**Writing in Film Studies, from Professional Practice to Practical Pedagogy** Bryan Mead,2024-01-09  
A common refrain heard from instructors in offices across the world is that students have a hard time producing quality written discourse. This is no different in the world of film studies, where many

undergraduate students struggle to cogently discuss the films they watch in class. How can film instructors help students become better writers? This book answers this question by, first, uncovering the disciplinary expectations we have for students, and then offering strategies to explicitly teach those expectations in the classroom. This book examines and identifies the disciplinary conventions of professional film studies discourse along with the expectations we have for student writing in undergraduate film courses. What becomes clear from this analysis is that the pedagogical expectations we have for students are aligned with, and shaped by, professional writing in the discipline. It helps to uncover the argument types instructors take for granted and helps those teaching undergraduate students not only to know what those expectations are, but also how to use that knowledge to foster better student writing.

**The Last Lecture** Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a

professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence

that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

*Veni, Vidi, Video* Frederick Wasser,2001 A funny thing happened on the way to the movies. Instead of heading downtown to a first-run movie palace, or even to a suburban multiplex with the latest high-tech projection capabilities, many people's first stop is now the neighborhood video store. Indeed, video rentals and sales today generate more income than either theatrical releases or television reruns of movies. This pathfinding book chronicles the rise of home video as a mass medium and the sweeping changes it has caused throughout the film industry since the mid-1970s. Frederick Wasser discusses Hollywood's initial hostility to home video, which studio heads feared would lead to piracy and declining revenues, and shows how, paradoxically, video revitalized the film industry with huge infusions of cash that financed blockbuster movies and massive marketing campaigns to promote them. He also tracks the fallout from the video revolution in everything from

changes in film production values to accommodate the small screen to the rise of media conglomerates and the loss of the diversity once provided by smaller studios and independent distributors.
