A Criterial Approach to the Cartography of V2 Giuseppe Samo,2019-12-05 This volume provides a mechanism to uncover the extremely rich split-CP of V2 languages, in both root and embedded clauses, on the basis of theoretical arguments and empirical findings. The movement of the inflected verbal head is triggered to agree with the profiled informational value of the fronted XP. The V2 “constraint” shall thus be observed as a sum of micro-V2s, in which the inflected head creates Spec-Head configurations with the activated criterial positions in the relevant context. The “second linear” position of the verb results from the movement of the inflected verb to the highest activated criterial head. In other words, there is no “bottleneck effect”, but ordinary violations in terms of locality between fronted XPs. This monograph is aimed principally at postgraduate students and researchers interested in the description of natural languages adopting the guidelines of the Cartography of Syntactic Structures.

Blücher Michael V. Leggiere,2014-01-29 One of the most colorful characters in the Napoleonic pantheon, Gebhard Leberecht von Blücher (1742–1819) is best known as the Prussian general who, along with the Duke of Wellington, defeated Napoleon at the Battle of Waterloo. Throughout his long career, Blücher distinguished himself as a bold commander, but his actions at times appeared erratic and reckless. This magnificent biography by Michael V. Leggiere, an award-winning historian of the Napoleonic Wars, is the first scholarly book in English to explore Blücher's life and military career—and his impact on Napoleon. Drawing on exhaustive research in European archives, Leggiere eschews the melodrama of earlier biographies and offers instead a richly nuanced portrait of a talented leader who, contrary to popular perception, had a strong grasp of military strategy. Nicknamed “Marshal Forward” by his soldiers, he in fact retreated more often than he attacked. Focusing on the campaigns of 1813, 1814, and 1815, Leggiere evaluates the full effects of Blücher's operations on his archenemy. In addition to providing military analysis, Leggiere draws extensively from Blücher's own writings to reveal the man behind the legend. Though tough as nails on the outside, Blücher was a loving family man who deplored the casualties of war. This meticulously written biography, enhanced by detailed maps and other illustrations, fills a large gap in our understanding of a complex man who, for all his flaws and eccentricities, is justly credited with releasing Europe from the yoke of Napoleon's tyranny.

Topological Methods in Data Analysis and Visualization Valerio Pascucci,Xavier Tricoche,Hans Hagen,Julien Tierny,2010-11-23 Topology-based methods are of increasing importance in the analysis and visualization of datasets from a wide variety of scientific domains such as biology, physics, engineering, and medicine. Current challenges of topology-based techniques include the management of time-dependent data, the representation of large and complex datasets, the characterization of noise and uncertainty, the effective integration of numerical

methods with robust combinatorial algorithms, etc. . The editors have brought together the most prominent and best recognized researchers in the field of topology-based data analysis and visualization for a joint discussion and scientific exchange of the latest results in the field. This book contains the best 20 peer-reviewed papers resulting from the discussions and presentations at the third workshop on Topological Methods in Data Analysis and Visualization, held 2009 in Snowbird, Utah, US. The 2009 TopoInVis workshop follows the two successful workshops in 2005 (Slovakia) and 2007 (Germany).

A Life Too Short Ronald Reng, 2011-09-29 WINNER OF THE WILLIAM HILL SPORTS BOOK OF THE YEAR WINNER OF THE BRITISH SPORTS BOOK AWARDS FOOTBALL BOOK OF THE YEAR Why does an international footballer with the world at his feet decide to take his own life? On 10 November 2009 the German national goalkeeper, Robert Enke, stepped in front of a passing train. He was thirty-two years old and a devoted husband and father. Enke had played for a string of Europe's top clubs, including Barcelona and Jose Mourinho's Benfica and was destined to become his country's first choice in goal for years to come. But beneath the veneer of success, Enke battled with crippling depression. Award-winning writer Ronald Reng pieces together the puzzle of his friend's life, shedding valuable light on the crushing pressures endured by professional sportsmen and on life at the top clubs. At its heart, Enke's tragedy is a universal story of a man struggling against his demons. 'It should be on every British football fan's reading list' Metro

Real-Time & Stream Data Management Wolfram Wingerath, Norbert Ritter, Felix Gessert, 2019-01-02 While traditional databases excel at complex queries over historical data, they are inherently pull-based and therefore ill-equipped to push new information to clients. Systems for data stream management and processing, on the other hand, are natively push-oriented and thus facilitate reactive behavior. However, they do not retain data indefinitely and are therefore not able to answer historical queries. The book provides an overview over the different (push-based) mechanisms for data retrieval in each system class and the semantic differences between them. It also provides a comprehensive overview over the current state of the art in real-time databases. It first includes an in-depth system survey of today's real-time databases: Firebase, Meteor, RethinkDB, Parse, Baqend, and others. Second, the high-level classification scheme illustrated above provides a gentle introduction into the system space of data management: Abstracting from the extreme system diversity in this field, it helps readers build a mental model of the available options.
