*Heritage Formation and the Senses in Post-Apartheid South Africa* Duane Jethro, 2020-05-11 In this book, Duane Jethro creates a framework for understanding the role of the senses in processes of heritage formation. He shows how the senses were important for crafting and successfully deploying new, nation-building heritage projects in South Africa during the postapartheid period. The book also highlights how heritage dynamics are entangled in evocative, changing sensory worlds. Jethro uses five case studies that correlate with the five main Western senses. Examples include touch and the ruination of a series of art memorials; how vision was mobilised to assert the authority of the state-sponsored Freedom Park project in Pretoria; how smell memories of apartheid-era social life in Cape Town informed contemporary struggles for belonging after forced removal; how taste informed debates about the attempted rebranding of Heritage Day as barbecue day; and how the sound of the vuvuzela, popularized during the FIFA 2010 Football World Cup, helped legitimize its unofficial African and South African heritage status. This book makes a valuable contribution to the field of sensory studies and, with its focus on aesthetics and material culture, is in sync with the broader material turn in the humanities.

**Sports around the World [4 volumes]** John Nauright, 2012-04-06 This multivolume set is much more than a collection of essays on sports and sporting cultures from around the world: it also details how and why sports are played wherever they exist, and examines key charismatic athletes from around the world who have transcended their sports. *Sports Around the World: History, Culture, and Practice* provides a unique, global overview of sports and sports cultures. Unlike most works of this type, this book provides both essays that examine general topics, such as globalization and sport, international relations and sport, and tourism and sport, as well as essays on sports history, culture, and practice in world regions—for example, Latin America and the Caribbean, the Middle East and North Africa, Europe, and Oceania—in order to provide a more global perspective. These essays are followed by entries on specific sports, world athletes, stadiums and arenas, famous games and matches, and major controversies. Spanning topics as varied as modern professional cycling to the fictional movie *Rocky* to the deadly ball game of the ancient Mayans, the first three volumes contain overview essays and entries for specific sports that have been and are currently practiced around the world. The fourth volume provides a compendium of information on the winners of major sporting competitions from around the world. Readers will gain invaluable insights into how sports have been enjoyed throughout all of human culture, and more fully comprehend their cultural contexts. The entries provide suggestions for further reading on each topic—helpful to general readers, students with school projects, university students and academics alike. Additionally, the four-volume *Sports Around the World* spotlights key charismatic athletes who have changed a sport or become more than just an outstanding player.

**African Football, Identity Politics and Global Media Narratives** Tendai Chari, Nhamo A. Mhiripiri, 2016-02-10 This edited volume addresses key debates around African football, identity construction, fan cultures, and both African and global media narratives. Using the 2010 FIFA World Cup in South Africa as a lens, it explores how football in Africa is intimately bound up with deeper social, cultural and political currents.

**Nettles** Ronnie Lee Johnson, 2020-05-14 In this book you will discover Johnson simply telling his story through a maze of interesting and down-to-earth experiences. As you read you can personally experience and empathize about the dreadful, abusive nettles from the author's past. It is a book about life itself and all the fluctuations and demands that we all encounter at one time or another. But you, the reader, will be inspired and encouraged. Nettles will help you to learn more about yourself as you careen through each chapter.

**Prophetic Witness** Heinrich Bedford-Strohm, Etienne De Villiers, 2011 The role of religious prophetic witness in the public discourse of modern civil societies is a vital question, not only for the churches, but for society as a whole. Is it still appropriate for churches to make use of prophetic witness as a mode of public discourse in contemporary democratic societies? Can biblical tradition be a referential source for prophetic public statements of the churches in highly debated political questions? Or must public discourse in pluralistic societies be strictly grounded in purely reason-based arguments? This book deals with these questions in a multi-disciplinary perspective, looking at historical settings of biblical texts and discussing contemporary issues and contexts. (Series: Theology in the Public Square/Theologie in der Öffentlichkeit - Vol. 1)

**Export to Explode Cash Flow and Profits** Lauri Elliott, 2010-09-20 As the economic recovery in the United States moves slowly, regions like Asia, Africa, and South America are growing well - some explosively. Wouldn't you like to experience explosive business growth? The key is to gain access to areas of growth, and exporting is one strategy for U.S. firms to do that. Exporting is not just for large firms anymore—today, entrepreneurs and small to medium-sized enterprises (SMEs) can easily reap the benefits of exporting. It's no longer just about the assets you own but the resources into which you can tap, says the author, Lauri Elliott. Take advantage of exporting opportunities with the simple strategy of using leverage points. The Leverage Point Strategy(tm) and 11 other leverage points in this book - like demand-driven exporting and language and culture - will help you explore new pathways for shaping an export strategy that can build cash flow and profits even during the worst of times.

