Charles F. Hagar

Planetarium, Window to the Universe Charles F. Hagar,1980

Star Theatre William Firebrace,2017-12-30 Most of us can recall a childhood visit to a planetarium: the sense of anticipation as the room darkens. The stars begin to appear as the voice of an astronomer is heard. In the planetarium, where the audience is transported to distant galaxies, the wondrous complexity of the cosmos combines with entertainment to become a theater of the night. Star Theatre explores the history of the planetarium's mix of science and spectacle. William Firebrace reveals how in the planetarium, the solar system and universe is demonstrated on an ever-expanding scale. He traces the origins of the building through history, from its antecedents to its invention in Germany in the 1920s, developments in the USSR and the United States, to its expansion across the globe at the time of the space race, and finally to the evolution of the contemporary planetarium in a time of startling astronomical and cosmological discoveries. This concise and well-illustrated history will appeal to astronomy lovers and those interested in architecture, theater, and cinema.

Guide to the Universe: Outer Planets Glenn F. Chaple,2009-09-10 A long-time avid amateur astronomer living in Massachusetts, Chaple profiles the Jovian planets, that is the gas giants and their many moons, but not the former planet Pluto. His topics include the birth of the Jovian planets, Jupiter's moons as a solar system in miniature, Saturn as the crown jewel of the Solar System (the full sized one), the tipped-over world Uranus, Neptune the planet discovered on paper, Jovian planets beyond our solar system, and Voyager 2's grand tour.

Theaters of Time and Space Jordan Marche,2005-06-08 Every year, millions of Americans visit planetariums and are captivated by their strikingly realistic portrayal of the night sky. Today, it is indeed difficult to imagine astronomy education without these magnificent celestial theaters. But projection planetariums, first developed in Germany, have been a part of American museum pedagogy only since the early twentieth century and were not widespread until the 1960s. In this unique social history, former planetarium director and historian of science Jordan D. Marché II offers the first complete account of the community of individuals and institutions that, during the period between 1930 and 1970, made planetariums the popular teaching aids they are today. Marché addresses issues such as the role of gender and social developments within the planetarium community, institutional patronage, and the popularization of science. He reveals how, at different times, various groups, including financial donors, amateur scientists, and government officials, viewed the planetarium as an instrument through which they could shape public understanding and perceptions of astronomy and space science. Offering an insightful, wide-ranging look into the origins of an institution that has fascinated millions, Theaters of Time and Space brings new perspectives to how one educational community changed the cultural complexion of science, helped shape public attitudes toward the U.S. space program, and even contributed to policy decisions regarding allocations for future space research.
