

Concentration Stefan Van Der Stigchel, 2020-03-10 How to concentrate in a world of beeping smartphones, channel surfing, live-tweeting, pop-up ads, and other distractions. We are in the midst of an attention crisis—caused in large part by our smartphones. There's a constant stream of information that we are powerless to withstand because it shows up in our notifications. More and more of us are finding it harder and harder to concentrate. In this book, attention expert and cognitive psychologist Stefan Van der Stigchel explains how concentration works and offers advice on how to stay focused in a world of beeping smartphones, channel surfing, live-tweeting, pop-up ads, and other distractions. The good news, Van der Stigchel reports, is that we now know more about brain and behavior than ever before, and he draws on the latest scientific findings in his account of concentration. He explains, among other things, that the battle for our attention began long before the digital era; why our phones are so addictive; the importance of working memory (responsible for executing complicated tasks) and how to increase its capacity; and why multitasking is bad for our concentration, but attention rituals help it. He describes the 2017 Oscars debacle (when the Best Picture presenter was given the wrong card) as a failure of multitasking; argues that daydreaming can be good for our concentration; and shows that the presence of a passenger in a car reduces the risk of an accident. He explains the positive effects of taking “tech breaks” (particularly in natural surroundings), meditation, and even daydreaming. We can win the battle for our attention, Van der Stigchel argues, if we have the knowledge and the tools to do it.

De democratie crasht Kees Verhoeven, 2023-01-21 De overheid verliest haar grip op digitalisering en intussen verkeert de democratie in een crisis: een gevaarlijke wisselwerking. Oud-Kamerlid Kees Verhoeven laat zien hoe we het tij kunnen keren. In ‘De democratie crasht’ waarschuwt oud-kamerlid Kees Verhoeven ons voor de sluipmoordenaar van onze rechtsstaat: digitalisering. De overheid krijgt maar geen grip op digitale technologie – met big tech-monopolies, datalekken en privacyschandalen tot gevolg. Intussen versterken sociale media de polarisatie en het hokjesdenken, zowel in de samenleving als in de Tweede Kamer. De politiek raakt oververhit en is steeds minder in staat om maatschappelijke uitdagingen en grote crises het hoofd te bieden. Aan de hand van zijn ervaringen in de Tweede Kamer laat Verhoeven zien hoe digitalisering de democratie veranderde; op de een of andere manier gaan de twee niet goed samen. Verhoeven maakt duidelijk hoe digitale technologie ons in haar greep heeft en ons denken en doen beïnvloedt. Hij geeft antwoord op de vragen: Wat kunnen we doen om digitalisering in goede banen te leiden? Hoe kunnen we onze democratie redden?

Accountability, International Business Operations and the Law Liesbeth Enneking, Ivo Giesen, Anne-Jetske Schaap, Cedric Ryngaert, Francois Kristen, Lucas Roorda, 2019-12-05 A consensus has emerged that corporations have societal and environmental responsibilities when operating transnationally. However, how exactly corporations can be held legally accountable for their transgressions, if at all, is less clear. This volume inquires how regulatory tools stemming from international law, public law, and private law may or may not be used for transnational corporate accountability purposes. Attention is devoted to applicable standards of liability, institutional and jurisdictional issues, and practical challenges, with a focus on ways to improve the existing legal status quo. In addition, there is consideration of the extent to which non-legal regulatory instruments may complement or provide more viable alternatives to these legal mechanisms. The book combines legal doctrinal approaches with comparative, interdisciplinary, and policy insights with the dual aim of furthering the legal scholarly debate on these issues and enabling higher quality decision-making by policymakers seeking to implement regulatory measures that enhance corporate accountability in this context. Through its study of contemporary developments in legislation and case law, it provides a timely and important contribution to the scholarly and sociopolitical debate in the fast-evolving field of international corporate social responsibility and accountability.

