Behavioral Finance: The Second Generation Meir Statman,2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as “rational” wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as “irrational”—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Having been an advisor to major corporations and influential media, business and government organizations, Yankelovich is a leading public opinion expert who has had a long career studying, questioning, and reporting on national issues, trends, and opinions. Stagnant incomes, blocked social mobility, political polarization, dysfunctional educational, criminal, and health care systems and global instability plague the welfare of not only the United States, but also the entire world. By instituting a few powerful innovations we can revolutionize today's inattentive public into a thoughtful, action-oriented populous. Yankelovich shares the philosophical foundation of his successful career and revisits some of his breakthrough experiences, drawing insightful conclusions applicable to our current condition.