**Horns and Trumpets of the World** Jeremy Montagu, 2014-05-08 Humanity has blown horns and trumpets of various makes and models, lengths and diameters since prehistoric times. In *Horns and Trumpets of the World*, the eminent scholar Jeremy Montagu surveys the vast range in time and type of this instrument that has accompanied everything in human history from the war cry to the formal symphony, from the hunting call to the modern jazz performance. No work on this topic offers as much detail or so many illustrations—over 150, in fact—of this remarkable instrument. Montagu's examination looks at horns constructed from seaweed, cane, bamboo, shell, wood, ivory, and metal and encompasses instruments of the Bible, from the Bronze and Iron Ages, the Medieval, Renaissance, Baroque, and Classical periods, and, following the Industrial Revolution, the modern era.

**Music around the World [3 volumes]** Andrew R. Martin, Matthew Mihalka Ph.D., 2020-09-08 With entries on topics ranging from non-Western instruments to distinctive rhythms of music from various countries, this one-stop resource on global music also promotes appreciation of other countries and cultural groups. A perfect resource for students and music enthusiasts alike, this expansive three-volume set provides readers with multidisciplinary perspectives on the music of countries and ethnic groups from around the globe. Students will find *Music around the World: A Global Encyclopedia* accessible and useful in their research, not only for music history and music appreciation classes but also for geography, social studies, language studies, and anthropology. Additionally, general readers will find the books appealing and an invaluable general reference on world music. The volumes cover all world regions, including the Americas, Europe, Africa and the Middle East, and Asia and the Pacific, promoting a geographic understanding and appreciation of global music. Entries are arranged alphabetically. A preface explains the scope of the set as well as how to use the encyclopedia, followed by a brief history of traditional music and important current influences of music in each particular world region.

**It's a Funny Game** Sean Fraser, 2009

**Global Perspectives on Sports and Christianity** Afe Adogame, Nick J. Watson, Andrew Parker, 2017-11-09 While the relationship between sport and religion is deeply rooted in history, it continues to play a profound role in shaping modern-day societies. This edited collection provides an interdisciplinary exploration of this relationship from a global perspective, making a major contribution to the religious, social scientific and theological study of sport. It discusses the dialectical interplay between sport and Christianity across diverse cultures, extending beyond a Western perspective to include studies from Africa, South America and Asia, as well as Europe, the UK and the US. Containing contributions from leading experts within the field, it reflects on key topics including race, gender, spirituality, morality, interfaith sport clubs, and the significance of sport in public rituals of celebration and mourning. Its chapters also examine violent sports such as boxing and mixed martial arts, as well as reflecting on the cult of sporting celebrity and the theology of disability sport. Truly international in scope, *Global Perspectives on Sports and Christianity* is fascinating reading for all those interested in the study of sport, sociology and religion.

**Africa's World Cup** Peter Alegi, Chris Bolsmann, 2013-05-16 A collection of essays reflecting on the 2010 World Cup by noted journalists, academics, and experts

**Eve'Olution** MaMsimanga, 2015-08-25 Eveolution is a revolution for love, integrity, development and advancement. Eveolution is also a revelation of femininity through Afrocentric contemporary poetry. Eveolution reveals the moral bankruptcy of the human race devoid of Ubuntu and

God. This book paints Eve the feminine race, in reversed evolution as she starts as a fully developed species, glorious and having Ubuntu as her first point of call but then degrades to a moral dwarf through the corridors of time. This book laments moral degeneration but rekindles hope in moral regeneration, celebrates reward at the end, and revives faith. The pages in this book are inked in Ubuntu, painted in prayer and framed in poetry.

**Africa: Continent of Economic Opportunity** David Fick,2007-04-01 Divided into geographic regions and representing every African nation, this comprehensive collection of case studies explores how successful business enterprises of varying size, along with community projects, help to create jobs in Africa. A valuable guide to conducting business anywhere on the continent, this account also offers information on finding business opportunities and handling oft-encountered problems.

**Germany in the Loud Twentieth Century** Florence Feiereisen,Alexendra Merley Hill,2012 This book introduces German Sound Studies using a transdisciplinary approach. It invites readers to auralize space by describing characteristically German soundscapes in the long twentieth century, including the noisy city of the early 1900s, the sounds of East and West Germany, and hip-hop soundscapes of the millennium.