EU Personal Data Protection in Policy and Practice Bart Custers, Alan M. Sears, Francien Dechesne, Iliana Georgieva, Tommaso Tani, Simone van der Hof, 2019-02-28 In this book, the protection of personal data is compared for eight EU member states, namely France, Germany, the United Kingdom, Ireland, Romania, Italy, Sweden and the Netherlands. The comparison of the countries is focused on government policies for the protection of personal data, the applicable laws and regulations, implementation of those laws and regulations, and supervision and enforcement. Although the General Data Protection Regulation (GDPR) harmonizes the protection of personal data across the EU as of May 2018, its open norms in combination with cultural differences between countries result in differences in the practical implementation, interpretation and enforcement of personal data protection. With its focus on data protection law in practice, this book provides in-depth insights into how different countries deal with data protection issues. The knowledge and best practices from these countries provide highly relevant material for legal professionals, data protection officers, policymakers, data protection authorities and academics across Europe. Bart Custers is Associate Professor and Director of Research at the Center for Law and Digital Technologies of the Leiden Law School at Leiden University, the Netherlands. Alan M. Sears, Francien Dechesne, Iliana Georgieva and Tommaso Tani are all affiliated to that same organization, of which Professor Simone van der Hof is the General Director.

English in the Netherlands Alison Edwards, 2016-03-18 This volume provides the first comprehensive investigation of the Netherlands in the World Englishes paradigm. It explores the history of English contact, the present spread of English and attitudes towards English in the Netherlands. It describes the development and analysis of the Corpus of Dutch English, the first Expanding Circle corpus based on the design of the International Corpus of English. In addition, it investigates the applicability of Schneider's (2003, 2007) Dynamic Model, concluding that this and other such models need to move away from a colonisation-driven approach and towards a globalisation-driven one to explain the continued spread and evolution of English today. The volume will be highly relevant to researchers interested in the status and use of English in the Netherlands. More broadly, it provides a timely contribution to the debate on the relevance of the World Englishes framework for non-native, non-postcolonial settings such as Continental Europe.

TRUE Brands Mark van de Grift, 2016-05-25 TRUE Brands; de succesmerken van de toekomst! Hoe pas ik TRUE Branding toe om mijn bedrijf tot een succes te maken? De nieuwe generatie consumenten doorziet marketeers. Ze zijn sociaal bewogen, veeleisend en kunnen door middel van social media merken maken en breken. Daar staat tegenover dan onze maatschappij nieuwe merken nodig heeft. Verantwoordelijke marketing kan positieve verandering tot stand brengen in een wereld waar de leefbaarheid onder druk staat. Op dit spannende snijvlak staan TRUE Brands. De basis van TRUE Branding is Transparency, Responsibility, Unique en Empathy. Dit is een geheel nieuw concept en staat voor loyaliteit aan je eigen merk. Denk aan Dove, Triodos bank, Toms (schoenen), Tony Chocolonely of Patagonia. Een echt TRUE Brand neemt verantwoordelijkheid, die aansluit op de missie en resoneert bij de doelgroep. Doorstaat uw merk de toets van TRUE-ness en zal het de komende generaties aanspreken? Mark van de Grift is merk- en marketingspecialist en eigenaar van Drbrand.nl. Hij werkte onder andere voor en met Red Bull, Deloitte, Philips, Samsung, ING en Triodos bank en diverse reclamebureaus. Mark is Master of Marketing Strategy en auteur van het boek Het merk ik, waarvan er meer dan 25.000 exemplaren zijn verkocht.

Terrorism Online Lee Jarvis, Stuart MacDonald, Thomas M. Chen, 2015-03-24 This book investigates the intersection of terrorism, digital technologies and cyberspace. The evolving field of cyber-terrorism research is dominated by single-perspective, technological, political, or sociological texts. In contrast, Terrorism Online uses a multi-disciplinary framework to provide a broader introduction to debates and developments that have largely been conducted in isolation. Drawing together key academics from a range of disciplinary fields, including Computer Science, Engineering, Social Psychology, International Relations, Law and Politics, the volume focuses on three broad themes: 1) how – and why – do terrorists engage with the Internet, digital technologies and cyberspace?; 2) what threat do these various activities pose, and to whom?; 3) how might these activities be prevented, deterred or addressed? Exploring these themes, the book engages with a range of contemporary case studies and different forms of terrorism: from lone-actor terrorists and protest activities associated with ‘hacktivist’ groups to state-based terrorism. Through the book’s engagement with questions of law, politics, technology and beyond, the volume offers a holistic approach to cyberterrorism which provides a unique and invaluable contribution to this subject matter. This book will be of great interest to students of cybersecurity, security studies, terrorism and International Relations.

