01-01 George Forster's A Voyage Round the World presents a wealth of geographic, scientific, and ethnographic knowledge uncovered by Cook's second journey of exploration in the Pacific (1772-1775). Accompanying his father, the ship's naturalist Johann Reinhold Forster, on the voyage, George proved a knowledgeable and adept observer. The lively, elegant prose and critical detail of his account, based loosely on his father's journal, make it one of the finest works of eighteenth-century travel literature and an account of prime importance in the history of European contact with Pacific peoples. The Forsters' publications reveal the sophistication and enthusiasm they brought to their observation of Polynesian peoples as well as a sensitivity to the moral ambiguities of contact. The two volumes of George Forster's work include substantially richer descriptions of encounters with island inhabitants than either his father's classic work (Observations Made during a Voyage round the World, UH Press, 1996) or Cook's official narrative, and its confident, even visionary, style incorporates a good deal of polemic, particularly in its criticism of the treatment of islanders by Cook's crew. In addition to the range and depth of its anthropological considerations, it provides a thrilling account of life aboard one of Cook's vessels. In its author's German translation, this work becomes a classic of natural history writing, but its original English version has long been neglected by anglophone scholars. This new scholarly edition makes this important book readily available for the first time since its initial publication more than two centuries ago. But it also presents the work in fresh terms, making it more accessible and relevant to a contemporary audience. The valuable introduction and annotations draw on the wide range of anthropological and ethnohistorical scholarship published since the 1960s and contextualize the book in relation to both the cultures of Oceania documented by the Forsters and the history of European voyaging in the Pacific. Appendixes include a translation of the introduction to the German edition and the polemical pamphlets by George Forster and the ship's astronomer William Wales, in which some of the book's more controversial claims were debated. A Voyage Round the World brings the disciplines of history and anthropology to bear on Cook's voyages in an illuminating and readable fashion. This edition will help complete the corpus of basic documents on Cook's voyages--a crucial resource for researchers in cultural, Pacific, and maritime history; archaeologists, anthropologists, and art historians; and most recently for scholars engaged in revisionist interpretations of eighteenth-century exploration and colonization.

**Re-Engendering Translation** Christopher Larkosh, 2014-04-08 Of interest to scholars in translation studies, gender and sexuality, and comparative literary and cultural studies, this volume re-examines the possibilities for multiple intersections between translation studies and research on sexuality and gender, and in so doing addresses the persistent theoretical gaps in much work on translation and gender to date. The current climate still seems to promote the continuation of identity politics by encouraging conversations that depart from an all too often limited range of essentializing gendered subject positions. A more inclusive approach to the theoretical intersection between translation and gender as proposed by this volume aims to open up the discussion to a wider range of linguistically and culturally informed representations of sexuality and gender, one in which neither of these two theoretical terms, much less the subjects associated with them, is considered secondary or subordinate to the other. This discussion extends not only to questions of linguistic difference as mediated through the act of translation, but also to the challenges of intersubjectivity as negotiated through culture, 'race' or ethnicity. The volume also makes a priority of engaging a wide range of

cultural and linguistic spaces: Latin America under military dictatorship, numerous points of the African cultural diaspora, and voices from South, Southeast and East Asia. Such perspectives are not included merely as supplemental, 'minority' additions to an otherwise metropolitan-centred volume, but instead are integral to the volume's focus, underscoring its goal of re-engendering translation studies through a politics of alterity that encourages the continued articulation and translation of difference, be it sexual or gendered, cultural or linguistic.

"I don't translate, I create!" Vanessa Drexler, 2016-01-05 "I don't translate, I create!" – This is the slogan of a translation agency called "Sternkopf Communications" located in Flöha, Germany. The translators at this translation agency are specialized in the field of marketing and perceive creativeness their daily bread. But what does this actually mean – I don't translate, I create? Undoubtedly, the translation of a text from one language into another is not an easy and straightforward process. On the contrary, the translator needs to invest much time and one or the other headache before a target text (TT) finally sounds natural, fluent, coherent and logical for the target audience. Different possible translation solutions will have to be considered, language as well as culture-related equivalents often are not easily at hand etc. Would it not be pleasant if machine translation (MT) was there to help with this process? Yet, despite the enormous importance of creativity in translating, computer-aided translation (CAT) tools are being used frequently by professional translators, not to replace but to support the translator in their daily business. CAT tools enable their users to translate in a more consistent way, since they search source texts for words, phrases or sentences that have already been translated before and stored in the TM so that the translator does not need to translate this text unit again 'from scratch'. Considering that this process brings about what could be called 'semi-mechanical' TTs, the use of CAT tools seems to stand in stark contrast to the importance of creativity mentioned above. Thus, the question arises whether CAT tools influence the creative energy of translators and, if this is the case, whether translators regard this influence as rather positive or negative. In this context, it is also important to consider which fields of expertise generally demand a high degree of uniformity/consistency in translations and which subject fields generally allow for a high degree of creative freedom. Accordingly, this paper pursues two related purposes. The first is to compare five CAT tools in their degree of usability. The second purpose is to identify translators' perspectives on uniformity and creativity in translations with the goal to shedding light on the question whether CAT tools generally tend to positively or negatively influence the translation process on a rather linguistic than technological basis.

A companion to Audiovisual Translation: Subtitling, it follows a similar structure and is accompanied by downloadable resources. It develops diversified skills, presents a broad picture of the industry, engages with the various controversies in the field, and challenges prevailing stereotypes. The individual chapters cover the map of dubbing in the world, the dubbing market and professional environment, text segmentation into takes or loops, lip-syncing, the challenge of emulating oral discourse, the semiotic nature of audiovisual texts, and specific audiovisual translation issues. The book further raises a number of research questions and looks at some of the unresolved challenges of this very specific form of translation. It includes graded exercises covering core skills that can be practised in class or at home, individually or collectively. The accompanying downloadable resources contain sample film material in Dutch, English, French, Italian and Spanish, as well as a range of useful material related to professional practice.

Translation and Cognition Gregory M. Shreve, Erik Angelone, 2010-05-28 Translation and Cognition assesses the state of the art in cognitive translation and interpreting studies by examining three important trends: methodological innovation, the evolution of research design, and the continuing integration of translation process research results with the core findings of the cognitive sciences. Several of the volume's essays focus on fruitful new process research methods, such as eye tracking and keystroke logging that have arisen to supplement the use of think-aloud protocols. Another set of contributions investigates how some central theories, concepts, and methods from our sister disciplines of psycholinguistics, cognitive psychology, and neuroscience can inform our understanding of translation processes and their development in novices and experts. Yet another set of essays argues that methodological innovation and integration with the cognitive sciences can lead to more robust research designs and theoretical frameworks to explain the intricacies of cognitive processing during translation and interpreting. Thus, this timely volume actively demonstrates that a new theoretical and methodological consensus in cognitive translation studies is emerging, promising to greatly improve the quality, verifiability, and generalizability of translation process research.
