Collecting Clocks Clock Repairs & Trademarks Index Thomas Hodkin,2015-04-20 A comprehensive book on collecting & repairing antique clocks or timepieces written for both the amateur or experienced in mind. How to tell what's wrong, What tools to use, where to get parts and how to fit them, using hundreds of photographs and diagrams making repairs within most peoples reach, a separate section deals with sympathetic restoration of the case. The Trademarks section includes thousands of clockmakers marks from all around the world, usually stamped on the movement itself enabling the reader to accurately not only identify the maker but date and value the clock.

Green Gone Wrong Heather Rogers,2013-01-16 Faced with climate change, many counsel “going green” by buying organic food or a “clean” car. But can we rely on consumerism as a solution to the very problems it has helped cause? Heather Rogers travels from Paraguay to Indonesia, via the Hudson Valley, Detroit and London, to investigate green capitalism, and argues for solutions that are not mere palliatives or distractions, but ways of engaging with how we live and the kind of world we want to live in.

'Trash,' Censorship, and National Identity in Early Twentieth Century Germany Kara L. Ritzheimer,2016-06-24 A legal and cultural history of censorship, youth protection, and national identity in early twentieth-century Germany.

The Early Reformation in Germany Tom Scott,2016-03-23 Over the last twenty years research on

the Reformation in Germany has shifted both chronologically and thematically toward an interest in the 'long' or 'delayed' Reformations, and the structure and operation of the Holy Roman Empire. Whilst this focus has resulted in many fascinating new insights, it has also led to the relative neglect of the early Reformation movement. Put together with the explicit purpose of encouraging scholars to reengage with the early 'storm years' of the German Reformation, this collection of eleven essays by Tom Scott, explores several issues in the historiography of the early Reformation which have not been adequately addressed. The debate over the nature and function of anticlericalism remains unresolved; the mainsprings of iconoclasm are still imperfectly understood; the ideological role of evangelical doctrines in stimulating and legitimising popular rebellion - above all in the German Peasants' War - remains contentious, while the once uniform view of Anabaptism has given way to a recognition of the plurality and diversity of religious radicalism. Equally, there are questions which, initially broached, have then been sidelined with undue haste: the failure of Reforming movements in certain German cities, or the perception of what constituted heresy in the eyes of the Reformers themselves, and not least, the part played by women in the spread of evangelical doctrines. Consisting of seven essays previously published in scholarly journals and edited volumes, together with three new chapters and an historical afterword, Scott's volume serves as a timely reminder of the importance of the early decades of the sixteenth century. By reopening seemingly closed issues and by revisiting neglected topics the volume contributes to a more nuanced understanding of what the Reformation in Germany entailed.

Behavioral Neuroscience George Spilich, 2023-05-16 Behavioral Neuroscience by George Spilich, presents the neurophysiological aspects of behavior to the 21st-century, digital-native learner in the context of human experience, rather than in that of laboratory experiments with non-human animals. Whether a student has enrolled in the course to prepare them for a career in medicine or science, or they are fulfilling a general education science requirement, Behavioral Neuroscience is written to meet them where they are. The text has an accessible writing style, real-life examples and data sets, active-learning exercises, and multimodal media and quizzes—all designed to make the subject more engaging and relevant. This ground-breaking first edition is ideal for the Introductory Behavioral Neuroscience or the Biological Psychology course.

A Man and His Watch Matthew Hranek, 2017-01-01 A covetable celebration of watches and the stories at the heart of men's obsession with them.

The Munich Pursuit G. K. Robinson,2019-03-29 Fiction based on fact, this a story of the search by the Germans and British to establish how far the other has reached in the development of a jet-engined fighter plane prior to WW2. In UK, the Germans use a dissident South-African-born engineer who lost both parents in the Boer War and harbours a resentment against the British government. Dogged police work eventually exposes him. In Germany, the British lose their experienced agent and are forced to use two reserve officers to fill the gap. The two are discovered by the German Security Forces in the act of taking photographs. They are forced to flee across Germany and France with their information, the Germans in hot pursuit. The German Security operatives have orders to kill them and retrieve the photographs. The Munich Crisis of 1938 with the threat of war causes travel chaos and in part, hinders both sides in the pursuit.