Digitalisering en liberale kernwaarden Tamara de Bel, Dennis Broeders, Wilbert Jan Derksen, Paul Ducheine, Marijn Janssen, Sander Klous, Frans

Osinga, Ronald Prins, 2022-08-08 Digitalisering heeft een fundamentele impact op de samenleving. In een relatief kort tijdsbestek zijn zaken als het internet, de smartphone en sociale media een grote rol gaan spelen in ons dagelijks leven. Het opzoeken van informatie is makkelijker dan ooit en langs digitale weg kunnen we moeiteloos met elkaar communiceren. Ook binnen sectoren als het onderwijs en de gezondheidszorg zijn toepassingen van digitale technologie niet meer weg te denken. Het is evident dat digitalisering aldus een verrijking is gebleken voor mens en maatschappij. Desalniettemin zijn er ook belangrijke problemen op het gebied van digitalisering te noemen die vragen oproepen. Hoe beteugelen we de datazucht van grote techbedrijven? Op welke manier kunnen we het schadelijke effect van desinformatie minimaliseren? Wat kunnen we doen tegen het gebruik van discriminerende algoritmen door de overheid? Hoe beschermen we onszelf tegen cyberaanvallen? In dit geschrift wordt vanuit een liberaal perspectief gereflecteerd op de belangrijkste uitdagingen die digitalisering oplevert ten aanzien van de vrije markt, de democratie, de relatie tussen burger en overheid, en de veiligheid van de samenleving. Ook wordt er gekeken hoe het digitaliseringsbeleid kan worden ingebed in een algemene governance-strategie. In deze publicatie wordt op toegankelijke wijze duidelijk gemaakt dat de vraagstukken rond digitalisering voor iedereen relevant zijn en dat het tijd is voor de politiek om tot actie over te gaan.

'De radicaliseringsindustrie' Annebregt Dijkman, 2021-02-03 Aanslagen door terroristen, kinderen in strijdgebieden of 'falend' anti-radicaliseringsbeleid; de media staan er iedere dag vol mee. Maar wat betekent het eigenlijk om te werken met dit grillige fenomeen? Wie zijn de professionals die radicalisering en extremisme moeten voorkomen, wat zijn hun belangen, dilemma's en met welke risico's werken ze? 'De radicaliseringsindustrie' is een inleiding op een jonge en complexe beroepspraktijk. Op basis van onderzoek en jarenlange praktijkervaring laat de auteur zien wat er speelt en wat er nodig is: van pionieren naar professionaliseren. Dit boek is bedoeld voor iedereen die werkt of gaat werken met radicalisering en zoekt naar antwoorden. Zoals eerstelijnsprofessionals en hun managers, studenten, opleiders, gemeenten, ministeries, politie, jeugd(zorg)organisaties maar ook journalisten, politici en wetenschappers. En iedereen die er wat van vindt.

Artificial Intelligence and Human Rights, 2023-09-01 The scope of Artificial Intelligence's (AI) hold on modern life is only just beginning to be fully understood. Academics, professionals, policymakers, and legislators are analysing the effects of AI in the legal realm, notably in human rights work. Artificial Intelligence technologies and modern human rights have lived parallel lives for the last sixty years, and they continue to evolve with one another as both fields take shape. Human Rights and Artificial Intelligence explores the effects of AI on both the concept of human rights and on specific topics, including civil and political rights, privacy, non-discrimination, fair procedure, and asylum. Second- and third-generation human rights are also addressed. By mapping this relationship, the book clarifies the benefits and risks for human rights as new AI applications are designed and deployed. Its granular perspective makes Human Rights and Artificial Intelligence a seminal text on the legal ramifications of machine learning. This expansive volume will be useful to academics and professionals navigating the complex relationship between AI and human rights.

Prisoners of the International Community Denis Abels, 2012-09-14 Little has been written about the legal position and conditions of detention of persons detained by international criminal tribunals, particularly as regards their internal legal position (their rights and duties inside the remand facility). The primary purpose of this book is to set out the law governing the detention of persons detained under the tribunals' jurisdiction. The book provides a detailed account of this area of international criminal law. It sets out the applicable law, including the law's underlying principles, and focuses on a number of specific procedural and substantive legal issues. As to procedural issues, it examines the available complaints and disciplinary procedures as well as procedures applicable to the designation of States for the enforcement of the tribunals' sentences. In respect of substantive law, it examines the detainees' right to contact with the outside world, including contact with their relatives, with their lawyers and with the media. The book will be an extremely useful guidance for practitioners in applying the law and principles of the tribunals' detention law, particularly because it is the first monograph written on the topic.

