M-209 Converter Encryption Machine Technical Manual 1944 Revised Edition War Department,2012-07 Designed by Swedish cryptographer Boris Hagelin, the M-209 Converter was a portable, mechanical cipher machine. Used extensively during WWII and the Korean conflict by both the Army Signal Corps and the U.S. Navy (which designated it the CSP-1500), Hagelin's device allowed a rapid and secure means of communication. The lunchbox- sized machine was so simple that little training was required to use it, yet its cipher scheme proved very difficult - but not impossible - for the Germans to crack. The M-209's elegant design uses six adjustable key wheels or rotors to produce a reciprocal substitution - also known as a Beaufort cipher. The effect was that of sliding a normal alphabet sequence against the same sequence reversed, with a high degree of irregularity in the shifting process brought about by a train of gears. In the train of gears, the number of teeth on the driving number was also varied by the use of keying elements. Prepared by the War Department for the Signal Corps and other users, this M-209 technical manual was originally restricted, but is now considered declassified. It describes the operation and care of this fascinating device. This revised edition was originally printed in 1944 and contains several sections not found in earlier versions, including maintenance and parts information. It provides a fascinating glimpse into mid-level encryption technology circa 1944.

Conversions Simon Ditchfield,Helen Smith,2017-01-06 Conversions is the first collection to explicitly address the intersections between sexed identity and religious change in the two centuries following the Reformation. Chapters deal with topics as diverse as convent architecture and missionary enterprise, the replicability of print and the representation of race. Bringing together leading scholars of literature, history and art history, Conversions offers new insights into the varied experiences of, and responses to, conversion across and beyond Europe. A lively Afterword by Professor Matthew Dimmock (University of Sussex) drives home the contemporary urgency of these themes and the lasting legacies of the Reformations.

The Most Reluctant Convert David C. Downing,2004-01-01 An ECPA 2003 Gold Medallion Finalist!Listed inBooklist'sBest Adult Religion Books of the Year in 2002!His books have sold millions, including classics likeMere Christianity, The Screwtape LettersandThe Lion, the Witch and the Wardrobe.Yet C. S. Lewis was not always a literary giant of Christian faith. How did he leave behind a staunch atheism to become one of the most beloved and renowned Christian authors of our time?Other biographies of Lewis explore his childhood or his dramatic conversion to Christianity. But as David Downing reveals in this fascinating book, the rarely discussed period from Lewis's childhood to his early thirties took him on a tumultuous journey of spiritual and intellectual exploration before he became a most reluctant convert. It was not despite this journey but precisely because of it that Lewis understood the search for life's ultimate meaning so well and went on to become one of the most compelling authors of the twentieth century. Weaving the people, places and events of Lewis's life together with excerpts from Lewis's own writing, Downing shows how Lewis's spiritual quest can also light the path for other seekers.
