The Fixer Omnibus: Volume One Andrew Vaillencourt, Roland Tankowicz wasn't even legally a person anymore. The aging cyborg had never really recovered from being betrayed and enslaved by his superiors in the Army, and the final insult of being permanently classified as "defunct military ordnance" had been a bitter pill to swallow. For the last three decades, he's avoided dealing with this by drinking beer and working as a fixer for the crime families in 25th-century Boston. It's easy money when you're the kind of guy who is bullet-proof and can pick up a house. But then Lucia Ribiero stumbles into his favorite watering hole dragging a squad of bounty hunters behind her. Shadows from his own dark past, and old debts still unpaid conspire to drive the old war-horse out for one more mission. Like any good soldier, the mission is all that matters for Roland. What follows is action and adventure on a scale the galaxy may never recover from. In this volume be prepared to see Roland fight cyborgs, gangsters, mercenaries, crime lords, mutants and at least one angry corporate executive as he starts down the ugly path to redemption. The guns will blaze and fists will fly, but before the dust settles a whole galaxy's worth of mad science gone awry will learn a painful lesson about letting sleeping dogs lie. Collected here are the first three full-length novels in the critically-acclaimed tech-noir phenomenon known as: THE FIXER

Structuring Sense: Volume III: Taking Form Hagit Borer,2013-10-03 Structuring Sense explores the difference between words however defined and structures however constructed. It sets out to demonstrate over three volumes that the explanation of linguistic competence should be shifted from lexical entry to syntactic structure, from memory of words to manipulation of rules. Its reformulation of how grammar and lexicon interact has profound implications for linguistic, philosophical, and

psychological theories about human mind and language. Hagit Borer departs from language specific constructional approaches and from lexicalist approaches to argue that universal hierarchical structures determine interpretation, and that language variation emerges from the morphological and phonological properties of inflectional material. Taking Form, the third and final volume of Structuring Sense, applies this radical approach to the construction of complex words. Integrating research in syntax and morphology, the author develops a new model of word formation, arguing that on the one hand the basic building blocks of language are rigid semantic and syntactic functions, while on the other hand they are roots, which in themselves are but packets of phonological information, and are devoid of both meaning and grammatical properties of any kind. Within such a model, syntactic category, syntactic selection and argument structure are all mediated through syntactic structures projected from rigid functions, or alternatively, constructed through general combinatorial principles of syntax, such as Chomsky's Merge. The meaning of 'words', in turn, does not involve the existence of lexemes, but rather the matching of a well-defined and phonologically articulated syntactic domain with conceptual Content, itself outside the domain of language as such. In a departure from most current models of syntax but in line with many philosophical traditions, then, the Exo-Skeletal model partitions 'meaning' into formal functions, on the one hand, and Content, on the other hand. While the former are read off syntactico-semantic structures as is usually assumed, Content is crucially read off syntactico-phonological structures.

The Carbon Fix Stephanie Paladino, Shirley J Fiske, 2016-11-18 Given the growing urgency to develop global responses to a changing climate, The Carbon Fix examines the social and equity dimensions of putting the world's forests—and, necessarily, the rural people who manage and depend on them—at the center of climate policy efforts such as REDD+, intended to slow global warming. The book assesses the implications of international policy approaches that focus on forests as carbon and especially, forest carbon offsets, for rights, justice, and climate governance. Contributions from leading anthropologists and geographers analyze a growing trend towards market principles and financialization of nature in environmental governance, placing it into conceptual, critical, and historical context. The book then challenges perceptions of forest carbon initiatives through in-depth, field-based case studies assessing projects, policies, and procedures at various scales, from informed consent to international carbon auditing. While providing a mixed assessment of the potential for forest carbon initiatives to balance carbon with social goals, the authors present compelling evidence for the complexities of the carbon offset enterprise, fraught with competing interests and interpretations at

multiple scales, and having unanticipated and often deleterious effects on the resources and rights of the world's poorest peoples—especially indigenous and rural peoples. The Carbon Fix provides nuanced insights into political, economic, and ethical issues associated with climate change policy. Its case approach and fresh perspective are critical to environmental professionals, development planners, and project managers; and to students in upper level undergraduate and graduate courses in environmental anthropology and geography, environmental and policy studies, international development, and indigenous studies.