Crossfire Hurricane Josh Campbell, 2020-10-27 CROSSFIRE HURRICANE DELIVERS THE DEFINITIVE HISTORY OF HOW WE GOT FROM 2016 TO TODAY, tracing the events that lead this country to a historic impeachment and beyond. "A must-read indictment of the 'mob boss' in the White House." —The Guardian "An indispensable and riveting insider's account of one of the most dramatic and controversial periods in the history of the FBI. Crossfire Hurricane is a must-read for all Americans." —Daniel Silva, New York Times bestselling author "Campbell speaks both from the heart and experience. A dynamite read." —Dan Rather, former anchor of CBS Evening News and bestselling author of What Unites Us It is January 6, 2017, two weeks before the inauguration. Only a handful of people know about the Steele dossier, and the nation is bitterly divided by the election results. As rumors begin to circulate that something might be brewing with the newly elected president and Russia, FBI special agent Josh Campbell joins the heads of the US intelligence community on a briefing visit to Trump Tower in New York City. He does not yet know that this meeting will eventually lead to the firing of his boss, James Comey, or that within weeks his former boss Robert Mueller will be appointed to investigate collusion and obstruction of justice at the highest level. He does not yet know that the FBI will come under years of sustained attacks from the commander in chief of the very nation its agents have sworn to protect. But, from his unique position within the FBI, he will watch it occur. In this gripping fly-on-the-wall narrative, Campbell takes readers behind the scenes of the earliest days of the Russia investigation—codename: Crossfire Hurricane—up to the present. Using both firsthand experience and reporting, he reveals fresh details about this tumultuous period; explains how the FBI goes about its work and its historic independence from partisan forces; and describes the increasing dismay inside the bureau as the president and his allies escalate their attacks on the agency. Appalled by Trump's assault on the bureau's credibility, Campbell left the FBI in 2018 to sound the alarm about unfair political attacks on the institutions that keep America safe. Smart, clear, passionate, Crossfire Hurricane will captivate readers struggling to make sense of a news cycle careening out of control.

The European Court of Human Rights and its Discontents Spyridon Flogaitis, Tom Zwart, Julie Fraser, 2013-01-01 The European Court of Human Rights has long been part of the most advanced human rights regime in the world. However, the Court has increasingly drawn criticism, with questions raised about its legitimacy and backlog of cases. This book for the first time brings together the critics of the Court and its proponents to debate these issues. The result is a collection which reflects balanced perspectives on the Court's successes and challenges. Judges, academics and policymakers engage constructively with the Court's criticism, developing novel pathways and strategies for the Court to adopt to increase its legitimacy, to amend procedures to reduce the backlog of applications, to improve dialogue with national authorities and courts, and to ensure compliance by member States. The solutions presented seek to ensure the Court's relevance and impact into the future and to promote the effective protection of human rights across Europe. Containing a dynamic mix of high-profile contributors from across Council of Europe member States, this book will appeal to human rights professionals, European policymakers and politicians, law and politics academics and students as well as human rights NGOs.

Privacy and Data Protection Issues of Biometric Applications Els J. Kindt, 2013-12-05 This book discusses all critical privacy and data protection aspects of biometric systems from a legal perspective. It contains a systematic and complete analysis of the many issues raised by these systems based on examples worldwide and provides several recommendations for a transnational regulatory framework. An appropriate legal framework is in most countries not yet in place. Biometric systems use facial images, fingerprints, iris and/or voice in an automated way to identify or to verify (identity) claims of persons. The treatise which has an interdisciplinary approach starts with explaining the functioning of biometric systems in general terms for non-specialists. It continues with a description of the legal nature of biometric data and makes a comparison with DNA and biological material and the regulation thereof. After describing the risks, the work further reviews the opinions of data protection authorities in relation to biometric systems and current and future (EU) law. A detailed legal comparative analysis is made of the situation in Belgium, France and the Netherlands. The author concludes with an evaluation of the proportionality principle and the application of data protection law to biometric data processing operations, mainly in the private sector. Pleading for more safeguards in legislation, the author makes several suggestions for a regulatory framework aiming at reducing the risks of biometric systems. They include limitations to the collection and storage of biometric data as well as technical measures, which could influence the proportionality of the processing. The text is supported by several figures and tables providing a summary of particular points of the discussion. The book also uses the 2012 biometric vocabulary adopted by ISO and contains an extensive bibliography and literature sources.

