Chinese Masculinities in a Globalizing World Kam Louie,2014-11-20 This book explores how the traditional ideal of Chinese manhood – the wen (cultural attainment) and wu (martial prowess) dyad – has been transformed by the increasing integration of China in the international scene. It discusses how increased travel and contact between China and the West are having a profound impact; showing how increased interchange with Western men, for whom wu is a more significant ideal, has shifted the balance in the classic Chinese dichotomy; and how the huge emphasis on wealth creation in contemporary China has changed the notion of wen itself to include business management skills and monetary power. The book also considers the implications of Chinese soft power outside China for the reconfigurations in masculinity ideals in the global setting. The rising significance of Chinese culture enables Chinese cultural norms, including ideals of manhood, to be increasingly integrated in the international sphere and to become hybridised. The book also examines the impact of the Japanese and Korean waves on popular conceptions of desirable manhood in China. Overall, it demonstrates that social constructions of Chinese masculinity have changed more fundamentally and become more global in the last three decades than any other time in the last three thousand years.

Quests of the Dragon and Bird Clan: The Golden Age (Vol. III) Paul Kekai Manansala,2015-10-10 Quests of the Dragon and Bird Clan: The Golden Age (Vol. III) is a continuation of a series of books based on the blog Quests of the Dragon and Bird Clan by Paul Kekai Manansala. The books delve into the historical and archaeological mysteries of the Nusantara Trade and Communication Network (as proposed by the late Wilhelm Solheim) and, particularly, in its involvement in the ancient Spice Trade.

Envisioning Eternal Empire Yuri Pines,2009-01-01 This ambitious book looks into the reasons for the exceptional durability of the Chinese empire, which lasted for more than two millennia (221 B.C.E.-1911 C.E.). Yuri Pines identifies the roots of the empire's longevity in the activities of thinkers of the Warring States period (453-221 B.C.E.), who, in their search for solutions to an ongoing political crisis, developed ideals, values, and perceptions that would become essential for the future imperial polity. In marked distinction to similar empires worldwide, the Chinese empire was envisioned and to a certain extent preplanned long before it came into being. As a result, it was not only a military and administrative construct, but also an intellectual one. Pines makes the argument that it was precisely its ideological appeal that allowed the survival and regeneration of the empire after repeated periods of turmoil. Envisioning Eternal Empire presents a panoptic survey of philosophical and social conflicts in Warring States political culture. By examining the extant corpus of preimperial literature, including transmitted texts and manuscripts uncovered at archaeological sites, Pines locates the common ideas of competing thinkers that underlie their ideological controversies. This bold approach allows him to transcend the once fashionable perspective of competing schools of thought and show that beneath the immense pluralism of Warring States thought one may identify common ideological choices that eventually shaped traditional Chinese political culture

The Year One Metropolitan Museum of Art (New York, N.Y.),2000 More than 150 works of art that exemplify all these societies at the Year One are illustrated in color and explained in this volume. Historical summaries accompanied by maps briefly describe the nature of each culture and the flow of power and peoples during the period centering around the Year One.

New Earth Histories Alison Bashford,Emily M. Kern,Adam Bobbette,2023-11-06 A kaleidoscopic rethinking of how we come to know the earth. This book brings the history of the geosciences and world cosmologies together, exploring many traditions, including Chinese, Pacific, Islamic, South and Southeast Asian conceptions of the earth's origin and makeup. Together the chapters ask: How have different ideas about the sacred, animate, and earthly changed modern environmental sciences? How have different world traditions understood human and geological origins? How does the inclusion of multiple cosmologies change the meaning of the Anthropocene and the global climate crisis? By carefully examining these questions, New Earth Histories sets an ambitious agenda for how we think about the earth. The chapters consider debates about the age and structure of the earth, how humans and earth systems interact, and how empire has been conceived in multiple traditions. The methods the authors deploy are diverse—from cultural history and visual and material studies to ethnography, geography, and Indigenous studies—and the effect is to highlight how earth knowledge emerged from historically specific situations. New Earth Histories provides both a framework for studying science at a global scale and fascinating examples to educate as well as inspire future work. Essential reading for students and scholars of earth science history, environmental humanities, history of science and religion, and science and empire.

Objects Chris Caple,2006-08-21 An invaluable field textbook, Objects examines detailed case studies to provide a brilliantly clear and comprehensible guide to the different methods and approaches (cultural, forensic, and technical) which can and have been used to study ancient artefacts. From the Bayeux Tapestry to small medieval brass pins, medieval wooden doors to Saxon jewellery, Chris Caple's integral text deals with a full range of materials and clearly and simply explains key scientific techniques, technology, anthropological jargon and historical approaches. Key demonstrations include: how information from objects builds into a picture of the ancient society that made and used it the commonly used scientific techniques for object analysis how and why object typologies work how cultural and economic factors as well as the material properties influences what objects are made of how simple observation of an object can build its biography. Revealing answers to crucial questions – such as: Can DNA be obtained from objects? Why do people x-ray ancient artefacts? Can you determine the source of metal objects from their trace elements? – Objects is an absolutely essential text for students of archaeology, museum studies, and conservation.

