*Get Your Self Scam Free* Robert C. Worstell, 2010-01-06 How do you quit being a victim to every slick telemarketer out there? Is there anyway to see a scam and get out of their way? I've been there and done that. There are reasons people have been trained into being dupes. And all these reasons can be un-trained as well - if you know how. I wrote this book based on the research I did to dig myself out of the hole I had been scammed into. I decided not to get mad or get even " just get my money back somehow, write up what I had encountered, and then move on. And writing this book is part of moving on. While I've put the bulk of this data into several blogs, ebooks, presentations, papers, and so on, I've decided to cobble it all together into a single book so that people can get this data without having to go through what I did. Our job here is not just getting our own lives free from scammers and rip off artists, but it's making this planet we live on a bit safer place for everyone else. Buy this book today and get more freedom!

*The Invention of Free Press* Edoardo Tortarolo, 2016-03-09 Tracking the relationship between the theory of press control and the realities of practicing daily press censorship prior to publication, this volume on the suppression of dissent in early modern Europe tackles a topic with many elusive and under-researched characteristics. Pre-publication censorship was common in absolutist regimes in Catholic and Protestant countries alike, but how effective it was in practice remains open to debate. The Netherlands and England, where critical content segued into outright lampoonery, were unusual for hard-wired press freedoms that arose, respectively, from a highly competitive publishing industry and highly decentralized political institutions. These nations remained extraordinary exceptions to a rule that, for example in France, did not end until the revolution of 1789. Here, the author's European perspective provides a survey of the varying censorship regulations in European nations, as well as the shifting meanings of 'freedom of the press'. The analysis opens up fascinating insights, afforded by careful reading of primary archival sources, into the reactions of censors confronted with manuscripts by authors seeking permission to publish. Tortarolo sets the opinions on censorship of well-known writers, including Voltaire and Montesquieu, alongside the commentary of anonymous censors, allowing us to revisit some common views of eighteenth-century history. How far did these writers, their reasoning stiffened by Enlightenment values, promote dissident views of absolutist monarchies in Europe, and what insights did governments gain from censors' reports into the social tensions brewing under their rule? These questions will excite dedicated researchers, graduate students, and discerning lay readers alike.

**Non-equilibrium Phenomena In Supercooled Fluids, Glasses And Amorphous Materials - Proceedings Of The Workshop** Tosi Mario P, Leporini Dino, Giordano Marco, 1996-09-20 This volume contains the Proceedings of the International Workshop on "Non-Equilibrium Phenomena in Supercooled Fluids, Glasses and Amorphous Materials", held in Pisa in the early fall of 1995 as a joint initiative of the University of Pisa and of the Scuola Normale Superiore. The goal was to bring together liquid state physicists, chemists and engineers, to review current developments and comparatively discuss experimental facts and theoretical predictions in this vast scientific area. The core of the Workshop was a set of general lectures followed by more specific presentations on current issues in the main areas of the field. This structure has been maintained in this volume, in which a set of five overviews is followed by topically grouped contributions in the five areas of ionic glasses and glassy materials, the glass transition, viscous flow and microscopic relaxation, complex fluids, and polymers. The volume also preserves a record of the many short contributions given to the Workshop through posters, which are grouped in it under the subjects of inorganic glasses, organic glasses and complex fluids, polymers, and theoretical aspects.
