language assessment. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

**The Design, Production and Reception of Eighteenth-Century Wallpaper in Britain** Clare Taylor, 2018-06-12 Wallpaper's spread across trades, class and gender is charted in this first full-length study of the material's use in Britain during the long eighteenth century. It examines the types of wallpaper that were designed and produced and the interior spaces it occupied, from the country house to the homes of prosperous townsfolk and gentry, showing that wallpaper was hung by Earls and merchants as well as by aristocratic women. Drawing on a wide range of little known examples of interior schemes and surviving wallpapers, together with unpublished evidence from archives

including letters and bills, it charts wallpaper's evolution across the century from cheap textile imitation to innovative new decorative material. Wallpaper's growth is considered not in terms of chronology, but rather alongside the categories used by eighteenth-century tradesmen and consumers, from plains to flocks, from China papers to papier mâché and from stucco papers to materials for creating print rooms. It ends by assessing the ways in which eighteenth-century wallpaper was used to create historicist interiors in the twentieth century. Including a wide range of illustrations, many in colour, the book will be of interest to historians of material culture and design, scholars of art and architectural history as well as practicing designers and those interested in the historic interior.

*The Materiality of Color* Andrea Feeser, Maureen Daly Goggin, Beth Fowkes Tobin, 2012  
The purpose of this essay collection is to recover color's complex and sometimes morally troubling past. By emphasising color's materiality, and how it was produced, exchanged and used, contributors draw attention to the disjuncture between the beauty of color and the blood, sweat, and tears that went into its production, circulation and application as well as to the complicated and varied social meanings attached to color within specific historical and social contexts.
