The 24-Hour Tech Andrew G. McCabe,2015-03-27 The 24-Hour Tech is a training manual for those in the water damage or restoration field. This manual walks the reader through the 20-Step Mitigation Process. It is intended as a complete training manual for new Water Damage Technicians who wish to quickly learn how to properly document insurance losses involving water damage. Andrew McCabe developed this process over years of water damage claims experience. He still uses it today in his consulting practice - Claims Delegates. If you want to learn quickly how to properly document and perform water damage mitigation, without paying for an expensive certification class, The 24-Hour Tech is perfect for you. The process and manual are also the perfect complement to recent grads of WRT or ASD training classes. You may understand HOW to dry a structure, but The 24-Hour Tech teaches you how to get PAID by insurance companies. The system is designed to flow directly into the Xactimate estimating software used by 90% of the insurance claims world.

An Ounce of Prevention Johanna G. Wellheiser,Jude Scott,Canadian Archives Foundation,2002 Fire, flood, earthquake, vandalism, a terrorist attack--the

issues of safety measures, emergency response, and disaster recovery have now become an important part of the planning strategies for most organizations. For the information organization, such as a library, archives, or record center, this responsibility has taken on new dimensions with the proliferation of various forms of electronic media. The authors take the approach that disaster recovery planning must touch every department of an organization and that emergency response must be a carefully mapped strategy. This broad-based approach to integrated disaster planning explains each phase of disaster planning, with chapters covering prevention planning, protection planning, preparedness planning, response planning, and recovery planning. The authors consider collections, records, facilities, and systems and include a chapter on post-disaster planning as well. The authors also cover federal and local assistance programs and list other sources for financial assistance. Although the main thrust of the book is the protection of documents, human safety in case of disaster is stressed explicitly and implicitly throughout. Indispensable for every information organization.