**Media and The City** Chiara Giaccardi,Matteo Tarantino,Simone Tosoni,2014-07-18 The percentage of people living in cities and the adoption rates of communication technologies continue to grow across the planet. Our age has come to be defined as one of urbanism and communication; but how are those two intertwined? How do they shape each other? Where and in which ways do they diverge, support or fold into each other? As new tensions emerge and old ones find new solutions, social sciences are forced into a dialogue with media studies and urban studies in order to make sense of the new reality. New theoretical and methodological paradigms are urgently needed, and can be produced only through a fertile and eclectic dialogue. This volume presents some of the latest research in this exciting, cross-disciplinary field. Issues of conflict, mobility, crime, art, memory, ethnicity, identity, and city marketing and branding come under rigorous scrutiny in their mutual and constitutive relationship with urban space and communicative technologies and practices. The volume is divided into three broad sections. The first section deals with the role of media in the social production of urban space – that is, with how media interact with other forces in giving shape to the materiality of the city. The second section deals with how urban space acts as a context for a variety of media-related practices – especially in relation to the popularization of mobile geo-localization technologies which have given us mass phenomena such as Foursquare. The third and final section deals with how urban space is mediated and communicated through ICTs – or in other terms, how urban space is represented by specific media through specific discursive strategies.

**Explaining Physics With The Help Of Toys** Igor Kulaga,2022-06-09 The main task of the initial period of studying physics is inculcating the interest and enthusiasm of children in this subject. The root cause of all interest is surprise, and for children there is almost nothing more surprising than a new and unusual toy. There is a whole class of toys with unusual mechanisms, behaviour, or way of interacting with them. Having explained to the child the not quite ordinary, and often paradoxical, properties of such toys, we can gradually instil in him an interest in physics as one of the most important sciences about the nature of the surrounding world. The main purpose of the book is to arouse interest in the study of physics with the help of toys that everyone has loved since childhood.The book contains descriptions of the toys in which, with the help of explanations of the devices and principles of operation, the basic physical laws are revealed, together with perspectives of phenomena and patterns, practical significance, as well as historical information. The individual descriptions contain the minimum necessary mathematical calculations as well as information of environmental, statistical, and household orientations. All toys are systematized according to 4 chapters: Mechanics, Liquids and Gases, Electricity, and Optics.To a large extent, self-production of simple scientific toys can increase interest and enthusiasm in the process of teaching physics. To this end, the fifth chapter provides step-by-step instructions for making 14 such homemade toys from the most affordable materials using the simplest tools. The participation of teachers or parents in the process of making these toys by young children will undoubtedly provide positive emotions and establish trusting relationships.

**The One Year Sports Devotions for Kids** Jesse Florea,Jeremy Jones,Joshua Cooley,2011-09-30 This devotional is perfect for kids who love sports and who love fun trivia facts about sports, facts about sports heroes, and stories about sports figures who overcame odds and performed the extraordinary. The devotional covers a large variety of sports, including sports both girls and boys will enjoy reading about. From the Polar Bear Club’s New Year’s Day swim to football to yo-yo records, the stories will encourage kids to read this devotion daily. The spiritual insight that connects the trivia to Scripture comes in the “What’s the Score” section. “On the Ball” presents a quick question or phrase to remember, summarizing the point of the devotion. “Coach’s Comment” is the Bible verse.

**Understanding Waves and Wave Motion** Randall McPartland,2014-12-15 Waves and Wave Motion are the keys to communication but they can also help us understand the movement of storms and of planets.

**Africa: Fact, fiction or fable** Rob Marsh,2012-10-01 Africa: fact, fiction or fable takes a look at the unique things, places, people and even animals in Africa. This truly interesting and factual book in encyclopedic format will appeal to both the general and academic market.

**Furry Logic** Matin Durrani,Liz Kalaugher,2016-10-06 The animal world is full of mysteries. Why do dogs slurp from their drinking bowls while cats lap up water with a delicate flick of the tongue? How does a tiny turtle hatchling from Florida circle the entire northern Atlantic before returning to the very beach where it hatched? And how can a Komodo dragon kill a water buffalo with a bite only as strong as a domestic cat's? These puzzles – and many more besides – are all explained by physics. From heat and light to electricity and magnetism, Furry Logic unveils the ways that more than 30 animals exploit physics to eat, drink, mate and dodge death in their daily battle for survival. Along the way, science journalists Matin Durrani and Liz Kalaugher introduce the great physicists whose discoveries helped us understand the animal world, as well as the animal experts of today who are scouring the planet to find and study the animals that seem to push the laws of physics to the limit. Presenting mind-bending physics principles in a simple and engaging way, Furry Logic will appeal both to animal lovers and to those curious to see how physics crops up in the natural world. It's more of a 'howdunit' than a whodunit, though you're unlikely to guess some of the answers.