Encyclopedia of Environmental Management, Four Volume Set Sven Erik Jorgensen, 2012-12-13

Winner of an Outstanding Academic Title Award from CHOICE Magazine *Encyclopedia of Environmental Management* gives a comprehensive overview of environmental problems, their sources, their assessment, and their solutions. Through in-depth entries and a topical table of contents, readers will quickly find answers to questions about specific pollution and management issues. Edited by the esteemed Sven Erik Jørgensen and an advisory board of renowned specialists, this four-volume set shares insights from more than 500 contributors—all experts in their fields. The encyclopedia provides basic knowledge for an integrated and ecologically sound management system. Nearly 400 alphabetical entries cover everything from air, soil, and water pollution to agriculture, energy, global pollution, toxic substances, and general pollution problems. Using a topical table of contents, readers can also search for entries according to the type of problem and the methodology. This allows readers to see the overall picture at a glance and find answers to the core questions: What is the pollution problem, and what are its sources? What is the big picture, or what background knowledge do we need? How can we diagnose the problem, both qualitatively and quantitatively, using monitoring and ecological models, indicators, and services? How can we solve the problem with environmental technology, ecotechnology, cleaner technology, and environmental legislation? How do we address the problem as part of an integrated management strategy? This accessible encyclopedia examines the entire spectrum of tools available for environmental management. An indispensable resource, it guides environmental managers to find the best possible solutions to the myriad pollution problems they face. Biodynamic Craniosacral Therapy, Volume Two Michael J. Shea, Ph.D., 2008-08-19 The first volume of Biodynamic Craniosacral Therapy presented the basics of craniosacral therapy as a gentle, compassionate healing art that can be used by psychologists, midwives, chiropractors, and massage and physical therapists. In this second volume, author Michael Shea goes deeper into the entire biodynamic paradigm, analyzing the relationship of trauma resolution, psychodynamics, and

shamanism, and providing practical meditations, visualizations, and clinical skills to restore physical, spiritual, and emotional health. The book opens by exploring the meaning of biodynamic, followed by a discussion of human embryology as a path to healing in any form of therapy. This section offers a set of pioneering techniques based on perceiving stillness—slow movement—as a fundamental healing influence. The next section describes the bridge between trauma resolution therapy and biodynamic work, establishes a new containment model, and offers skills for resolving shock and trauma. A special section contains fresh strategies for anyone working with infants and children, along with a provocative analysis linking the infant-mother relationship to the patient-therapist relationship. Finally, Shea provides a unique perspective on depth psychology, mythology, and healing. This includes the defining difference between biodynamic craniosacral therapy and all other forms of craniosacral therapy: the focus on the nature of spiritual disease and shamanism.

The Lanny Budd Novels Volume Two Upton Sinclair, 2018-04-17 Books four through six in the Pulitzer Prize–winning series of historical novels about an international spy in the first half of the twentieth century. An ambitious and entertaining mix of history, adventure, and romance, Upton Sinclair’s Pulitzer Prize–winning Lanny Budd novels are a testament to the breathtaking scope of the author’s vision and his singular talents as a storyteller. “Few works of fiction are more fun to read; fewer still make history half as clear, or as human” (Time). In these three novels, as the threat of Nazism grows in the 1930s, Lanny progresses from international art dealer to international spy. *Wide Is the Gate*: When his arms dealer father strikes a business agreement with Hermann Göring, Lanny uses the opportunity and his art world reputation to move easily among the Nazi high command and gather valuable information he can transmit back to those who are dedicated to the destruction of Nazism and Fascism. He’s playing a dangerous—albeit necessary—game, which will carry him from Germany to Spain on a life-and-death mission on the eve of the Spanish Civil War. *The Presidential Agent*: In 1937, Lanny’s boss from the Paris Peace Conference—now one of Roosevelt’s top advisors—connects him to the president. Appointed Presidential Agent 103, he embarks on a secret assignment that takes him back into the Third Reich as the Allied powers prepare to cede

Czechoslovakia to Adolf Hitler in a futile attempt to avoid war. But Lanny's motivations are not just political: The woman he loves has fallen into the brutal hands of the Gestapo, and Lanny will risk everything to save her. Dragon Harvest: Lanny has earned the trust of Adolf Hitler and his inner circle, who are convinced the American art dealer is a "true believer" committed to their Fascist cause. But when Roosevelt's secret agent learns of the Führer's plans for conquest, his dire warnings to Neville Chamberlain and other reluctant European leaders fall on deaf ears. The bitter seeds sown decades earlier with the Treaty of Versailles are now bearing fruit, and there will be no stopping the Nazi war machine as it rolls relentlessly on toward Paris.

Dynamic Behavior of Materials, Volume 1 Tom Proulx, 2011-03-31 *Dynamic Behavior of Materials, Volume 1: Proceedings of the 2010 Annual Conference on Experimental and Applied Mechanics*, the first volume of six from the Conference, brings together 71 contributions to this important area of research and engineering. The collection presents early findings and case studies on fundamental and applied aspects of Materials Science, including papers on Composite Materials, Dynamic Failure and Fracture, Dynamic Materials Response, Novel Testing Techniques, Low Impedance Materials, Metallic Materials, Response of Brittle Materials, Time Dependent Materials, High Strain Rate Testing of Biological and Soft Materials, Shock and High Pressure Response, Energetic Materials, Optical Techniques for Imaging High Strain Rate Material Response, and Modeling of Dynamic Response.