Three Elegies of Ch'u Geoffrey R. Waters,1985

Mencius Mencius,2004-10-28 Mencius was one of the great philosophers of ancient China, second only in influence to Confucius, whose teachings he defended and expanded. The Mencius, in which he recounts his dialogues with kings, dukes and military men, as well as other philosophers, is one of the Four Books that make up the essential Confucian corpus. It takes up Confucius's theories of jen, or goodness and yi, righteousness, explaining that the individual can achieve harmony with mankind and the universe by perfecting his innate moral nature and acting with benevolence and justice. Mencius' strikingly modern views on the duties of subjects and their rulers or the evils of war, created a Confucian orthodoxy that has remained intact since the third century BCE.

The Emergence of Word-Meaning in Early China Jane Geaney,2022-07-01 The Emergence of Word-Meaning in Early China makes an innovative contribution to studies of language by historicizing the Chinese notion that words have meaning (content independent of instances of use). Rather than presuming that the concept of word-meaning had always existed, Jane Geaney explains how and why it arose in China. To account for why a normative term (yi, duty, morality, appropriateness) came to be used for meanings found in dictionaries, Geaney examines interrelated patterns of word usage threading through and across a wide range of genres. These patterns show that by the first millennium, as textual production exploded—and as radically different writing forms (in Buddhist

sutras) were encountered—yi already functioned as an externally accessible model for semantic interpretation of texts and sayings. The book has far-reaching implications. Because the idea of word-meaning is fundamental to theorizing, the book illuminates not only semantic ideas and the normativity of language in Early China, but also aspects of early Chinese philosophy and intellectual history. As the internet supplants one form of media (print), thereby reducing knowledge to vast digital databases, so too, this book explains, two thousand years ago a culture that prized oral and visual balance became an empire of the text.

The Oxford Handbook of Early China Elizabeth Childs-Johnson,2020-10-23 The Oxford Handbook on Early China brings 30 scholars together to cover early China from the Neolithic through Warring States periods (ca 5000-500BCE). The study is chronological and incorporates a multidisciplinary approach, covering topics from archaeology, anthropology, art history, architecture, music, and metallurgy, to literature, religion, paleography, cosmology, religion, prehistory, and history.

The role of federal military forces in domestic disorders, 1877-1945 Clayton D. Laurie,1997-07-15 CMH 30-15. Army Historical Series. 2nd of three planned volumes on the history of Army domestic support operations. This volume encompasses the period of the rise of industrial America with attendant social dislocation and strife. Major themes are: the evolution of the Army's role in domestic support operations; its strict adherence to law; and the disciplined manner in which it conducted these difficult and often unpopular operations.

An Introduction to Civil Wars Karl R. DeRouen,2014-10-08 Providing a complete overview of the global post-World War II civil wars, this book covers: civil war patterns, types and causes; the effect of natural resources; conflict duration, outcomes and termination; peace agreements; counter-insurgency; terrorism; international intervention; and post-conflict issues.

The Collapse of Complex Societies Joseph Tainter,1988 Dr Tainter describes nearly two dozen cases of collapse and reviews more than 2000 years of explanations. He then develops a new and far-reaching theory.

The Nivison Annals David S. Nivison,2018-07-09 In his last essay just weeks before his death at the age of 91, David S. Nivison says, Breaking into a formal system - such as a chronology - must be like breaking into a code. If you are successful, success will show right off. Since the late 1970's Nivison has focused his scholarship on breaking the code of Three Dynasties (Xia, Shang, Zhou) chronology by establishing an innovative methodology based on mourning periods, astronomical phenomenon, and numerical manipulations derived from them. Nivison is most readily known in the field for revising (and then revising again) the date of the Zhou conquest of Shang, and for his theory that Western Zhou kings employed two calendars (His so-called Two yuan theory), the second being set in effect upon the death of the new king's predecessor and counted from the completion of post-mourning rites for him (i.e., a second 'first' year). Nivison's enabling discovery that the Bamboo Annals (BA) had a historical basis was initially designed to make Wang Guowei's analysis of lunar phase terms (the so-called Four quarter theory that separated each month into four quarters) work for Western Zhou bronze inscriptions. In order to do so he had to assume that some inscriptions used a second yuan counted from completion of mourning. The king's death was the most important event late in a reign, so this implied that a king's reign-of-record was normally counted from the second yuan, omitting initial mourning years. It follows that when the unexpressed mourning years are forgotten (or edited out) but the dates of the beginning and end of the dynasty are still known, the remaining reigns-of-record cluster toward the beginning and end, and a reign in the middle is enlarged. Problems, ideas, and solutions like the one described above are found throughout this new collection of important works on chronology, astronomy, and historiography.