Rethinking Democratic Innovation Frank Hendriks,2023-08-25 Rethinking Democratic Innovation takes a fresh look at diverging visions of improving democratic governance and asks whether these existing tensions could be made productive. Could different visions of democratic revitalisation complement and correct each other in ways that are good for democracy? Is it conceivable that combined approaches address a larger part of the democratic challenge, while isolated approaches, centralizing deliberative or plebiscitary democracy, are confined to more limited areas of concern? This book ultimately provides an affirmative answer, outlining the scope for hybrid democratic innovations that thrive on exploiting, not eliminating, tensions between diverging visions of improved democracy. Supplementing democratic theory with a cultural perspective, this book contributes to a deeper understanding of plans and methods geared toward improving democratic governance. Revisiting Mary Douglas's seminal take on culture as pollution reduction, processes of democratic innovation are understood as instances of cultural cleaning in public governance. The book recognizes that democratic cleaning will never be finished but can be done in ways that are more productive. Reflecting on varieties of hybrid democratic innovation - deliberative referendums, participatory budgeting-new style, and more - the author posits that more versatile, connective, and embedded innovations stand a better chance of high performance on a broader spectrum than democratic innovations falling short of these qualities.

Experimentalist Governance Bernardo Rangoni,2023-08-31 What does non-hierarchical governance mean? Under what conditions are actors more likely to engage in non-hierarchical processes? Which trajectories best capture their long-term evolution? Through which mechanisms do they overcome gridlock? To respond to these questions at the heart of regulatory governance, the book develops an analytical framework that draws on contemporary debates but seeks to overcome their limitations. Notably, it offers a definition of non-hierarchical (experimentalist) governance that goes beyond institutional structures, giving due attention to actors' choices and strategies. It shows that contrary to expectations, functional and political pressures were more influential than distributions of legal power, and bolstered one another. Strong functional demands and political opposition affect actors' de facto capacity of using powers that, de jure, might be in their own hands. Indeed, actors can use non-hierarchical governance to aid learning as well as the creation of political support. Conversely, they may override legal constraints and impose their views on others, if they are equipped with confidence and powerful reform coalitions beforehand. The book also challenges conservative views that non-hierarchical governance is doomed to wither away, showing that, on the contrary, it is often self-reinforcing. Finally, the book shows that far from being mutually exclusive, positive (shadow of hierarchy) and negative (penalty default) mechanisms typically combine to avoid gridlock. The book examines when, how, and why non-hierarchical institutions affect policy processes and outcomes by analysing five crucial domains (electricity, gas, communications, finance, and pharmaceuticals) in the European Union. It combines temporal, cross-sectoral, and within-case comparisons with process-tracing to show the conditions, trajectories, and mechanisms of non-hierarchical governance.

Het 50+ brein Margriet Sitskoorn,2019-12-03 Het wordt steeds duidelijker dat er bij het ouder worden allerlei veranderingen optreden in de hersenen. Er is niet alleen sprake van verlies maar ook van ontwikkeling van hersenen en vaardigheden. Het is van groot belang dat we oog krijgen voor deze specifieke fase in een mensenleven, zodat we de winst ervan ten volle kunnen benutten en eventuele nadelen kunnen compenseren. In Het 50+ brein combineert Margriet Sitskoorn nieuwe wetenschappelijke inzichten over de ouder wordende hersenen met eerder in haar boek Lang leven de hersenen beschreven kennis. Zij koppelt deze inzichten aan de hedendaagse maatschappij van langer doorwerken, digitalisering, steeds meer zelf moeten doen en zo lang mogelijk genieten. Naast de meest recente wetenschappelijke kennis bevat Het 50+ brein ook een programma om zelf vitaal ouder worden te bevorderen, en tips voor het breed toepassen van alle kennis in zowel privé- als werksituaties. Dit boek is actueler dan ooit, want met de kennis van het 50+ brein kunnen we onbenutte mogelijkheden gebruiken, dogma's doorbreken en de kwaliteit van werk en leven van velen verbeteren. Margriet Sitskoorn is hoogleraar klinische neuropsychologie aan Tilburg University en BIG-geregistreerd klinisch neuropsycholoog. Naast haar wetenschappelijke werk publiceert zij in verschillende bladen, is zij een graag geziene gast bij tv-programma's en een veelgevraagd (internationaal) spreker. Eerder verschenen van haar hand Het maakbare brein, Passies van het brein, Ik wil iets van jou, jij wilt iets van mij, Ik2 en HersenHack.

Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Volkskrant NI Mobile books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Volkskrant NI Mobile books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Volkskrant NI Mobile books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement.
